CLINICAL PATIENT JOURNEY

Patient ID: 10014354

Generated: November 06, 2025 at 04:16 PM

Database: clinicalknowledgegraph

PATIENT INFORMATION - Subject ID: 10014354

A **60** year old **m** patient had a total of **23** hospital admission(s) during the recorded period.

Emergency Department Visit #1

Admission Time: October 08, 2146 at 09:27 PM

This is the patient's **1st** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2146-10-09 01:08:00**, staying for a duration of **0 days 3 hours 41 minutes**.

Initial Assessment:

Patient Transfer Status: Transfer - Patient was transferred from another healthcare facility (e.g., Extended Care, Rehabilitation Center, or other Hospital)

Chief Complaint: CVA

Blood Pressure	118.0/49.0 mmHg
Heart Rate	63.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	97.0%
Temperature	98.2°F
Pain Score	7
Acuity Level	2.0

Previous Medications on Record: October 08, 2146 at 10:02 PM

33 medication(s) documented:

• amlodipine - Calcium Channel Blockers - Dihydropyridines

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• brimonidine - Ophthalmic-Intraocular Press. Reducing, Sel. Alpha Adrenergic Agonists

• calcium carbonate-vitamin D3 - Minerals and Electrolytes - Calcium Replacement/Vitamin D Combinations

• capsaicin - Dermatological Irritants-Counter-Irritant Single Agents

• dextrose [Glucose Bits] - Agents to treat Hypoglycemia (Hyperglycemics)

- divalproex - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex - Migraine Therapy - Carboxylic Acid Derivatives
- divalproex - Bipolar Therapy Agents - Anticonvulsant Type
- ergocalciferol (vitamin D2) - Vitamins - D Derivatives
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- insulin glargine [Lantus] - Insulin Analogs - Long Acting
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- metformin - Insulin Response Enhancers - Biguanides
- multivitamin - Multivitamins
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- risperidone - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisoxazole Deriv
- risperidone - Bipolar Therapy Agents - Atypical Antipsychotics
- sennosides - Laxative - Stimulant
- simvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)
- trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Hospital Admission #1

Admission Time: October 08, 2146 at 11:47 PM

This is the patient's **1st** hospital admission. The patient was admitted from **EMERGENCY ROOM** as an **EW EMER.** admission. The admitting provider was **P05MOU**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **MARRIED**, Language: **English**

APR DRG Code:

Code: 58

Description: OTHER DISORDERS OF NERVOUS SYSTEM

Severity: 2.0

Mortality Risk: 2.0

HCFA DRG Code:

Code: 57

Description: DEGENERATIVE NERVOUS SYSTEM DISORDERS W/O MCC

Medications Administered: October 09, 2146 at 12:05 AM

Total of **1** medication(s) administered:

• Morphine Sulfat 4mg/1mL 1mL VIAL

ICU Admission - Surgical Intensive Care Unit (SICU)

ICU Admission Time: October 09, 2146 at 01:08 AM

The patient was admitted to the **Intensive Care Unit (Surgical Intensive Care Unit (SICU))**. The patient remained in ICU until **2146-10-09 21:20:50**, for a total ICU stay of **0 days 20 hours 12 minutes** (Length of Stay: **0.8422453703703704 days**). During this critical care period, intensive monitoring and interventions were performed including procedures, laboratory tests, and microbiology events.

Prescriptions Ordered: October 09, 2146 at 03:00 AM

18 medication(s) prescribed:

• Glucose Gel 15 g PO

• Dextrose 50% 12.5 gm IV

• ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day

• Docusate Sodium 100 mg PO/NG 2.0x/day

• Fluoxetine 10 mg PO/NG 1.0x/day

- Simvastatin 20 mg PO/NG 1.0x/day
- Gabapentin 200 mg PO/NG 3.0x/day
- Fenofibrate 145 mg PO 1.0x/day
- Pantoprazole 40 mg PO 1.0x/day
- RISperidone 0.5 mg PO 1.0x/day
- Sodium Chloride 0.9% 1000 mL IV
- Sodium Chloride 0.9% Flush 3 mL IV 3.0x/day
- Glucagon 1 mg IM
- Hydrocodone-Acetaminophen (5mg-325mg) 1 TAB PO
- Levothyroxine Sodium 50 mcg PO/NG 1.0x/day
- Divalproex (EXTended Release) 750 mg PO 1.0x/day
- Divalproex (EXTended Release) 500 mg PO 1.0x/day
- Senna 8.6 mg PO/NG 2.0x/day

Laboratory Tests Performed: October 09, 2146 at 03:13 AM

Total of **25** tests performed, with **0** abnormal result(s).

Prescriptions Ordered: October 09, 2146 at 12:00 PM

1 medication(s) prescribed:

• Morphine Sulfate 2 mg IV 1.0x/day

Unit Admission - Neurology

Admission Time: October 09, 2146 at 09:20 PM

The patient was admitted to **Neurology** ward. The patient stayed in this unit until **2146-10-10 21:01:29**, for a total duration of **0 days 23 hours 40 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: October 09, 2146 at 10:00 PM

4 medication(s) prescribed:

• Insulin 50 UNIT SC 1.0x/day

• Sodium Chloride 0.9% Flush 3 mL IV 3.0x/day

• Aspirin 81 mg PO/NG 1.0x/day

• Heparin 5000 UNIT SC 2.0x/day

Prescriptions Ordered: October 10, 2146 at 08:00 AM

2 medication(s) prescribed:

• Heparin 5000 UNIT SC 2.0x/day

• Fluoxetine 10 mg PO/NG 1.0x/day

Prescriptions Ordered: October 10, 2146 at 02:00 PM

1 medication(s) prescribed:

• Ibuprofen 400 mg PO

Unit Admission - Neurology

Admission Time: October 10, 2146 at 09:01 PM

The patient was admitted to **Neurology** ward. The patient stayed in this unit until **2146-10-12 18:27:42**, for a total duration of **1 days 21 hours 26 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: October 10, 2146 at 10:00 PM

1 medication(s) prescribed:

• Insulin 50 UNIT SC 1.0x/day

Prescriptions Ordered: October 11, 2146 at 06:00 PM

1 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

Prescriptions Ordered: October 11, 2146 at 09:00 PM

1 medication(s) prescribed:

• TraZODone 300 mg PO/NG

Discharge Summary

Discharge Time: October 12, 2146 at 06:27 PM

The patient was discharged from **Neurology** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Hemiplegia and hemiparesis following cerebral infarction affecting left non-dominant side

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Hemiplegia, unspecified affecting left nondominant side

• Status post administration of tPA (rtPA) in a different facility within the last 24 hours prior to admission to current facility

• Hyperlipidemia, unspecified

• Essential (primary) hypertension

• Pain in left shoulder

• Diabetes mellitus due to underlying condition with hyperglycemia

• Chronic obstructive pulmonary disease, unspecified

• Morbid (severe) obesity due to excess calories

• Major depressive disorder, single episode, unspecified

• Hypothyroidism, unspecified

• Presence of cardiac pacemaker

• Bariatric surgery status

• Unspecified glaucoma

• Polyneuropathy, unspecified

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **27 days, 2 hours, 56 minutes** since last event*

Emergency Department Visit #2

Admission Time: November 08, 2146 at 09:24 PM

This is the patient's **2nd** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2146-11-09 13:13:00**, staying for a duration of **0 days 15 hours 49 minutes**.

ED Disposition: HOME - Patient was discharged directly from Emergency Department without hospital admission.

Initial Assessment:

Patient Transfer Status: Transfer - Patient was transferred from another healthcare facility (e.g., Extended Care, Rehabilitation Center, or other Hospital)

Chief Complaint: Chest pain

Blood Pressure	123.0/63.0 mmHg
Heart Rate	64.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	96.0%
Temperature	97.2°F
Pain Score	9
Acuity Level	3.0

Emergency Department Discharge Summary

Treatment: The patient received evaluation and treatment in the Emergency Department. Medical staff determined the patient was stable for discharge to **HOME**.

Follow-up Instructions: Patient advised to follow up with primary care physician or return to ED if symptoms worsen.

Previous Medications on Record: November 08, 2146 at 09:52 PM

33 medication(s) documented:

- amlodipine - Calcium Channel Blockers - Dihydropyridines
- aspirin - Salicylate Analgesics
- aspirin - Platelet Aggregation Inhibitors - Salicylates
- brimonidine - Ophthalmic-Intraocular Press. Reducing, Sel. Alpha Adrenergic Agonists
- calcium carbonate-vitamin D3 - Minerals and Electrolytes - Calcium Replacement/Vitamin D Combinations
- capsaicin - Dermatological Irritants-Counter-Irritant Single Agents
- dextrose [Glucose Bits] - Agents to treat Hypoglycemia (Hyperglycemics)
- divalproex - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex - Migraine Therapy - Carboxylic Acid Derivatives
- divalproex - Bipolar Therapy Agents - Anticonvulsant Type
- ergocalciferol (vitamin D2) - Vitamins - D Derivatives
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- insulin glargine [Lantus] - Insulin Analogs - Long Acting
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- metformin - Insulin Response Enhancers - Biguanides
- multivitamin - Multivitamins
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- risperidone - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisoxazole Deriv
- risperidone - Bipolar Therapy Agents - Atypical Antipsychotics
- sennosides - Laxative - Stimulant
- simvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)
- trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Medications Administered: November 08, 2146 at 10:22 PM

Total of **30** medication(s) administered:

- Morphine Sulfat 4mg/1mL 1mL VIAL
- Morphine Sulfat 4mg/1mL 1mL VIAL
- ZIPRASidone 20mg CAP
- Simvastatin 10mg TAB

Hospital Admission #2

Admission Time: November 09, 2146 at 01:53 AM

This is the patient's **2nd** hospital admission. The patient was admitted from **EMERGENCY ROOM** as an **EU OBSERVATION** admission. The admitting provider was **P36VUP**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **MARRIED**, Language: **English**

Unit Admission - Emergency Department Observation

Admission Time: November 09, 2146 at 01:13 PM

The patient was admitted to **Emergency Department Observation** ward. The patient stayed in this unit until **2146-11-09 13:19:00**, for a total duration of **0 days 0 hours 6 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Discharge Summary

Discharge Time: November 09, 2146 at 01:19 PM

The patient was discharged from **Emergency Department Observation** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

- Chest pain, unspecified
- Chronic lymphocytic leukemia of B-cell type not having achieved remission
- Other secondary pulmonary hypertension
- Bradycardia, unspecified
- Hyperlipidemia, unspecified
- Type 2 diabetes mellitus without complications
- Pure hypercholesterolemia
- Presence of cardiac pacemaker
- Personal history of transient ischemic attack (TIA), and cerebral infarction without residual deficits
- Acquired absence of other specified parts of digestive tract

*Time gap of **206 days, 9 hours, 20 minutes** since last event*

Emergency Department Visit #3

Admission Time: June 03, 2147 at 10:39 PM

This is the patient's **3rd** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2147-06-04 00:45:19**, staying for a duration of **0 days 2 hours 6 minutes**.

Initial Assessment:

Chief Complaint: Chest pain

Blood Pressure	145.0/63.0 mmHg
Heart Rate	62.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	95.0%
Temperature	97.9°F
Pain Score	9
Acuity Level	2.0

Laboratory Tests Performed: June 03, 2147 at 11:05 PM

Total of **59** tests performed, with **13** abnormal result(s).

Chemistry

Test	Value	Reference Range
Alanine Aminotransferase (ALT)	17.0IU/L	0.0-40.0

Previous Medications on Record: June 03, 2147 at 11:06 PM

32 medication(s) documented:

- acetaminophen - Analgesic or Antipyretic Non-Opioid
- aspirin - Salicylate Analgesics
- aspirin - Platelet Aggregation Inhibitors - Salicylates
- atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)
- cyanocobalamin (vitamin B-12) - Vitamins - B-12, Cyanocobalamin and derivatives
- dextrose [Glucose Bits] - Agents to treat Hypoglycemia (Hyperglycemics)
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- ibuprofen - NSAID Analgesics (COX Non-Specific) - Propionic Acid Derivatives
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol tartrate - Beta Blockers Cardiac Selective
- multivitamin - Multivitamins
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- sennosides - Laxative - Stimulant
- trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics
- gabapentin - Anticonvulsant - GABA Analogs
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- sulfamethoxazole-trimethoprim - Antibacterial Folate Antagonist - Other Combinations
- Lantus - Insulin Analogs - Long Acting
- Xarelto - Direct Factor Xa Inhibitors

Medications Administered: June 04, 2147 at 12:06 AM

Total of **10** medication(s) administered:

• HYDROmorphone (D 1mg/1mL 1mL SYR

• Metoprolol Tartrate 50mg TAB

• Divalproex (DELayed Re 250mg TAB

• TraZODone 50mg TAB

• Gabapentin 300mg CAP

• Hepari 25000UNIT/250mL 250mL BAG

• Hepari 25000UNIT/250mL 250mL BAG

• Nitroglyce 100mg/250mL 250mL BTL

• Nitroglyce 100mg/250mL 250mL BTL

• HYDROmorphone (D 1mg/1mL 1mL SYR

Hospital Admission #4

Admission Time: June 04, 2147 at 12:42 AM

This is the patient's **4th** hospital admission. The patient was admitted from **EMERGENCY ROOM** as an **EU OBSERVATION** admission. The admitting provider was **P336JM**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

Unit Admission - Medicine

Admission Time: June 04, 2147 at 12:45 AM

The patient was admitted to **Medicine** ward. Service provided: **CMED**. The patient stayed in this unit until **2147-06-04 01:07:14**, for a total duration of **0 days 0 hours 21 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Unit Admission - Discharge Lounge

Admission Time: June 04, 2147 at 01:07 AM

The patient was admitted to **Discharge Lounge** ward. The patient stayed in this unit until **2147-06-04 09:00:09**, for a total duration of **0 days 7 hours 52 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Unit Admission - Medicine

Admission Time: June 04, 2147 at 09:00 AM

The patient was admitted to **Medicine** ward. The patient stayed in this unit until **2147-06-04 15:01:36**, for a total duration of **0 days 6 hours 1 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: June 04, 2147 at 11:00 AM

2 medication(s) prescribed:

- Influenza Vaccine Quadrivalent 0.5 mL IM
- Sodium Chloride 0.9% Flush 3 mL IV 3.0x/day

Prescriptions Ordered: June 04, 2147 at 12:00 PM

24 medication(s) prescribed:

- Capsaicin 0.025% 1 Appl TP 4.0x/day
- Insulin 56 UNIT SC 1.0x/day
- ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day
- Pantoprazole 40 mg PO 1.0x/day
- Cyanocobalamin 1000 mcg PO/NG 1.0x/day
- Gabapentin 300 mg PO/NG 3.0x/day
- Multivitamins 2 TAB PO/NG 1.0x/day
- Glucose Gel 15 g PO
- Sodium Chloride Nasal 1-2 SPRY NU
- Dextrose 50% 12.5 gm IV
- Atorvastatin 80 mg PO/NG 1.0x/day
- Glucagon 1 mg IM
- Brimonidine Tartrate 0.15% Ophth. 1 DROP LEFT EYE 3.0x/day
- TraZODone 300 mg PO/NG 1.0x/day
- Divalproex (EXTended Release) 250 mg PO 1.0x/day
- Aspirin 81 mg PO/NG 1.0x/day

• Clopidogrel 75 mg PO/NG 1.0x/day

• FLUoxetine 30 mg PO/NG 1.0x/day

• Maalox/Lidocaine 30 mL ORAL

• HYDROcodone-Acetaminophen (5mg-325mg) 1 TAB PO 2.0x/day

• Levothyroxine Sodium 50 mcg PO/NG 1.0x/day

• Furosemide 20 mg PO/NG 1.0x/day

• Divalproex (EXTended Release) 500 mg PO 2.0x/day

• Senna 17.2 mg PO/NG

Prescriptions Ordered: June 04, 2147 at 01:00 PM

2 medication(s) prescribed:

• Losartan Potassium 50 mg PO/NG 1.0x/day

• Metoprolol Tartrate 12.5 mg PO/NG 2.0x/day

Prescriptions Ordered: June 04, 2147 at 02:00 PM

1 medication(s) prescribed:

• Lidocaine 5% Patch 1 PTCH TD 1.0x/day

Discharge Summary

Discharge Time: June 04, 2147 at 03:01 PM

The patient was discharged from **Medicine** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Other chest pain

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Essential (primary) hypertension

• Presence of coronary angioplasty implant and graft

• Long term (current) use of antithrombotics/antiplatelets

• Hyperlipidemia, unspecified

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Type 2 diabetes mellitus without complications

• Long term (current) use of insulin

• Unspecified atrial fibrillation

• Hypothyroidism, unspecified

• Major depressive disorder, single episode, unspecified

• Other bursitis of hip, right hip

• Unspecified dementia, unspecified severity, without behavioral disturbance, psychotic disturbance, mood disturbance, and anxiety

• Obstructive sleep apnea (adult) (pediatric)

• Personal history of transient ischemic attack (TIA), and cerebral infarction without residual deficits

• Presence of cardiac pacemaker

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **99 days, 10 hours, 59 minutes** since last event*

Emergency Department Visit #4

Admission Time: September 12, 2147 at 02:01 AM

This is the patient's **4th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2147-09-12 06:37:00**, staying for a duration of **0 days 4 hours 36 minutes**.

Initial Assessment:

Patient Transfer Status: Transfer - Patient was transferred from another healthcare facility (e.g., Extended Care, Rehabilitation Center, or other Hospital)

Chief Complaint: Chest pain, NSTEMI

Blood Pressure	137.0/86.0 mmHg
Heart Rate	85.0 bpm
Respiratory Rate	18.0 breaths/min
Oxygen Saturation	97.0%
Temperature	98.4°F
Pain Score	7
Acuity Level	2.0

Medications Administered: September 12, 2147 at 02:29 AM

Total of **11** medication(s) administered:

• Nitroglyce 100mg/250mL 250mL BTL

• Nitroglyce 100mg/250mL 250mL BTL

• LORazepam 2mg/1mL 1mL SYR

• LORazepam 2mg/1mL 1mL SYR

• LORazepam 2mg/1mL 1mL SYR

• Nitroglyce 100mg/250mL 250mL BTL

• Nitroglyce 100mg/250mL 250mL BTL

• Nitroglyce 100mg/250mL 250mL BTL

• Nitroglyce 100mg/250mL 250mL BTL

• Morphine Sulfat 4mg/1mL 1mL VIAL

• HYDROmorphone (D 1mg/1mL 1mL SYR

Previous Medications on Record: September 12, 2147 at 02:40 AM

32 medication(s) documented:

• acetaminophen [Mapap (acetaminophen)] - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• docusate sodium - Laxative - Surfactant

• fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives

• fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations

• ibuprofen - NSAID Analgesics (COX Non-Specific) - Propionic Acid Derivatives

• insulin glargine [Lantus] - Insulin Analogs - Long Acting

• levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Hypnotics - Melatonin - Single Agents

• metformin - Insulin Response Enhancers - Biguanides

• metoprolol tartrate - Beta Blockers Cardiac Selective

• oxycodone - Analgesic Opioid Agonists

• pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)

• sennosides [senna] - Laxative - Stimulant

• trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)

• ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones

• ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

*Time gap of **2 hours, 26 minutes** since last event*

Hospital Admission #5

Admission Time: September 12, 2147 at 05:06 AM

This is the patient's **5th** hospital admission. The patient was admitted from **EMERGENCY ROOM** as an **EU OBSERVATION** admission. The admitting provider was **P301YN**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

Unit Admission - Medicine/Cardiology

Admission Time: September 12, 2147 at 06:37 AM

The patient was admitted to **Medicine/Cardiology** ward. The patient stayed in this unit until **2147-09-12 19:07:59**, for a total duration of **0 days 12 hours 30 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: September 12, 2147 at 07:00 AM

2 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 3 mL IV 3.0x/day

• D5W 250 mL IV DRIP

Prescriptions Ordered: September 12, 2147 at 08:00 AM

3 medication(s) prescribed:

• Clopidogrel 75 mg PO/NG 1.0x/day

• Aspirin 81 mg PO/NG 1.0x/day

• Aspirin 325 mg PO/NG 1.0x/day

Prescriptions Ordered: September 12, 2147 at 11:00 AM

2 medication(s) prescribed:

• Metoprolol Tartrate 12.5 mg PO/NG 2.0x/day

• Atorvastatin 80 mg PO/NG 1.0x/day

Prescriptions Ordered: September 12, 2147 at 01:00 PM

6 medication(s) prescribed:

• Acetaminophen 500 mg PO/NG 3.0x/day

• Glucose Gel 15 g PO

• Insulin 56 UNIT SC 1.0x/day

• Glucagon 1 mg IM

• Clopidogrel 75 mg PO/NG 1.0x/day

• Dextrose 50% 12.5 gm IV

Discharge Summary

Discharge Time: September 12, 2147 at 07:07 PM

The patient was discharged from **Medicine/Cardiology** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Other chest pain

• Anxiety disorder, unspecified

• Malignant neoplasm of left testis, unspecified whether descended or undescended

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Presence of coronary angioplasty implant and graft

• Old myocardial infarction

• Presence of cardiac pacemaker

• Type 2 diabetes mellitus without complications

• Long term (current) use of insulin

• Essential (primary) hypertension

• Hyperlipidemia, unspecified

- Long term (current) use of antithrombotics/antiplatelets
- Personal history of transient ischemic attack (TIA), and cerebral infarction without residual deficits
- Chronic lymphocytic leukemia of B-cell type not having achieved remission
- Unspecified glaucoma
- Unspecified convulsions
- Hypothyroidism, unspecified
- Gastro-esophageal reflux disease without esophagitis
- Unspecified atrial fibrillation

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **62 days, 23 hours, 14 minutes** since last event*

Emergency Department Visit #5

Admission Time: November 14, 2147 at 06:22 PM

This is the patient's **5th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2147-11-14 23:09:00**, staying for a duration of **0 days 4 hours 47 minutes**.

Initial Assessment:

Chief Complaint: Fatigue, s/p Fall

Blood Pressure	138.0/78.0 mmHg
Heart Rate	80.0 bpm
Respiratory Rate	18.0 breaths/min
Oxygen Saturation	99.0%
Temperature	97.3°F
Pain Score	4
Acuity Level	2.0

Previous Medications on Record: November 14, 2147 at 06:46 PM

33 medication(s) documented:

• acetaminophen [Mapap (acetaminophen)] - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• clopidogrel - Platelet Aggregation Inhibitors - Thienopyridine Agents

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• docusate sodium - Laxative - Surfactant

• fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives

• fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations

• ibuprofen - NSAID Analgesics (COX Non-Specific) - Propionic Acid Derivatives

• insulin glargine [Lantus] - Insulin Analogs - Long Acting

• levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Hypnotics - Melatonin - Single Agents

• metformin - Insulin Response Enhancers - Biguanides

• metoprolol tartrate - Beta Blockers Cardiac Selective

• ondansetron HCl - Antiemetic - Selective Serotonin 5-HT3 Antagonists

• pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)

• sennosides [senna] - Laxative - Stimulant

• trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)

• ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones

• ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Medications Administered: November 14, 2147 at 07:17 PM

Total of **5** medication(s) administered:

• Aluminum-Magnesium Hy 30mL UDCUP

• Aluminum-Magnesium Hy 30mL UDCUP

• Lidocaine Viscous 2% 15mL UDCUP

• Ondansetron 4mg/2mL 2mL VIAL

• Ondansetron 4mg/2mL 2mL VIAL

Hospital Admission #6

Admission Time: November 14, 2147 at 10:12 PM

This is the patient's **6th** hospital admission. The patient was admitted from **EMERGENCY ROOM** as an **EW EMER.** admission. The admitting provider was **P491HR**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

HCFA DRG Code:

Code: 683

Description: RENAL FAILURE W CC

Unit Admission - Hematology/Oncology

Admission Time: November 14, 2147 at 11:09 PM

The patient was admitted to **Hematology/Oncology** ward. The patient stayed in this unit until **2147-11-16 15:57:12**, for a total duration of **1 days 16 hours 48 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: November 15, 2147 at 01:00 AM

21 medication(s) prescribed:

• Dextrose 50% 12.5 gm IV

• Magnesium Oxide 400 mg PO/NG 2.0x/day

• Senna 8.6 mg PO/NG 1.0x/day

• Divalproex (EXTended Release) 250 mg PO 1.0x/day

• Rivaroxaban 10 mg PO/NG 1.0x/day

• Metoprolol Tartrate 12.5 mg PO/NG 2.0x/day

• Divalproex (EXTended Release) 500 mg PO 2.0x/day

• Acetaminophen 500 mg PO/NG

• Insulin 0 UNIT SC

• TraZODone 300 mg PO/NG 1.0x/day

• HYDROcodone-Acetaminophen (5mg-325mg) 1 TAB PO

• Atorvastatin 80 mg PO/NG 1.0x/day

• Glucagon 1 mg IM

• Glucose Gel 15 g PO

• Pantoprazole 40 mg PO 1.0x/day

• Levothyroxine Sodium 25 mcg PO/NG 1.0x/day

• FLUoxetine 20 mg PO/NG 1.0x/day

• Gabapentin 300 mg PO/NG 3.0x/day

• Lactated Ringers 1000 mL IV

• Clopidogrel 75 mg PO/NG 1.0x/day

• Docusate Sodium 100 mg PO/NG 2.0x/day

Prescriptions Ordered: November 15, 2147 at 02:00 AM

2 medication(s) prescribed:

• LORazepam 0.5-1 mg IV

• Ondansetron 4 mg IV

Prescriptions Ordered: November 15, 2147 at 08:00 AM

2 medication(s) prescribed:

• Polyethylene Glycol 17 g PO/NG 1.0x/day

• Aspirin 81 mg PO/NG 1.0x/day

Prescriptions Ordered: November 15, 2147 at 12:00 PM

2 medication(s) prescribed:

• Prochlorperazine 10 mg PO

• Potassium Chloride Replacement (Critical Care and Oncology) 80 mEq PO

Prescriptions Ordered: November 15, 2147 at 02:00 PM

2 medication(s) prescribed:

• Bisacodyl 10 mg PO

• Sucralfate 1 gm PO/NG 4.0x/day

Prescriptions Ordered: November 15, 2147 at 10:00 PM

1 medication(s) prescribed:

• Ramelteon 8 mg PO/NG 1.0x/day

Prescriptions Ordered: November 15, 2147 at 11:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: November 16, 2147 at 10:00 AM

1 medication(s) prescribed:

• Bisacodyl 10 mg PR 1.0x/day

Prescriptions Ordered: November 16, 2147 at 02:00 PM

1 medication(s) prescribed:

• LORazepam 0.5 mg PO/NG 1.0x/day

Discharge Summary

Discharge Time: November 16, 2147 at 03:57 PM

The patient was discharged from **Hematology/Oncology** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Acute kidney failure, unspecified

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Type 2 diabetes mellitus with diabetic nephropathy

• Malignant neoplasm of descended left testis

• Hypovolemia

• Hypertensive heart disease with heart failure

• Chronic diastolic (congestive) heart failure

• Paroxysmal atrial fibrillation

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Presence of coronary angioplasty implant and graft

• Long term (current) use of antithrombotics/antiplatelets

• Personal history of transient ischemic attack (TIA), and cerebral infarction without residual deficits

• Hyperlipidemia, unspecified

• Bariatric surgery status

• Hypothyroidism, unspecified

• Major depressive disorder, single episode, unspecified

• Anxiety disorder, unspecified

• Dissociative and conversion disorder, unspecified

• Type 2 diabetes mellitus with diabetic cataract

• Other chronic pain

• Adverse effect of antineoplastic and immunosuppressive drugs, initial encounter

• Unspecified place in unspecified non-institutional (private) residence as the place of occurrence of the external cause

• Adverse effect of loop [high-ceiling] diuretics, initial encounter

• Morbid (severe) obesity due to excess calories

• Body mass index [BMI] 34.0-34.9, adult

• Long term (current) use of insulin

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **9 days, 3 hours, 41 minutes** since last event*

Emergency Department Visit #6

Admission Time: November 25, 2147 at 07:39 PM

This is the patient's **6th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2147-11-26 01:30:00**, staying for a duration of **0 days 5 hours 51 minutes**.

Initial Assessment:

Chief Complaint: Fever, Neutropenia

Blood Pressure	161.0/68.0 mmHg
Heart Rate	57.0 bpm
Respiratory Rate	18.0 breaths/min
Oxygen Saturation	99.0%
Temperature	98.3°F
Pain Score	0
Acuity Level	2.0

Laboratory Tests Performed: November 25, 2147 at 08:20 PM

Total of **55** tests performed, with **18** abnormal result(s).

Hematology

Test	Value	Reference Range
Absolute Lymphocyte Count	**8.29K/uL**	1.2-3.7
Acanthocytes	N/A Blood	N/A
Anisocytosis	N/A Blood	N/A
Atypical Lymphocytes	0.0%	0.0-0.0
Bands	**12.0%**	0.0-5.0
Basophilic Stippling	N/A Blood	N/A
Basophils	1.0%	0.0-1.0

Elliptocytes	N/A Blood	N/A
Eosinophils	2.0%	1.0-7.0
Hematocrit	**23.7%**	40.0-51.0
Hemoglobin	**7.8g/dL**	13.7-17.5
Hypochromia	N/A Blood	N/A
Lymphocytes	22.0%	19.0-53.0
Macrocytes	N/A Blood	N/A
MCH	28.2pg	26.0-32.0
MCHC	32.9g/dL	32.0-37.0
MCV	86.0fL	82.0-98.0
Metamyelocytes	**2.0%**	0.0-0.0
Microcytes	N/A Blood	N/A
Monocytes	**3.0%**	5.0-13.0
Myelocytes	**1.0%**	0.0-0.0
Neutrophils	57.0%	34.0-71.0
Nucleated Red Cells	**2.0%**	0.0-0.0
Ovalocytes	N/A Blood	N/A
Platelet Count	**92.0K/uL**	150.0-400.0
Platelet Smear	N/A Blood	N/A
Poikilocytosis	N/A Blood	N/A
Polychromasia	N/A Blood	N/A
RDW	**20.5%**	10.5-15.5
Red Blood Cells	**2.77m/uL**	4.6-6.1
Schistocytes	N/A Blood	N/A
Teardrop Cells	N/A Blood	N/A
White Blood Cells	**37.7K/uL**	4.0-10.0
Absolute Basophil Count	**0.38K/uL**	0.01-0.08
Absolute Eosinophil Count	**0.75K/uL**	0.04-0.54

Absolute Monocyte Count	**1.13K/uL**	0.2-0.8
Absolute Neutrophil Count	**26.01K/uL**	1.6-6.1
RDW-SD	**61.8fL**	35.1-46.3
INR(PT)	1.0	0.9-1.1
PT	10.3sec	9.4-12.5
PTT	30.6sec	25.0-36.5

Chemistry

Test	Value	Reference Range
Light Green Top Hold	N/A Blood	N/A
Anion Gap	15.0mEq/L	8.0-20.0
Bicarbonate	25.0mEq/L	22.0-32.0
Chloride	104.0mEq/L	96.0-108.0
Creatinine	0.9mg/dL	0.5-1.2
Estimated GFR (MDRD equation)	N/A Blood	N/A
Glucose	**213.0mg/dL**	70.0-100.0
H	10.0 Blood	N/A
I	0.0 Blood	N/A
Potassium	3.5mEq/L	3.3-5.1
Sodium	140.0mEq/L	133.0-145.0
Urea Nitrogen	8.0mg/dL	6.0-20.0
L	54.0 Blood	N/A
Blue Top Hold	N/A Blood	N/A

Laboratory Tests Performed: November 25, 2147 at 08:37 PM

Total of **1** tests performed, with **0** abnormal result(s).

Blood Gas

Test	Value	Reference Range
Lactate	1.2mmol/L	0.5-2.0

Laboratory Tests Performed: November 25, 2147 at 08:40 PM

Total of **2** tests performed, with **0** abnormal result(s).

Chemistry

Test	Value	Reference Range
Influenza A by PCR	N/A Other Body Fluid	N/A
Influenza B by PCR	N/A Other Body Fluid	N/A

Medications Administered: November 25, 2147 at 08:45 PM

Total of **1** medication(s) administered:

• CefePIME 2g/100mL 100mL BAG

Previous Medications on Record: November 25, 2147 at 08:52 PM

33 medication(s) documented:

• acetaminophen [Mapap (acetaminophen)] - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• clopidogrel - Platelet Aggregation Inhibitors - Thienopyridine Agents

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• docusate sodium - Laxative - Surfactant

• fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives

• fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations

• ibuprofen - NSAID Analgesics (COX Non-Specific) - Propionic Acid Derivatives

• insulin glargine [Lantus] - Insulin Analogs - Long Acting

• levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Hypnotics - Melatonin - Single Agents

• metformin - Insulin Response Enhancers - Biguanides

• metoprolol tartrate - Beta Blockers Cardiac Selective

• ondansetron HCl - Antiemetic - Selective Serotonin 5-HT3 Antagonists

• pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)

• sennosides [senna] - Laxative - Stimulant

• trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)

• ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones

• ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Laboratory Tests Performed: November 25, 2147 at 09:50 PM

Total of **19** tests performed, with **0** abnormal result(s).

Hospital Admission #7

Admission Time: November 26, 2147 at 12:39 AM

This is the patient's **7th** hospital admission. The patient was admitted from **EMERGENCY ROOM** as an **OBSERVATION ADMIT** admission. The admitting provider was **P2151W**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 723

Description: VIRAL ILLNESS

Severity: 3.0

Mortality Risk: 2.0

HCFA DRG Code:

Code: 866

Description: VIRAL ILLNESS W/O MCC

Unit Admission - Hematology/Oncology

Admission Time: November 26, 2147 at 01:30 AM

The patient was admitted to **Hematology/Oncology** ward. The patient stayed in this unit until **2147-11-30 16:54:09**, for a total duration of **4 days 15 hours 24 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: November 26, 2147 at 03:00 AM

21 medication(s) prescribed:

- Heparin Flush (100 units/ml) 5 mL IV
- Metoprolol Tartrate 12.5 mg PO/NG 2.0x/day
- Heparin Flush (10 units/ml) 5 mL IV 1.0x/day
- Docusate Sodium 100 mg PO/NG 2.0x/day
- Glucose Gel 15 g PO
- Ondansetron 8 mg IV
- Dextrose 50% 12.5 gm IV
- Divalproex (EXTended Release) 250 mg PO 1.0x/day
- Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day
- Sucralfate 1 gm PO/NG
- Gabapentin 300 mg PO/NG 3.0x/day
- Rivaroxaban 10 mg PO/NG 1.0x/day
- Pantoprazole 40 mg PO 1.0x/day
- TraZODone 300 mg PO/NG 1.0x/day
- Prochlorperazine 10 mg PO
- Glucagon 1 mg IM
- Atorvastatin 80 mg PO/NG 1.0x/day
- Magnesium Oxide 400 mg PO/NG 2.0x/day
- Heparin 5000 UNIT SC 2.0x/day
- Insulin 0 UNIT SC
- Divalproex (EXTended Release) 500 mg PO 2.0x/day

Prescriptions Ordered: November 26, 2147 at 04:00 AM

4 medication(s) prescribed:

• Acyclovir 400 mg PO/NG 3.0x/day

• CloNIDine 0.1 mg PO 3.0x/day

• ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day

• OxyCODONE (Immediate Release) 5 mg PO/NG

Prescriptions Ordered: November 26, 2147 at 06:00 AM

2 medication(s) prescribed:

• Bag 1 BAG IV

• Sterile Water 200 mL IV

Prescriptions Ordered: November 26, 2147 at 08:00 AM

8 medication(s) prescribed:

• Levothyroxine Sodium 25 mcg PO/NG 1.0x/day

• Senna 8.6 mg PO/NG 1.0x/day

• Fenofibrate 145 mg PO 1.0x/day

• Clopidogrel 75 mg PO/NG 1.0x/day

• Furosemide 20 mg PO/NG 1.0x/day

• Aspirin 243 mg PO/NG 1.0x/day

• Losartan Potassium 50 mg PO/NG 1.0x/day

• FLUoxetine 20 mg PO/NG 1.0x/day

Prescriptions Ordered: November 26, 2147 at 09:00 AM

1 medication(s) prescribed:

• Potassium Chloride Replacement (Critical Care and Oncology) 40 mEq PO

Prescriptions Ordered: November 26, 2147 at 10:00 AM

3 medication(s) prescribed:

• Cepacol (Sore Throat Lozenge) 2 LOZ PO

• Guaifenesin-Dextromethorphan 5 mL PO/NG 4.0x/day

• Ondansetron 4 mg IV

Microbiology Tests Performed: November 26, 2147 at 11:45 AM

Total of **2** microbiology result(s):

Respiratory Viral Culture: Rapid Respiratory Viral Screen & Culture:

• PARAINFLUENZA VIRUS TYPE 3

Respiratory Viral Antigen Screen: Rapid Respiratory Viral Screen & Culture:

• Negative for Respiratory Viral Antigen. Specimen screened for: Adeno, Parainfluenza 1, 2, 3, Influenza A, B, and RSV by immunofluorescence. Refer to respiratory viral culture and/or Influenza PCR (results listed under "OTHER" tab) for further information.

Prescriptions Ordered: November 27, 2147 at 01:00 PM

2 medication(s) prescribed:

• LORazepam 0.5 mg PO/NG

• Prochlorperazine 10 mg IV

Prescriptions Ordered: November 27, 2147 at 07:00 PM

3 medication(s) prescribed:

• Clindamycin 450 mg PO/NG 3.0x/day

• Sodium Chloride 0.9% 1000 mL IV

• Polyethylene Glycol 17 g PO/NG 1.0x/day

Microbiology Tests Performed: November 28, 2147 at 04:11 AM

Total of **1** microbiology result(s):

Legionella Urinary Antigen: URINE:

• NEGATIVE FOR LEGIONELLA SEROGROUP 1 ANTIGEN. (Reference Range-Negative). Performed by Immunochromogenic assay. A negative result does not rule out infection due to other L. pneumophila serogroups or other Legionella species. Furthermore, in infected patients the excretion of antigen in urine may vary.

Prescriptions Ordered: November 28, 2147 at 05:00 AM

1 medication(s) prescribed:

• Polyethylene Glycol 17 g PO/NG

Prescriptions Ordered: November 28, 2147 at 01:00 PM

2 medication(s) prescribed:

• OLANZapine (Disintegrating Tablet) 5 mg PO 1.0x/day

• Sodium Chloride 0.9% 1000 mL IV

Prescriptions Ordered: November 30, 2147 at 09:00 AM

1 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

Discharge Summary

Discharge Time: November 30, 2147 at 04:54 PM

The patient was discharged from **Hematology/Oncology** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Other viral infections of unspecified site

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Type 2 diabetes mellitus with diabetic cataract

• Anemia due to antineoplastic chemotherapy

• Hypo-osmolality and hyponatremia

• Malignant neoplasm of left testis, unspecified whether descended or undescended

• Hyperlipidemia, unspecified

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Presence of coronary angioplasty implant and graft

• Personal history of transient ischemic attack (TIA), and cerebral infarction without residual deficits

• Essential (primary) hypertension

• Bariatric surgery status

• Hypothyroidism, unspecified

• Other chronic pain

• Major depressive disorder, single episode, unspecified

• Anxiety disorder, unspecified

• Unspecified glaucoma

• Long term (current) use of insulin

- Presence of cardiac pacemaker
- Palpitations
- Other specified soft tissue disorders
- Obesity, unspecified
- Body mass index [BMI] 34.0-34.9, adult

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **19 days, 2 hours, 29 minutes** since last event*

Emergency Department Visit #7

Admission Time: December 19, 2147 at 07:24 PM

This is the patient's **7th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2147-12-20 01:03:00**, staying for a duration of **0 days 5 hours 39 minutes**.

ED Disposition: HOME - Patient was discharged directly from Emergency Department without hospital admission.

Initial Assessment:

Chief Complaint: Toe pain

Blood Pressure	158.0/71.0 mmHg
Heart Rate	95.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	100.0%
Temperature	98.5°F
Pain Score	8
Acuity Level	3.0

Emergency Department Discharge Summary

Treatment: The patient received evaluation and treatment in the Emergency Department. Medical staff determined the patient was stable for discharge to **HOME**.

Follow-up Instructions: Patient advised to follow up with primary care physician or return to ED if symptoms worsen.

Previous Medications on Record: December 19, 2147 at 07:44 PM

36 medication(s) documented:

• acetaminophen [Mapap (acetaminophen)] - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

- albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting
- aspirin - Salicylate Analgesics
- aspirin - Platelet Aggregation Inhibitors - Salicylates
- atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)
- clopidogrel - Platelet Aggregation Inhibitors - Thienopyridine Agents
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- docusate sodium - Laxative - Surfactant
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- ibuprofen - NSAID Analgesics (COX Non-Specific) - Propionic Acid Derivatives
- insulin glargine [Lantus] - Insulin Analogs - Long Acting
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- melatonin - Hypnotics - Melatonin - Single Agents
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol tartrate - Beta Blockers Cardiac Selective
- ondansetron HCl - Antiemetic - Selective Serotonin 5-HT3 Antagonists
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- sennosides [senna] - Laxative - Stimulant
- trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics
- clonidine - Central Alpha-2 Receptor Agonists
- furosemide - Diuretic - Loop

• rivaroxaban - Direct Factor Xa Inhibitors

Prescriptions Ordered: December 19, 2147 at 08:00 PM

2 medication(s) prescribed:

• Heparin 5000 UNIT SC 2.0x/day

• Docusate Sodium 100 mg PO/NG 2.0x/day

Prescriptions Ordered: December 19, 2147 at 09:00 PM

1 medication(s) prescribed:

• LORazepam 1 mg PO/NG 1.0x/day

Prescriptions Ordered: December 19, 2147 at 10:00 PM

2 medication(s) prescribed:

• LORazepam 0.5 mg IV 1.0x/day

• Senna 17.2 mg PO/NG 1.0x/day

---

*Time gap of **142 days, 22 hours, 25 minutes** since last event*

Emergency Department Visit #8

Admission Time: May 10, 2148 at 08:25 PM

This is the patient's **8th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2148-05-11 01:22:00**, staying for a duration of **0 days 4 hours 57 minutes**.

Initial Assessment:

Chief Complaint: BRBPR

Blood Pressure	122.0/80.0 mmHg
Heart Rate	100.0 bpm
Respiratory Rate	22.0 breaths/min
Oxygen Saturation	98.0%
Temperature	97.4°F
Pain Score	0

Acuity Level	2.0

Previous Medications on Record: May 10, 2148 at 10:22 PM

37 medication(s) documented:

• acetaminophen [Mapap (acetaminophen)] - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• benzocaine-menthol - Mouth and Throat - Lozenges

• clopidogrel - Platelet Aggregation Inhibitors - Thienopyridine Agents

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• docusate sodium - Laxative - Surfactant

• fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives

• fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• insulin glargine [Lantus] - Insulin Analogs - Long Acting

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Hypnotics - Melatonin - Single Agents

• metoprolol tartrate - Beta Blockers Cardiac Selective

• pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)

• ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones

• ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

• clonidine HCl - Central Alpha-2 Receptor Agonists

• Senna Laxative - Laxative - Stimulant

• sucralfate - Peptic Ulcer - Gastric Lumen Adherent Cytoprotectives

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations

• trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)

• levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)

• metformin - Insulin Response Enhancers - Biguanides

• prochlorperazine maleate - Antipsychotic - Phenothiazines, Piperazine

• prochlorperazine maleate - Antiemetic - Phenothiazines

• rivaroxaban - Direct Factor Xa Inhibitors

Unit Admission - Hematology/Oncology Intermediate

Admission Time: May 11, 2148 at 03:02 PM

The patient was admitted to **Hematology/Oncology Intermediate** ward. The patient stayed in this unit until **2148-05-20 17:01:19**, for a total duration of **9 days 1 hours 58 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: May 11, 2148 at 06:00 PM

1 medication(s) prescribed:

• Fleet Enema (Mineral Oil) 1 Enema PR 1.0x/day

Prescriptions Ordered: May 11, 2148 at 07:00 PM

1 medication(s) prescribed:

• Morphine Sulfate 2 mg IV 1.0x/day

Prescriptions Ordered: May 11, 2148 at 08:00 PM

2 medication(s) prescribed:

• Atorvastatin 80 mg PO/NG 1.0x/day

• Divalproex (EXTended Release) 750 mg PO 1.0x/day

Prescriptions Ordered: May 11, 2148 at 11:00 PM

2 medication(s) prescribed:

• Dextrose 5% 1000 mL IV

• Bisacodyl 10 mg PR 1.0x/day

Procedure(s) Performed: May 12, 2148 at 12:00 AM

1 procedure(s) performed (Source: ICD):

• Inspection of Lower Intestinal Tract, Via Natural or Artificial Opening Endoscopic

Prescriptions Ordered: May 12, 2148 at 08:00 AM

2 medication(s) prescribed:

• D10W 1000 mL IV

• Metoprolol Tartrate 12.5 mg PO/NG 2.0x/day

Prescriptions Ordered: May 12, 2148 at 05:00 PM

1 medication(s) prescribed:

• Morphine Sulfate 2 mg IV 1.0x/day

Prescriptions Ordered: May 12, 2148 at 10:00 PM

1 medication(s) prescribed:

• Morphine Sulfate 2 mg IV

Prescriptions Ordered: May 13, 2148 at 03:00 AM

1 medication(s) prescribed:

• MoviPrep 1 L PO 1.0x/day

Prescriptions Ordered: May 13, 2148 at 08:00 AM

2 medication(s) prescribed:

• Losartan Potassium 50 mg PO/NG 1.0x/day

• Dextrose 5% 1000 mL IV

Prescriptions Ordered: May 13, 2148 at 10:00 AM

3 medication(s) prescribed:

• LORazepam 0.5 mg PO/NG

• OxyCODONE (Immediate Release) 2.5 mg PO/NG

• Readi-Cat 2 (Barium Sulfate 2% Suspension) 900 mL PO/NG 1.0x/day

Prescriptions Ordered: May 13, 2148 at 01:00 PM

1 medication(s) prescribed:

• Morphine Sulfate 2 mg IV

Prescriptions Ordered: May 13, 2148 at 07:00 PM

1 medication(s) prescribed:

• MoviPrep 1 L PO 2.0x/day

Prescriptions Ordered: May 14, 2148 at 08:00 AM

1 medication(s) prescribed:

• MoviPrep 1 L PO

Prescriptions Ordered: May 14, 2148 at 07:00 PM

1 medication(s) prescribed:

• MoviPrep 1 L PO 1.0x/day

Prescriptions Ordered: May 14, 2148 at 10:00 PM

2 medication(s) prescribed:

• Ondansetron 4 mg IV

• LORazepam 0.5 mg PO/NG

Prescriptions Ordered: May 15, 2148 at 10:00 AM

1 medication(s) prescribed:

• MoviPrep 500 mL PO 2.0x/day

Prescriptions Ordered: May 16, 2148 at 08:00 AM

1 medication(s) prescribed:

• Metoprolol Tartrate 12.5 mg PO/NG 2.0x/day

Prescriptions Ordered: May 16, 2148 at 01:00 PM

2 medication(s) prescribed:

• MoviPrep 1 L PO 2.0x/day

• Neutra-Phos 2 PKT PO/NG 1.0x/day

Prescriptions Ordered: May 16, 2148 at 08:00 PM

2 medication(s) prescribed:

• Sodium Chloride 1 gm PO 2.0x/day

• MoviPrep 1 L PO 1.0x/day

Prescriptions Ordered: May 17, 2148 at 01:00 AM

1 medication(s) prescribed:

• Magnesium Citrate 300 mL PO 1.0x/day

Prescriptions Ordered: May 17, 2148 at 09:00 AM

2 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

• MoviPrep 1 L PO 2.0x/day

Prescriptions Ordered: May 17, 2148 at 12:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: May 17, 2148 at 05:00 PM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5 mg PO/NG

Prescriptions Ordered: May 17, 2148 at 09:00 PM

1 medication(s) prescribed:

• MoviPrep 1 L PO 2.0x/day

Procedure(s) Performed: May 18, 2148 at 12:00 AM

1 procedure(s) performed (Source: ICD):

• Inspection of Lower Intestinal Tract, Via Natural or Artificial Opening Endoscopic

Prescriptions Ordered: May 18, 2148 at 06:00 AM

1 medication(s) prescribed:

• MoviPrep 1 L PO 2.0x/day

Prescriptions Ordered: May 18, 2148 at 08:00 AM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: May 18, 2148 at 09:00 AM

1 medication(s) prescribed:

• Magnesium Citrate 300 mL PO

Prescriptions Ordered: May 18, 2148 at 10:00 AM

1 medication(s) prescribed:

• HYDROcodone-Acetaminophen (5mg-325mg) 1-2 TAB PO

Prescriptions Ordered: May 18, 2148 at 12:00 PM

2 medication(s) prescribed:

• Insulin 12 UNIT SC 1.0x/day

• OxyCODONE (Immediate Release) 5 mg PO/NG 1.0x/day

Prescriptions Ordered: May 18, 2148 at 02:00 PM

1 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

Prescriptions Ordered: May 18, 2148 at 06:00 PM

3 medication(s) prescribed:

• LORazepam 1 mg PO/NG 1.0x/day

• Magnesium Citrate 300 mL PO 3.0x/day

• Sodium Chloride 0.9% 1000 mL IV

Prescriptions Ordered: May 19, 2148 at 12:00 AM

2 medication(s) prescribed:

• MoviPrep 1 L PO 3.0x/day

• Magnesium Citrate 300 mL PO 12.0x/day

Procedure(s) Performed: May 19, 2148 at 12:00 AM

2 procedure(s) performed (Source: ICD):

• Excision of Cecum, Via Natural or Artificial Opening Endoscopic, Diagnostic

• Excision of Descending Colon, Via Natural or Artificial Opening Endoscopic, Diagnostic

Prescriptions Ordered: May 19, 2148 at 08:00 AM

1 medication(s) prescribed:

• MoviPrep 1 L PO 1.0x/day

Prescriptions Ordered: May 19, 2148 at 11:00 AM

2 medication(s) prescribed:

• MoviPrep 1 L PO 2.0x/day

• Sodium Chloride 0.9% 1000 mL IV

Microbiology Tests Performed: May 19, 2148 at 11:52 AM

Total of **1** microbiology result(s):

Swab - R/O Yeast - IC: Infection Control Yeast:

• NO YEAST ISOLATED.

Discharge Summary

Discharge Time: May 20, 2148 at 05:01 PM

The patient was discharged from **Hematology/Oncology Intermediate** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Hemorrhage of anus and rectum

• Acute posthemorrhagic anemia

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Chronic diastolic (congestive) heart failure

• Type 2 diabetes mellitus with hypoglycemia without coma

• Persistent atrial fibrillation

• Hypo-osmolality and hyponatremia

• Type 2 diabetes mellitus with diabetic cataract

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Presence of cardiac pacemaker

• Long term (current) use of anticoagulants

• Other hemorrhoids

• Polyp of colon

• Bariatric surgery status

• Obstructive sleep apnea (adult) (pediatric)

• Hypothyroidism, unspecified

• Unspecified glaucoma

• Personal history of malignant neoplasm of testis

• Major depressive disorder, single episode, unspecified

• Anxiety disorder, unspecified

• Dorsalgia, unspecified

• Pain in unspecified shoulder

• Other chronic pain

• Abnormal coagulation profile

• Hypertensive chronic kidney disease with stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease

• Other specified diseases of intestine

• Obesity, unspecified

• Body mass index [BMI] 35.0-35.9, adult

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **34 days, 16 hours, 20 minutes** since last event*

Emergency Department Visit #9

Admission Time: June 24, 2148 at 09:22 AM

This is the patient's **9th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2148-06-24 16:12:00**, staying for a duration of **0 days 6 hours 50 minutes**.

Initial Assessment:

Chief Complaint: Chest pain

Blood Pressure	159.0/105.0 mmHg
Heart Rate	83.0 bpm
Respiratory Rate	20.0 breaths/min
Oxygen Saturation	98.0%
Temperature	98.3°F
Pain Score	9
Acuity Level	2.0

Medications Administered: June 24, 2148 at 10:38 AM

Total of **4** medication(s) administered:

• Morphine Sulfat 4mg/1mL 1mL VIAL

• Nitroglycerin SL 0.4mg BTL

• Metoclopramide 10mg/2mL 2mL VIAL

• Oxycodone-Acetaminophen 1TAB TAB

Previous Medications on Record: June 24, 2148 at 03:20 PM

34 medication(s) documented:

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

- atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)
- clopidogrel - Platelet Aggregation Inhibitors - Thienopyridine Agents
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- docusate sodium - Laxative - Surfactant
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- gabapentin - Anticonvulsant - GABA Analogs
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- ibrutinib - Antineoplastic - Protein-Tyrosine Kinase Inhibitors
- ibrutinib - Antineoplastic - Bruton's tyrosine kinase (BTK) inhibitor
- insulin glargine [Lantus] - Insulin Analogs - Long Acting
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol tartrate - Beta Blockers Cardiac Selective
- nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- sennosides [senna] - Laxative - Stimulant
- trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics
- Xarelto - Direct Factor Xa Inhibitors
- melatonin - Hypnotics - Melatonin - Single Agents
- Senna Laxative - Laxative - Stimulant

Unit Admission - Medicine/Cardiology

Admission Time: June 24, 2148 at 04:12 PM

The patient was admitted to **Medicine/Cardiology** ward. The patient stayed in this unit until **2148-06-28 13:54:41**, for a total duration of **3 days 21 hours 42 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: June 24, 2148 at 06:00 PM

29 medication(s) prescribed:

• Docusate Sodium 100 mg PO/NG

• Atorvastatin 80 mg PO/NG 1.0x/day

• Prochlorperazine 10 mg PO

• Sucralfate 1 gm PO/NG

• Aspirin 81 mg PO/NG 1.0x/day

• Furosemide 20 mg PO/NG 1.0x/day

- Dextrose 50% 12.5 gm IV
- Sodium Chloride 0.9% Flush 3-10 mL IV 3.0x/day
- Ramelteon 8 mg PO/NG
- Divalproex (EXTended Release) 500 mg PO 1.0x/day
- Senna 8.6 mg PO/NG
- TraZODone 300 mg PO/NG 1.0x/day
- Levothyroxine Sodium 25 mcg PO/NG 1.0x/day
- Metoprolol Tartrate 12.5 mg PO/NG 2.0x/day
- Fenofibrate 145 mg PO 1.0x/day
- Losartan Potassium 50 mg PO/NG 1.0x/day
- Gabapentin 300 mg PO/NG 3.0x/day
- Magnesium Oxide 400 mg PO/NG 2.0x/day
- Acetaminophen 500 mg PO/NG
- Divalproex (EXTended Release) 250 mg PO 1.0x/day
- Glucagon 1 mg IM
- Glucose Gel 15 g PO
- Multivitamins 1 TAB PO 1.0x/day
- CloNIDine 0.1 mg PO 3.0x/day
- HYDROcodone-Acetaminophen (5mg-325mg) 1 TAB PO
- Fluticasone Propionate NASAL 1 SPRY NU 2.0x/day
- FLUoxetine 20 mg PO/NG 1.0x/day
- ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day
- Pantoprazole 40 mg PO 1.0x/day

Prescriptions Ordered: June 24, 2148 at 07:00 PM

3 medication(s) prescribed:

- LORazepam 0.5 mg PO/NG 1.0x/day
- Heparin Flush (100 units/ml) 5 mL IV
- Lidocaine 5% Patch 3 PTCH TD 1.0x/day

Prescriptions Ordered: June 24, 2148 at 08:00 PM

2 medication(s) prescribed:

- Rivaroxaban 10 mg PO/NG 1.0x/day

• Acyclovir 400 mg PO/NG 3.0x/day

Prescriptions Ordered: June 25, 2148 at 08:00 AM

2 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

• Heparin Flush (10 units/ml) 5 mL IV 1.0x/day

Prescriptions Ordered: June 25, 2148 at 10:00 AM

1 medication(s) prescribed:

• Nitroglycerin SL 0.3 mg SL

Prescriptions Ordered: June 25, 2148 at 04:00 PM

1 medication(s) prescribed:

• PredniSONE 40 mg PO/NG 1.0x/day

Prescriptions Ordered: June 25, 2148 at 06:00 PM

1 medication(s) prescribed:

• Heparin Flush (10 units/ml) 10 mL IV

Prescriptions Ordered: June 25, 2148 at 08:00 PM

1 medication(s) prescribed:

• Colchicine 0.6 mg PO/NG 2.0x/day

Prescriptions Ordered: June 25, 2148 at 11:00 PM

1 medication(s) prescribed:

• Aspirin 81 mg PO/NG 1.0x/day

Prescriptions Ordered: June 26, 2148 at 08:00 AM

1 medication(s) prescribed:

• Aspirin 81 mg PO/NG 1.0x/day

Prescriptions Ordered: June 26, 2148 at 10:00 AM

1 medication(s) prescribed:

• TraZODone 200 mg PO/NG

Prescriptions Ordered: June 26, 2148 at 01:00 PM

5 medication(s) prescribed:

- Insulin 20 UNIT SC 1.0x/day
- Insulin 0 UNIT SC
- Sodium Chloride 0.9% 1000 mL IV
- 0.9% Sodium Chloride 1 BAG IV 1.0x/day
- Insulin (Regular) for Hyperkalemia 20 UNIT IV 1.0x/day

Prescriptions Ordered: June 26, 2148 at 02:00 PM

1 medication(s) prescribed:

- Insulin 20 UNIT SC 1.0x/day

Prescriptions Ordered: June 26, 2148 at 05:00 PM

4 medication(s) prescribed:

- 0.9% Sodium Chloride 1 BAG IV 1.0x/day
- Sodium Chloride 0.9% 1000 mL IV
- Insulin 10 UNIT SC 1.0x/day
- Rivaroxaban 10 mg PO/NG 1.0x/day

Prescriptions Ordered: June 26, 2148 at 06:00 PM

1 medication(s) prescribed:

- Polyethylene Glycol 17 g PO/NG

Prescriptions Ordered: June 27, 2148 at 08:00 AM

2 medication(s) prescribed:

- FLUoxetine 10 mg PO/NG 1.0x/day
- Colchicine 0.6 mg PO/NG 1.0x/day

Prescriptions Ordered: June 27, 2148 at 05:00 PM

1 medication(s) prescribed:

- Rivaroxaban 20 mg PO/NG 1.0x/day

Prescriptions Ordered: June 28, 2148 at 08:00 AM

1 medication(s) prescribed:

• PredniSONE 40 mg PO 1.0x/day

Discharge Summary

Discharge Time: June 28, 2148 at 01:54 PM

The patient was discharged from **Medicine/Cardiology** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Acute pericarditis, unspecified

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Acute kidney failure, unspecified

• Type 2 diabetes mellitus with diabetic polyneuropathy

• Paroxysmal atrial fibrillation

• Dehydration

• Hypo-osmolality and hyponatremia

• Obstructive sleep apnea (adult) (pediatric)

• Hypothyroidism, unspecified

• Other chronic pain

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Presence of coronary angioplasty implant and graft

• Long term (current) use of oral hypoglycemic drugs

• Essential (primary) hypertension

• Long term (current) use of anticoagulants

• Hyperlipidemia, unspecified

• Insomnia, unspecified

• Body mass index [BMI] 36.0-36.9, adult

• Bariatric surgery status

• Anxiety disorder, unspecified

• Major depressive disorder, single episode, unspecified

• Obesity, unspecified

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **1 day, 7 hours, 11 minutes** since last event*

Emergency Department Visit #10

Admission Time: June 29, 2148 at 09:06 PM

This is the patient's **10th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2148-06-30 02:27:00**, staying for a duration of **0 days 5 hours 21 minutes**.

Initial Assessment:

Patient Transfer Status: Transfer - Patient was transferred from another healthcare facility (e.g., Extended Care, Rehabilitation Center, or other Hospital)

Chief Complaint: Chest pain

Blood Pressure	120.0/71.0 mmHg
Heart Rate	120.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	96.0%
Temperature	98.9°F
Pain Score	8
Acuity Level	2.0

Laboratory Tests Performed: June 29, 2148 at 09:25 PM

Total of **54** tests performed, with **20** abnormal result(s).

Total of **2** tests performed, with **2** abnormal result(s).

Blood Gas

Test	Value	Reference Range
Lactate	**2.2mmol/L**	0.5-2.0

Potassium, Whole Blood	**5.4mEq/L**	3.3-5.1

Previous Medications on Record: June 29, 2148 at 09:37 PM

22 medication(s) documented:

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• Mapap (acetaminophen) - Analgesic or Antipyretic Non-Opioid

• metoprolol tartrate - Beta Blockers Cardiac Selective

• multivitamin - Multivitamins

• Aspir-81 - Salicylate Analgesics

• Aspir-81 - Platelet Aggregation Inhibitors - Salicylates

• colchicine - Gout Acute Therapy - Antimitotics

• levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations

• Xarelto - Direct Factor Xa Inhibitors

• divalproex - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex - Bipolar Therapy Agents - Anticonvulsant Type

• divalproex - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex - Migraine Therapy - Carboxylic Acid Derivatives

• divalproex - Bipolar Therapy Agents - Anticonvulsant Type

Medications Administered: June 29, 2148 at 10:09 PM

Total of **12** medication(s) administered:

• HYDROmorphone (D 1mg/1mL 1mL SYR

• Naloxone 0.04mg/1mL 10mL KIT

• Acetamin 1000mg/100mL 100mL Vial

• Vancomyci 1000mg/200mL 200mL BAG

• Vancomyci 1000mg/200mL 200mL BAG

• Divalproex (DELayed Re 250mg TAB

• Acyclovir 400mg TAB

• Rivaroxaban 20mg TAB

Hospital Admission #10

Admission Time: June 30, 2148 at 01:09 AM

This is the patient's **10th** hospital admission. The patient was admitted from **TRANSFER FROM HOSPITAL** as an **URGENT** admission. The admitting provider was **P5069B**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 139

Description: OTHER PNEUMONIA

Severity: 4.0

Mortality Risk: 4.0

HCFA DRG Code:

Code: 193

Description: SIMPLE PNEUMONIA & PLEURISY W MCC

ICU Admission - Medical/Surgical Intensive Care Unit (MICU/SICU)

ICU Admission Time: June 30, 2148 at 02:27 AM

The patient was admitted to the **Intensive Care Unit (Medical/Surgical Intensive Care Unit (MICU/SICU))**. The patient remained in ICU until **2148-07-01 20:58:50**, for a total ICU stay of **1 days 18 hours 31 minutes** (Length of Stay: **1.7721064814814815 days**). During this critical care period, intensive monitoring and interventions were performed including procedures, laboratory tests, and microbiology events.

Laboratory Tests Performed: June 30, 2148 at 02:55 AM

Total of **52** tests performed, with **24** abnormal result(s).

Prescriptions Ordered: July 06, 2148 at 05:00 AM

1 medication(s) prescribed:

• Potassium Chloride 10 mEq PO 1.0x/day

Prescriptions Ordered: July 06, 2148 at 08:00 AM

1 medication(s) prescribed:

• PredniSONE 10 mg PO 1.0x/day

Prescriptions Ordered: July 06, 2148 at 12:00 PM

1 medication(s) prescribed:

• Potassium Chloride 40 mEq PO 1.0x/day

Prescriptions Ordered: July 06, 2148 at 01:00 PM

1 medication(s) prescribed:

• Furosemide 40 mg IV 1.0x/day

Prescriptions Ordered: July 06, 2148 at 06:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Procedure(s) Performed: July 07, 2148 at 12:00 AM

1 procedure(s) performed (Source: ICD):

• Drainage of Pericardial Cavity with Drainage Device, Percutaneous Approach

Prescriptions Ordered: July 07, 2148 at 08:00 AM

4 medication(s) prescribed:

• Insulin 80 UNIT SC 1.0x/day

• Lisinopril 5 mg PO/NG 1.0x/day

• PredniSONE 10 mg PO/NG 1.0x/day

• Metoprolol Succinate XL 100 mg PO 1.0x/day

Prescriptions Ordered: July 07, 2148 at 11:00 AM

1 medication(s) prescribed:

• CloNIDine 0.1 mg PO 2.0x/day

Prescriptions Ordered: July 07, 2148 at 12:00 PM

1 medication(s) prescribed:

• Diltiazem 10 mg IV BOLUS 1.0x/day

Prescriptions Ordered: July 07, 2148 at 01:00 PM

3 medication(s) prescribed:

• Diltiazem 10 mg IV BOLUS 1.0x/day

• Ondansetron 4 mg IV 1.0x/day

• Sodium Chloride 0.9% 1000 mL IV

Microbiology Tests Performed: July 07, 2148 at 03:05 PM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

ICU Admission - Neuro Surgical Intensive Care Unit (Neuro SICU)

ICU Admission Time: July 07, 2148 at 03:48 PM

The patient was admitted to the **Intensive Care Unit (Neuro Surgical Intensive Care Unit (Neuro SICU))**. The patient remained in ICU until **2148-07-07 21:44:48**, for a total ICU stay of **0 days 5 hours 56 minutes** (Length of Stay: **3.109513888888889 days**). During this critical care period, intensive monitoring and interventions were performed including procedures, laboratory tests, and microbiology events.

Prescriptions Ordered: July 07, 2148 at 05:00 PM

2 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 3-10 mL IV 3.0x/day

• 0.9% Sodium Chloride 250 mL IV DRIP

Laboratory Tests Performed: July 07, 2148 at 06:25 PM

Total of **54** tests performed, with **27** abnormal result(s).

Hematology

3 medication(s) prescribed:

• Ondansetron 4 mg IV 1.0x/day

• Sodium Chloride 0.9% 1000 mL IV

• Insulin 14 UNIT IV 1.0x/day

Unit Admission - Coronary Care Unit (CCU)

Admission Time: July 07, 2148 at 09:44 PM

The patient was admitted to **Coronary Care Unit (CCU)** ward. The patient stayed in this unit until **2148-07-10 18:25:51**, for a total duration of **2 days 20 hours 41 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: July 07, 2148 at 10:00 PM

2 medication(s) prescribed:

• Lidocaine Jelly 2% (Glydo) 1 Appl TP

• Iso-Osmotic Dextrose 200 mL IV 3.0x/day

Microbiology Tests Performed: July 07, 2148 at 10:00 PM

Total of **1** microbiology result(s):

Fluid Culture in Bottles: FLUID RECEIVED IN BLOOD CULTURE BOTTLES:

• NO GROWTH.

Microbiology Tests Performed: July 07, 2148 at 10:00 PM

Total of **3** microbiology result(s):

GRAM STAIN: FLUID,OTHER:

• 2+ (1-5 per 1000X FIELD): POLYMORPHONUCLEAR LEUKOCYTES. NO MICROORGANISMS SEEN.

FLUID CULTURE: FLUID,OTHER:

• NO GROWTH.

ANAEROBIC CULTURE: FLUID,OTHER:

• NO GROWTH.

Prescriptions Ordered: July 07, 2148 at 11:00 PM

1 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 2-4 mL IV

Microbiology Tests Performed: July 08, 2148 at 02:24 AM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Prescriptions Ordered: July 08, 2148 at 08:00 AM

2 medication(s) prescribed:

• PredniSONE 10 mg PO/NG 1.0x/day

• Insulin 75 UNIT SC 1.0x/day

Prescriptions Ordered: July 08, 2148 at 04:00 PM

2 medication(s) prescribed:

• Gabapentin 300 mg PO/NG 3.0x/day

• Acyclovir 400 mg PO/NG 3.0x/day

Prescriptions Ordered: July 08, 2148 at 05:00 PM

3 medication(s) prescribed:

• Rivaroxaban 20 mg PO/NG 1.0x/day

• Insulin 5 UNIT SC 1.0x/day

• Insulin 0 UNIT SC

Microbiology Tests Performed: July 08, 2148 at 05:26 PM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Prescriptions Ordered: July 08, 2148 at 08:00 PM

1 medication(s) prescribed:

• Iso-Osmotic Dextrose 100 mL IV 3.0x/day

Prescriptions Ordered: July 09, 2148 at 01:00 PM

1 medication(s) prescribed:

• Metoprolol Tartrate 6.25 mg PO/NG 4.0x/day

Prescriptions Ordered: July 09, 2148 at 02:00 PM

1 medication(s) prescribed:

• Neutra-Phos 1 PKT PO/NG 3.0x/day

Prescriptions Ordered: July 09, 2148 at 03:00 PM

1 medication(s) prescribed:

• Lactulose 30 mL PO/NG 12.0x/day

Prescriptions Ordered: July 09, 2148 at 10:00 PM

1 medication(s) prescribed:

• Lactulose 30 mL PO/NG

Prescriptions Ordered: July 10, 2148 at 01:00 AM

2 medication(s) prescribed:

• Metoprolol Tartrate 25 mg PO/NG 4.0x/day

• Metoprolol Tartrate 12.5 mg PO/NG 4.0x/day

Prescriptions Ordered: July 10, 2148 at 08:00 AM

3 medication(s) prescribed:

• Insulin 75 UNIT SC 1.0x/day

• Insulin 75 UNIT SC 1.0x/day

• PredniSONE 10 mg PO/NG 1.0x/day

Prescriptions Ordered: July 10, 2148 at 01:00 PM

1 medication(s) prescribed:

• Metoprolol Tartrate 25 mg PO/NG 4.0x/day

Unit Admission - Medicine/Cardiology

Admission Time: July 10, 2148 at 06:25 PM

The patient was admitted to **Medicine/Cardiology** ward. The patient stayed in this unit until **2148-07-13 19:35:49**, for a total duration of **3 days 1 hours 9 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: July 10, 2148 at 07:00 PM

1 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 3-10 mL IV 3.0x/day

Prescriptions Ordered: July 10, 2148 at 08:00 PM

1 medication(s) prescribed:

• Heparin 5000 UNIT SC 2.0x/day

Prescriptions Ordered: July 10, 2148 at 10:00 PM

1 medication(s) prescribed:

• Insulin 3 UNIT SC 1.0x/day

Prescriptions Ordered: July 11, 2148 at 08:00 AM

1 medication(s) prescribed:

• Furosemide 20 mg PO/NG 1.0x/day

Prescriptions Ordered: July 11, 2148 at 11:00 PM

1 medication(s) prescribed:

• Metoprolol Tartrate 12.5 mg PO/NG 4.0x/day

Prescriptions Ordered: July 12, 2148 at 08:00 AM

2 medication(s) prescribed:

• Aspirin 81 mg PO/NG 1.0x/day

• Insulin 75 UNIT SC 1.0x/day

Prescriptions Ordered: July 12, 2148 at 11:00 AM

1 medication(s) prescribed:

• Metoprolol Tartrate 25 mg PO/NG 4.0x/day

Prescriptions Ordered: July 13, 2148 at 08:00 AM

4 medication(s) prescribed:

• PredniSONE 10 mg PO/NG 1.0x/day

• Furosemide 20 mg PO/NG

• Losartan Potassium 25 mg PO/NG 1.0x/day

• Metoprolol Succinate XL 100 mg PO 1.0x/day

Prescriptions Ordered: July 13, 2148 at 09:00 AM

1 medication(s) prescribed:

• Lidocaine 5% Patch 2 PTCH TD 1.0x/day

Prescriptions Ordered: July 13, 2148 at 03:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: July 13, 2148 at 05:00 PM

1 medication(s) prescribed:

• Rivaroxaban 20 mg PO/NG 1.0x/day

Discharge Summary

Discharge Time: July 13, 2148 at 07:35 PM

The patient was discharged from **Medicine/Cardiology** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Pneumonia, unspecified organism

• Cardiogenic shock

• Cardiac tamponade

• Acute on chronic diastolic (congestive) heart failure

• Acute kidney failure, unspecified

• Paroxysmal atrial fibrillation

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Unspecified atrial flutter

• Hypo-osmolality and hyponatremia

• Pericardial effusion (noninflammatory)

• Type 2 diabetes mellitus with hypoglycemia without coma

• Type 2 diabetes mellitus with diabetic polyneuropathy

• Obstructive sleep apnea (adult) (pediatric)

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Presence of coronary angioplasty implant and graft

• Schizoaffective disorder, unspecified

- Presence of cardiac pacemaker
- Personal history of malignant neoplasm of testis
- Personal history of transient ischemic attack (TIA), and cerebral infarction without residual deficits
- Bariatric surgery status
- Hyperlipidemia, unspecified
- Hypothyroidism, unspecified
- Nonspecific elevation of levels of transaminase and lactic acid dehydrogenase [LDH]
- Chondrocostal junction syndrome [Tietze]

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **4 days, 1 hour** since last event*

Emergency Department Visit #11

Admission Time: July 17, 2148 at 08:36 PM

This is the patient's **11th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2148-07-18 04:46:00**, staying for a duration of **0 days 8 hours 10 minutes**.

Initial Assessment:

Chief Complaint: Chest pain, Nausea

Blood Pressure	105.0/70.0 mmHg
Heart Rate	98.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	96.0%
Temperature	97.7°F
Pain Score	10
Acuity Level	2.0

Laboratory Tests Performed: July 17, 2148 at 11:03 PM

Total of **48** tests performed, with **14** abnormal result(s).

Hematology

Test	Value	Reference Range
INR(PT)	1.0	0.9-1.1

Medications Administered: July 18, 2148 at 12:26 AM

Total of **4** medication(s) administered:

• Morphine Sulfat 4mg/1mL 1mL VIAL

• Acetaminophen 500mg TAB

• Ondansetron 4mg/2mL 2mL VIAL

• Ondansetron 4mg/2mL 2mL VIAL

Previous Medications on Record: July 18, 2148 at 12:28 AM

33 medication(s) documented:

• acetaminophen [Mapap (acetaminophen)] - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• clopidogrel - Platelet Aggregation Inhibitors - Thienopyridine Agents

- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- docusate sodium - Laxative - Surfactant
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- ibuprofen - NSAID Analgesics (COX Non-Specific) - Propionic Acid Derivatives
- insulin glargine [Lantus] - Insulin Analogs - Long Acting
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- melatonin - Hypnotics - Melatonin - Single Agents
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol tartrate - Beta Blockers Cardiac Selective
- nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- sennosides [senna] - Laxative - Stimulant
- trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Hospital Admission #11

Admission Time: July 18, 2148 at 02:31 AM

This is the patient's **11th** hospital admission. The patient was admitted from **PHYSICIAN REFERRAL** as an **DIRECT EMER.** admission. The admitting provider was **P04DS4**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 207

Description: OTHER CIRCULATORY SYSTEM DIAGNOSES

Severity: 2.0

Mortality Risk: 2.0

HCFA DRG Code:

Code: 315

Description: OTHER CIRCULATORY SYSTEM DIAGNOSES W CC

Unit Admission - Cardiology Surgery Intermediate

Admission Time: July 18, 2148 at 04:46 AM

The patient was admitted to **Cardiology Surgery Intermediate** ward. The patient stayed in this unit until **2148-07-19 19:11:24**, for a total duration of **1 days 14 hours 25 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: July 18, 2148 at 07:00 AM

25 medication(s) prescribed:

• Aspirin 81 mg PO/NG 1.0x/day

• Sodium Chloride 0.9% Flush 3-10 mL IV 3.0x/day

• Acyclovir 400 mg PO/NG 3.0x/day

• Sucralfate 1 gm PO/NG

• Multivitamins 1 TAB PO 1.0x/day

• Levothyroxine Sodium 25 mcg PO/NG 1.0x/day

• FLUoxetine 20 mg PO/NG 1.0x/day

• Dextrose 50% 12.5 gm IV

• Senna 8.6 mg PO/NG 2.0x/day

• OxyCODONE (Immediate Release) 5 mg PO/NG

- Fluticasone Propionate NASAL 1 SPRY NU
- Colchicine 0.6 mg PO/NG 2.0x/day
- Insulin 75 UNIT SC 1.0x/day
- Gabapentin 300 mg PO/NG 3.0x/day
- Glucose Gel 15 g PO
- ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day
- Metoprolol Tartrate 37.5 mg PO/NG 4.0x/day
- Acetaminophen 325-650 mg PO/NG
- Docusate Sodium 100 mg PO/NG 2.0x/day
- Lidocaine 5% Patch 3 PTCH TD 1.0x/day
- TraZODone 200 mg PO/NG
- Furosemide 20 mg PO/NG
- Glucagon 1 mg IM
- Divalproex (EXTended Release) 500 mg PO 1.0x/day
- Morphine Sulfate 2 mg IV 1.0x/day

Prescriptions Ordered: July 18, 2148 at 08:00 AM

3 medication(s) prescribed:

- Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day
- Heparin Flush (10 units/ml) 5 mL IV 1.0x/day
- Heparin Flush (100 units/ml) 5 mL IV

Prescriptions Ordered: July 18, 2148 at 11:00 AM

1 medication(s) prescribed:

- Ondansetron 4 mg PO/NG 1.0x/day

Prescriptions Ordered: July 18, 2148 at 05:00 PM

1 medication(s) prescribed:

- Rivaroxaban 20 mg PO/NG 1.0x/day

Prescriptions Ordered: July 18, 2148 at 06:00 PM

2 medication(s) prescribed:

- Bisacodyl 10 mg PR

• Ondansetron 4 mg PO/NG 1.0x/day

Prescriptions Ordered: July 18, 2148 at 08:00 PM

4 medication(s) prescribed:

• Acetaminophen 500 mg PO/NG 4.0x/day

• Insulin 0 UNIT SC

• OxyCODONE (Immediate Release) 5 mg PO/NG

• Divalproex (EXTended Release) 750 mg PO 1.0x/day

Prescriptions Ordered: July 19, 2148 at 04:00 AM

1 medication(s) prescribed:

• Ondansetron 4 mg IV 1.0x/day

Prescriptions Ordered: July 19, 2148 at 08:00 AM

2 medication(s) prescribed:

• PredniSONE 40 mg PO/NG 1.0x/day

• Aspirin 325 mg PO/NG 1.0x/day

Prescriptions Ordered: July 19, 2148 at 12:00 PM

1 medication(s) prescribed:

• Furosemide 20 mg IV 1.0x/day

Prescriptions Ordered: July 19, 2148 at 05:00 PM

1 medication(s) prescribed:

• Insulin 75 UNIT SC 1.0x/day

Prescriptions Ordered: July 19, 2148 at 06:00 PM

1 medication(s) prescribed:

• Ondansetron 4 mg IV 1.0x/day

Unit Admission - Medicine/Cardiology

Admission Time: July 19, 2148 at 07:11 PM

The patient was admitted to **Medicine/Cardiology** ward. The patient stayed in this unit until **2148-07-20 17:47:12**, for a total duration of **0 days 22 hours 35 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: July 19, 2148 at 11:00 PM

1 medication(s) prescribed:

• Ondansetron 4 mg IV 1.0x/day

Prescriptions Ordered: July 20, 2148 at 08:00 AM

1 medication(s) prescribed:

• Pantoprazole 40 mg PO 1.0x/day

Discharge Summary

Discharge Time: July 20, 2148 at 05:47 PM

The patient was discharged from **Medicine/Cardiology** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Disease of pericardium, unspecified

• Hypo-osmolality and hyponatremia

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Hypertensive heart disease with heart failure

• Chronic diastolic (congestive) heart failure

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Presence of coronary angioplasty implant and graft

• Long term (current) use of anticoagulants

• Hyperlipidemia, unspecified

• Hypothyroidism, unspecified

• Type 2 diabetes mellitus without complications

• Long term (current) use of insulin

• Obstructive sleep apnea (adult) (pediatric)

• Schizoaffective disorder, unspecified

- Hyperkalemia
- Type 2 diabetes mellitus with hyperglycemia
- Paroxysmal atrial fibrillation
- Obesity, unspecified
- Body mass index [BMI] 37.0-37.9, adult

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **24 days, 22 hours, 44 minutes** since last event*

Emergency Department Visit #12

Admission Time: August 14, 2148 at 04:32 PM

This is the patient's **12th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2148-08-15 00:27:00**, staying for a duration of **0 days 7 hours 55 minutes**.

Initial Assessment:

Chief Complaint: Cough, Dyspnea

Blood Pressure	142.0/73.0 mmHg
Heart Rate	106.0 bpm
Respiratory Rate	20.0 breaths/min
Oxygen Saturation	99.0%
Temperature	100.2°F
Pain Score	5
Acuity Level	2.0

Previous Medications on Record: August 14, 2148 at 07:25 PM

34 medication(s) documented:

• acetaminophen [Mapap (acetaminophen)] - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• clopidogrel - Platelet Aggregation Inhibitors - Thienopyridine Agents

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

- docusate sodium - Laxative - Surfactant
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- ibuprofen - NSAID Analgesics (COX Non-Specific) - Propionic Acid Derivatives
- insulin glargine [Lantus] - Insulin Analogs - Long Acting
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- melatonin - Hypnotics - Melatonin - Single Agents
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol tartrate - Beta Blockers Cardiac Selective
- nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- prednisone - Glucocorticoids
- sennosides [senna] - Laxative - Stimulant
- trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Medications Administered: August 14, 2148 at 08:11 PM

Total of **1** medication(s) administered:

- Acetaminophen 325mg TAB

---

*Time gap of **2 hours, 46 minutes** since last event*

Hospital Admission #12

Admission Time: August 14, 2148 at 10:57 PM

This is the patient's **12th** hospital admission. The patient was admitted from **PHYSICIAN REFERRAL** as an **OBSERVATION ADMIT** admission. The admitting provider was **P41R7S**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 144

Description: RESPIRATORY SIGNS, SYMPTOMS AND MISCELLANEOUS DIAGNOSES

Severity: 3.0

Mortality Risk: 2.0

HCFA DRG Code:

Code: 202

Description: BRONCHITIS & ASTHMA W CC/MCC

Unit Admission - Hematology/Oncology Intermediate

Admission Time: August 15, 2148 at 12:27 AM

The patient was admitted to **Hematology/Oncology Intermediate** ward. The patient stayed in this unit until **2148-08-16 08:57:26**, for a total duration of **1 days 8 hours 30 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: August 15, 2148 at 01:00 AM

1 medication(s) prescribed:

• Heparin Flush (100 units/ml) 5 mL IV

Prescriptions Ordered: August 15, 2148 at 02:00 AM

13 medication(s) prescribed:

• Cepacol (Sore Throat Lozenge) 2 LOZ PO

• Glucose Gel 15 g PO

• Ramelteon 8 mg PO/NG

• Acyclovir 400 mg PO/NG 3.0x/day

• Pantoprazole 40 mg PO 1.0x/day

- Albuterol 0.083% Neb Soln 1 NEB IH
- Lidocaine 5% Patch 3 PTCH TD
- HYDROcodone-Acetaminophen (5mg-325mg) 1 TAB PO
- GuaiFENesin 5-10 mL PO/NG
- Acetaminophen 650 mg PO/NG
- Benzonatate 100 mg PO
- Glucagon 1 mg IM
- Dextrose 50% 12.5 gm IV

Prescriptions Ordered: August 15, 2148 at 03:00 AM

1 medication(s) prescribed:

- Insulin 4 UNIT SC 1.0x/day

Prescriptions Ordered: August 15, 2148 at 07:00 AM

1 medication(s) prescribed:

- OxyCODONE (Immediate Release) 5 mg PO/NG 1.0x/day

Prescriptions Ordered: August 15, 2148 at 08:00 AM

17 medication(s) prescribed:

- Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day
- Losartan Potassium 50 mg PO/NG 1.0x/day
- Divalproex (EXTended Release) 500 mg PO 1.0x/day
- Levothyroxine Sodium 50 mcg PO/NG 1.0x/day
- Aspirin 325 mg PO/NG 1.0x/day
- PredniSONE 10 mg PO/NG 1.0x/day
- FLUoxetine 20 mg PO/NG 1.0x/day
- Furosemide 20 mg PO/NG
- Colchicine 0.6 mg PO/NG 2.0x/day
- Heparin Flush (10 units/ml) 5 mL IV 1.0x/day
- Senna 17.2 mg PO/NG 2.0x/day
- Furosemide 20 mg PO/NG 1.0x/day
- ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day
- Insulin 75 UNIT SC 1.0x/day

• Gabapentin 300 mg PO/NG 3.0x/day

• Metoprolol Succinate XL 150 mg PO 1.0x/day

• Multivitamins 1 TAB PO 1.0x/day

Prescriptions Ordered: August 15, 2148 at 09:00 AM

3 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5 mg PO/NG

• Acetaminophen 650 mg PO/NG

• Insulin 0 UNIT SC

Microbiology Tests Performed: August 15, 2148 at 09:30 AM

Total of **2** microbiology result(s):

Respiratory Viral Culture: Rapid Respiratory Viral Screen & Culture:

• No respiratory viruses isolated. Culture screened for Adenovirus, Influenza A & B, Parainfluenza type 1,2 & 3, and Respiratory Syncytial Virus. Detection of viruses other than those listed above will only be performed on specific request. Please call Virology at [redacted] within 1 week if additional testing is needed.

Respiratory Viral Antigen Screen: Rapid Respiratory Viral Screen & Culture:

• Negative for Respiratory Viral Antigen. Specimen screened for: Adeno, Parainfluenza 1, 2, 3, Influenza A, B, and RSV by immunofluorescence. Refer to respiratory viral culture and/or Influenza PCR (results listed under "OTHER" tab) for further information.

Prescriptions Ordered: August 15, 2148 at 03:00 PM

1 medication(s) prescribed:

• Acetaminophen 650 mg PO/NG

Prescriptions Ordered: August 15, 2148 at 04:00 PM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5 mg PO/NG

Prescriptions Ordered: August 15, 2148 at 05:00 PM

4 medication(s) prescribed:

• Diltiazem 15 mg PO/NG 1.0x/day

• Ipratropium Bromide Neb 1 NEB IH

• Rivaroxaban 20 mg PO/NG 1.0x/day

• Sodium Chloride 0.9% 1000 mL IV

Prescriptions Ordered: August 15, 2148 at 06:00 PM

1 medication(s) prescribed:

• Diltiazem 5 mg IV BOLUS 1.0x/day

Prescriptions Ordered: August 15, 2148 at 07:00 PM

3 medication(s) prescribed:

• Ondansetron 4 mg IV

• Diltiazem 5 mg IV BOLUS 1.0x/day

• Metoprolol Tartrate 12.5 mg PO/NG 1.0x/day

Prescriptions Ordered: August 15, 2148 at 08:00 PM

2 medication(s) prescribed:

• Docusate Sodium 100 mg PO/NG 2.0x/day

• Divalproex (EXTended Release) 750 mg PO 1.0x/day

Microbiology Tests Performed: August 15, 2148 at 11:37 PM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Prescriptions Ordered: August 16, 2148 at 04:00 AM

1 medication(s) prescribed:

• Metoprolol Tartrate 37.5 mg PO/NG 4.0x/day

Prescriptions Ordered: August 16, 2148 at 06:00 AM

1 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

Prescriptions Ordered: August 16, 2148 at 08:00 AM

6 medication(s) prescribed:

• Aspirin 81 mg PO/NG 1.0x/day

• PredniSONE 5 mg PO/NG 1.0x/day

• Losartan Potassium 25 mg PO/NG 1.0x/day

• Levofloxacin 750 mg PO/NG 1.0x/day

• PredniSONE 5 mg PO/NG 1.0x/day

• Levothyroxine Sodium 25 mcg PO/NG 1.0x/day

ICU Admission - Medical/Surgical Intensive Care Unit (MICU/SICU)

ICU Admission Time: August 16, 2148 at 08:57 AM

The patient was admitted to the **Intensive Care Unit (Medical/Surgical Intensive Care Unit (MICU/SICU))**. The patient remained in ICU until **2148-08-17 14:45:17**, for a total ICU stay of **1 days 5 hours 47 minutes** (Length of Stay: **1.2415625 days**). During this critical care period, intensive monitoring and interventions were performed including procedures, laboratory tests, and microbiology events.

Prescriptions Ordered: August 16, 2148 at 09:00 AM

1 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

Procedure(s) Performed: August 16, 2148 at 09:31 AM

1 procedure(s) performed (Source: ICU_EVENTS):

• Procedures (Task) - EKG with value 1.0

Prescriptions Ordered: August 16, 2148 at 10:00 AM

4 medication(s) prescribed:

• Bag 1 BAG IV 1.0x/day

• Metoprolol Tartrate 25 mg PO/NG 4.0x/day

• Lactated Ringers 1000 mL IV

• Bag 1 BAG IV 1.0x/day

Prescriptions Ordered: August 16, 2148 at 11:00 AM

1 medication(s) prescribed:

• 5% Dextrose 250 mL IV

Microbiology Tests Performed: August 16, 2148 at 11:20 AM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Prescriptions Ordered: August 16, 2148 at 12:00 PM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5 mg PO/NG

Laboratory Tests Performed: August 16, 2148 at 12:35 PM

Total of **15** tests performed, with **11** abnormal result(s).

Discharge Time: August 18, 2148 at 09:12 PM

The patient was discharged from **Hematology/Oncology Intermediate** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

- Acute bronchitis due to other specified organisms
- Chronic lymphocytic leukemia of B-cell type not having achieved remission
- Acute kidney failure, unspecified
- Syndrome of inappropriate secretion of antidiuretic hormone
- Paroxysmal atrial fibrillation
- Schizoaffective disorder, unspecified
- Hypertensive heart disease with heart failure
- Chronic diastolic (congestive) heart failure
- Unspecified atrial flutter
- Unspecified atrial fibrillation
- Other urogenital candidiasis
- Hypovolemia
- Type 2 diabetes mellitus without complications
- Anemia in neoplastic disease
- Hypothyroidism, unspecified
- Atherosclerotic heart disease of native coronary artery without angina pectoris
- Presence of coronary angioplasty implant and graft
- Other sequelae of cerebral infarction
- Hyperlipidemia, unspecified
- Obstructive sleep apnea (adult) (pediatric)
- Long term (current) use of anticoagulants
- Other chronic pain
- Long term (current) use of insulin
- Retention of urine, unspecified
- Obesity, unspecified
- Body mass index [BMI] 36.0-36.9, adult

Discharge Status:

Activity Status	N/A
Level of Consciousness	N/A
Mental Status	N/A
Code Status	N/A

*Time gap of **105 days, 1 hour, 47 minutes** since last event*

Emergency Department Visit #13

Admission Time: December 01, 2148 at 11:00 PM

This is the patient's **13th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2148-12-02 09:29:00**, staying for a duration of **0 days 10 hours 29 minutes**.

ED Disposition: HOME - Patient was discharged directly from Emergency Department without hospital admission.

Initial Assessment:

Chief Complaint: Epigastric pain

Blood Pressure	158.0/72.0 mmHg
Heart Rate	80.0 bpm
Respiratory Rate	18.0 breaths/min
Oxygen Saturation	98.0%
Temperature	99.4°F
Pain Score	10
Acuity Level	2.0

Emergency Department Discharge Summary

Treatment: The patient received evaluation and treatment in the Emergency Department. Medical staff determined the patient was stable for discharge to **HOME**.

Follow-up Instructions: Patient advised to follow up with primary care physician or return to ED if symptoms worsen.

Previous Medications on Record: December 02, 2148 at 01:49 AM

34 medication(s) documented:

• acetaminophen [Mapap (acetaminophen)] - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

- albuterol sulfate - Asthma/COPD Therapy - Beta 2-Adrenergic Agents, Inhaled, Short Acting
- aspirin - Salicylate Analgesics
- aspirin - Platelet Aggregation Inhibitors - Salicylates
- atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)
- clopidogrel - Platelet Aggregation Inhibitors - Thienopyridine Agents
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives
- divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type
- docusate sodium - Laxative - Surfactant
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- ibuprofen - NSAID Analgesics (COX Non-Specific) - Propionic Acid Derivatives
- insulin glargine [Lantus] - Insulin Analogs - Long Acting
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- melatonin - Hypnotics - Melatonin - Single Agents
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol tartrate - Beta Blockers Cardiac Selective
- nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- prednisone - Glucocorticoids
- sennosides [senna] - Laxative - Stimulant
- trazodone - Antidepressant - Serotonin-2 Antagonist-Reuptake Inhibitors (SARIs)
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Medications Administered: December 02, 2148 at 02:53 AM

Total of **10** medication(s) administered:

• Morphine Sulfat 4mg/1mL 1mL VIAL

• HYDROmorphone (i 1mg/1mL 1mL SYR

• HYDROmorphone (i 1mg/1mL 1mL SYR

• Donnatol (Elixir) 5mL Oral Sy

• Lidocaine Viscous 2% 15mL UDCUP

• Aluminum-Magnesium Hy 30mL UDCUP

• Aluminum-Magnesium Hy 30mL UDCUP

• Ranitidine 150mg TAB

• Sucralfate 1gm TAB

• Heparin Flush (10 Units/ 5mL SYR

---

*Time gap of **92 days, 17 hours, 31 minutes** since last event*

Emergency Department Visit #14

Admission Time: March 04, 2149 at 08:24 PM

This is the patient's **14th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2149-03-05 14:59:00**, staying for a duration of **0 days 18 hours 35 minutes**.

ED Disposition: HOME - Patient was discharged directly from Emergency Department without hospital admission.

Initial Assessment:

Chief Complaint: Confusion, s/p Fall

Blood Pressure	160.0/80.0 mmHg
Heart Rate	104.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	98.0%
Temperature	98.2°F
Pain Score	5

Acuity Level	2.0

Emergency Department Discharge Summary

Treatment: The patient received evaluation and treatment in the Emergency Department. Medical staff determined the patient was stable for discharge to **HOME**.

Follow-up Instructions: Patient advised to follow up with primary care physician or return to ED if symptoms worsen.

Medications Administered: March 04, 2149 at 09:14 PM

Total of **27** medication(s) administered:

• HYDROmorphone (D 1mg/1mL 1mL SYR

• Ondansetron 4mg/2mL 2mL VIAL

• Ondansetron 4mg/2mL 2mL VIAL

• Divalproex (DELayed Re 250mg TAB

• ZIPRASidone 20mg CAP

• Hydrocodone-Acetamin(5m 1TAB TAB

• Docusate Sodium 100mg CAP

• Heparin Flush 100 Unit / 5mL SYR

• Heparin Flush 100 Unit / 5mL SYR

• Lidocaine 5% Patch 1PTCH PTCH

• Acetaminophen 325mg TAB

• Heparin Flush 100 Unit / 5mL SYR

• Heparin Flush 100 Unit / 5mL SYR

• Hydrocodone-Acetamin(5m 1TAB TAB

• ZIPRASidone 20mg CAP

• Levothyroxine Sodium 25mcg TAB

• Metoprolol Succinate 25mg XL TAB

• Docusate Sodium 100mg CAP

• Furosemide 20mg TAB

• Divalproex (DELayed Re 250mg TAB

• Gabapentin 300mg CAP

• Aspirin 81mg TAB

• FLUoxetine 20mg CAP

• Losartan Potassium 25mg TAB

• Docusate Sodium 100mg CAP

• HYDROmorphone (D 1mg/1mL 1mL SYR

• Heparin Flush (10 Units/ 5mL SYR

Previous Medications on Record: March 04, 2149 at 09:24 PM

37 medication(s) documented:

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• alcohol swabs - Antiseptic - Alcohols

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supply, FDB Superset

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supply, FDB Superset

• blood sugar diagnostic [OneTouch Verio] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [OneTouch Verio] - Medical Supply, FDB Superset

• cholecalciferol (vitamin D3) - Vitamins - D Derivatives

• cyanocobalamin (vitamin B-12) - Vitamins - B-12, Cyanocobalamin and derivatives

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• docusate sodium - Laxative - Surfactant

• fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations

• levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Hypnotics - Melatonin - Single Agents

• metoprolol succinate - Beta Blockers Cardiac Selective

• nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations

• pen needle, diabetic [Pen Needle] - Medical Supplies and DME - Insulin Needles-Syringes and Admin Supplies

• pen needle, diabetic [Pen Needle] - Medical Supply, FDB Superset

• sennosides [senna] - Laxative - Stimulant

• ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones

• ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

• Lantus Solostar U-100 Insulin - Insulin Analogs - Long Acting

• magnesium oxide - Minerals and Electrolytes - Magnesium

• Xarelto - Direct Factor Xa Inhibitors

---

*Time gap of **1 hour, 50 minutes** since last event*

Hospital Admission #14

Admission Time: March 04, 2149 at 11:14 PM

This is the patient's **14th** hospital admission. The patient was admitted from **WALK-IN/SELF REFERRAL** as an **EU OBSERVATION** admission. The admitting provider was **P35NE4**. Insurance coverage: **Medicare**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

Unit Admission - Emergency Department Observation

Admission Time: March 05, 2149 at 02:59 PM

The patient was admitted to **Emergency Department Observation** ward. The patient stayed in this unit until **2149-03-05 15:11:38**, for a total duration of **0 days 0 hours 12 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Discharge Summary

Discharge Time: March 05, 2149 at 03:11 PM

The patient was discharged from **Emergency Department Observation** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

- Disorientation, unspecified
- Headache
- Sacrococcygeal disorders, not elsewhere classified
- Pain in left shoulder
- Type 2 diabetes mellitus without complications
- Chronic lymphocytic leukemia of B-cell type not having achieved remission
- Hypertensive heart disease with heart failure
- Heart failure, unspecified
- Personal history of transient ischemic attack (TIA), and cerebral infarction without residual deficits
- Presence of cardiac pacemaker
- Hyperlipidemia, unspecified
- Unspecified atrial fibrillation
- Long term (current) use of antithrombotics/antiplatelets
- Long term (current) use of insulin

*Time gap of **8 days, 6 hours, 8 minutes** since last event*

Emergency Department Visit #15

Admission Time: March 13, 2149 at 09:20 PM

This is the patient's **15th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2149-03-14 02:23:00**, staying for a duration of **0 days 5 hours 3 minutes**.

ED Disposition: LEFT WITHOUT BEING SEEN - Patient was discharged directly from Emergency Department without hospital admission.

Initial Assessment:

Chief Complaint: R Leg pain, R Leg swelling

Blood Pressure	136.0/65.0 mmHg
Heart Rate	76.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	97.0%
Temperature	98.2°F
Pain Score	8
Acuity Level	3.0

Emergency Department Discharge Summary

Treatment: The patient received evaluation and treatment in the Emergency Department. Medical staff determined the patient was stable for discharge to **LEFT WITHOUT BEING SEEN**.

Follow-up Instructions: Patient advised to follow up with primary care physician or return to ED if symptoms worsen.

*Time gap of **97 days, 19 hours, 41 minutes** since last event*

Emergency Department Visit #16

Admission Time: June 19, 2149 at 05:01 PM

This is the patient's **16th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2149-06-20 13:48:00**, staying for a duration of **0 days 20 hours 47 minutes**.

ED Disposition: HOME - Patient was discharged directly from Emergency Department without hospital admission.

Initial Assessment:

Chief Complaint: Hyperglycemia, Overdose

Blood Pressure	140.0/71.0 mmHg
Heart Rate	72.0 bpm
Respiratory Rate	16.0 breaths/min
Oxygen Saturation	98.0%
Temperature	98.2°F
Pain Score	0
Acuity Level	2.0

Emergency Department Discharge Summary

Treatment: The patient received evaluation and treatment in the Emergency Department. Medical staff determined the patient was stable for discharge to **HOME**.

Follow-up Instructions: Patient advised to follow up with primary care physician or return to ED if symptoms worsen.

Previous Medications on Record: June 19, 2149 at 05:30 PM

39 medication(s) documented:

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• alcohol swabs - Antiseptic - Alcohols

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supply, FDB Superset

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supply, FDB Superset

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supply, FDB Superset

• blood sugar diagnostic [OneTouch Verio] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [OneTouch Verio] - Medical Supply, FDB Superset

• camphor-menthol [Anti-Itch (menthol/camphor)] - Dermatological - Antipruritics Combinations

• carbamide peroxide [Ear Wax Removal Kit] - Otic (Ear) - Wax Removers-Softeners

• cholecalciferol (vitamin D3) - Vitamins - D Derivatives

• cyanocobalamin (vitamin B-12) - Vitamins - B-12, Cyanocobalamin and derivatives

• docusate sodium - Laxative - Surfactant

• fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations

• hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations

• hydroxyzine HCl - Antianxiety Agent - Antihistamine Type

• insulin glargine [Lantus Solostar U-100 Insulin] - Insulin Analogs - Long Acting

• levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Hypnotics - Melatonin - Single Agents

• metformin - Insulin Response Enhancers - Biguanides

• metoprolol succinate - Beta Blockers Cardiac Selective

• nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations

• pen needle, diabetic [Pen Needle] - Medical Supplies and DME - Insulin Needles-Syringes and Admin Supplies

• pen needle, diabetic [Pen Needle] - Medical Supply, FDB Superset

• sennosides [senna] - Laxative - Stimulant

• triamcinolone acetonide - Dermatological - Glucocorticoid

• ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones

• ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Medications Administered: June 19, 2149 at 06:22 PM

Total of **21** medication(s) administered:

• OxyCODONE (Immediate Rel 5mg TAB

• OxyCODONE (Immediate Rel 5mg TAB

• Ketorolac 30mg/1mL 1mL VIAL

• Acetaminophen 500mg TAB

• Dextrose 50% 25gm/50mL 50mL SYR

• Acetaminophen 500mg TAB

• Ketorolac 30mg/1mL 1mL VIAL

• Acyclovir 400mg TAB

• Furosemide 20mg TAB

• Docusate Sodium 100mg CAP

• Levothyroxine Sodium 25mcg TAB

• Metoprolol Succinate 25mg XL TAB

• Gabapentin 300mg CAP

• Senna 8.6mg TAB

• ZIPRASidone 20mg CAP

• FLUoxetine 20mg CAP

• Losartan Potassium 25mg TAB

• Heparin Flush (10 Units/ 5mL SYR

• Heparin Flush 100 Unit / 5mL SYR

• Heparin Flush 100 Unit / 5mL SYR

• Heparin Flush (10 Units/ 5mL SYR

---

*Time gap of **4 hours, 32 minutes** since last event*

Hospital Admission #15

Admission Time: June 19, 2149 at 10:54 PM

This is the patient's **15th** hospital admission. The patient was admitted from **PHYSICIAN REFERRAL** as an **EU OBSERVATION** admission. The admitting provider was **P73TFC**. Insurance coverage: **Medicaid**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

Unit Admission - Emergency Department Observation

Admission Time: June 20, 2149 at 01:48 PM

The patient was admitted to **Emergency Department Observation** ward. The patient stayed in this unit until **2149-06-20 13:57:34**, for a total duration of **0 days 0 hours 9 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Discharge Summary

Discharge Time: June 20, 2149 at 01:57 PM

The patient was discharged from **Emergency Department Observation** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

- Poisoning by insulin and oral hypoglycemic [antidiabetic] drugs, accidental (unintentional), initial encounter
- Unspecified place or not applicable
- Type 2 diabetes mellitus with hyperglycemia
- Chronic lymphocytic leukemia of B-cell type in remission
- Long term (current) use of insulin
- Essential (primary) hypertension
- Primary osteoarthritis, unspecified shoulder
- Hypothyroidism, unspecified
- Major depressive disorder, single episode, severe with psychotic features
- Presence of cardiac pacemaker
- Long term (current) use of antithrombotics/antiplatelets
- Gout, unspecified
- Obstructive sleep apnea (adult) (pediatric)

- Morbid (severe) obesity due to excess calories
- Paroxysmal atrial fibrillation

*Time gap of **88 days, 19 hours, 10 minutes** since last event*

Emergency Department Visit #17

Admission Time: September 17, 2149 at 09:08 AM

This is the patient's **17th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2149-09-17 23:55:00**, staying for a duration of **0 days 14 hours 47 minutes**.

Initial Assessment:

Chief Complaint: Weakness

Blood Pressure	122.0/60.0 mmHg
Heart Rate	73.0 bpm
Respiratory Rate	20.0 breaths/min
Oxygen Saturation	99.0%
Temperature	98.2°F
Pain Score	0
Acuity Level	3.0

Previous Medications on Record: September 17, 2149 at 10:23 AM

41 medication(s) documented:

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• alcohol swabs - Antiseptic - Alcohols

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supply, FDB Superset

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supply, FDB Superset

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supplies and DME - Blood Glucose Tests

- blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supply, FDB Superset
- blood sugar diagnostic [OneTouch Verio] - Medical Supplies and DME - Blood Glucose Tests
- blood sugar diagnostic [OneTouch Verio] - Medical Supply, FDB Superset
- camphor-menthol [Anti-Itch (menthol/camphor)] - Dermatological - Antipruritics Combinations
- carbamide peroxide [Ear Wax Removal Kit] - Otic (Ear) - Wax Removers-Softeners
- cholecalciferol (vitamin D3) - Vitamins - D Derivatives
- cyanocobalamin (vitamin B-12) - Vitamins - B-12, Cyanocobalamin and derivatives
- docusate sodium - Laxative - Surfactant
- epinephrine - Cardiovascular Sympathomimetic - Anaphylaxis Therapy Single Agents
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone Combinations
- hydrocodone-acetaminophen - Analgesic Opioid Hydrocodone and Non-Salicylate Combinations
- hydroxyzine HCl - Antianxiety Agent - Antihistamine Type
- insulin asp prt-insulin aspart [Novolog Mix 70-30FlexPen U-100] - Insulin Analogs - Fixed Combinations
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- melatonin - Hypnotics - Melatonin - Single Agents
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol succinate - Beta Blockers Cardiac Selective
- nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations

*Time gap of **12 hours, 13 minutes** since last event*

Hospital Admission #16

Admission Time: September 17, 2149 at 10:54 PM

This is the patient's **16th** hospital admission. The patient was admitted from **WALK-IN/SELF REFERRAL** as an **EU OBSERVATION** admission. The admitting provider was **P64LUN**. Insurance coverage: **Medicaid**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

Unit Admission - Medicine

Admission Time: September 17, 2149 at 11:55 PM

The patient was admitted to **Medicine** ward. The patient stayed in this unit until **2149-09-18 11:21:11**, for a total duration of **0 days 11 hours 26 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: September 18, 2149 at 03:00 AM

19 medication(s) prescribed:

- Heparin Flush (100 units/ml) 5 mL IV
- Metoprolol Succinate XL 100 mg PO 1.0x/day
- Senna 8.6 mg PO/NG
- Levothyroxine Sodium 75 mcg PO/NG 1.0x/day
- Rivaroxaban 20 mg PO/NG 1.0x/day
- Dextrose 50% 12.5 gm IV
- Aspirin 81 mg PO/NG 1.0x/day
- Cyanocobalamin 1000 mcg PO/NG 1.0x/day
- Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day
- Glucagon 1 mg IM
- ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day
- Acyclovir 400 mg PO/NG 3.0x/day
- Docusate Sodium 100 mg PO/NG 2.0x/day
- Vitamin D 1500 UNIT PO/NG 1.0x/day
- MetFORMIN XR (Glucophage XR) 1000 mg PO 1.0x/day
- Losartan Potassium 25 mg PO/NG 1.0x/day
- Heparin Flush (10 units/ml) 5 mL IV 1.0x/day
- Glucose Gel 15 g PO
- HYDROcodone-Acetaminophen (5mg-325mg) 1 TAB PO

Prescriptions Ordered: September 18, 2149 at 08:00 AM

1 medication(s) prescribed:

- Insulin 135 UNIT SC 1.0x/day

Prescriptions Ordered: September 18, 2149 at 10:00 AM

2 medication(s) prescribed:

- Potassium Chloride 40 mEq PO 1.0x/day
- Bag 2 BAG IV 1.0x/day

Discharge Summary

Discharge Time: September 18, 2149 at 11:21 AM

The patient was discharged from **Medicine** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

- Generalized hyperhidrosis
- Other symptoms and signs concerning food and fluid intake
- Epigastric pain
- Abnormal levels of other serum enzymes
- Personal history of other diseases of the digestive system
- Chronic lymphocytic leukemia of B-cell type not having achieved remission
- Type 2 diabetes mellitus with hyperglycemia
- Type 2 diabetes mellitus with diabetic polyneuropathy
- Long term (current) use of insulin
- Hypothyroidism, unspecified
- Personal history of malignant neoplasm of testis
- Essential (primary) hypertension
- Hyperlipidemia, unspecified
- Obstructive sleep apnea (adult) (pediatric)
- Major depressive disorder, single episode, severe with psychotic features
- Anxiety disorder, unspecified
- Presence of cardiac pacemaker
- Personal history of transient ischemic attack (TIA), and cerebral infarction without residual deficits
- Long term (current) use of antithrombotics/antiplatelets
- Morbid (severe) obesity due to excess calories
- Body mass index [BMI] 35.0-35.9, adult

*Time gap of **1 day, 4 hours, 58 minutes** since last event*

Emergency Department Visit #18

Admission Time: September 19, 2149 at 04:20 PM

This is the patient's **18th** Emergency Department visit. The patient arrived via **UNKNOWN**. The patient departed at **2149-09-19 18:34:00**, staying for a duration of **0 days 2 hours 14 minutes**.

ED Disposition: LEFT WITHOUT BEING SEEN - Patient was discharged directly from Emergency Department without hospital admission.

Initial Assessment:

Chief Complaint: Abd pain, Back pain

Blood Pressure	151.0/75.0 mmHg
Heart Rate	78.0 bpm
Respiratory Rate	19.0 breaths/min
Oxygen Saturation	100.0%
Temperature	98.8°F
Pain Score	9
Acuity Level	3.0

Emergency Department Discharge Summary

Treatment: The patient received evaluation and treatment in the Emergency Department. Medical staff determined the patient was stable for discharge to **LEFT WITHOUT BEING SEEN**.

Follow-up Instructions: Patient advised to follow up with primary care physician or return to ED if symptoms worsen.

*Time gap of **137 days, 22 hours, 30 minutes** since last event*

Emergency Department Visit #19

Admission Time: February 04, 2150 at 02:50 PM

This is the patient's **19th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2150-02-04 20:13:49**, staying for a duration of **0 days 5 hours 23 minutes**.

Initial Assessment:

Chief Complaint: Dizziness, Diplopia, L sided weakness and numbness in face, arm, leg

Pain Score	UA
Acuity Level	2.0

Medications Administered: February 04, 2150 at 03:05 PM

Total of **7** medication(s) administered:

• Alteplase

• Dextrose 50%

• Dextrose 50%

• Hydrocodone-Acetamin(5mg-325mg)

• Hydrocodone-Acetamin(5mg-325mg)

• Alteplase

• Hydrocodone-Acetamin(5mg-325mg)

Previous Medications on Record: February 04, 2150 at 03:33 PM

42 medication(s) documented:

• acetaminophen - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• alcohol swabs - Antiseptic - Alcohols

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supply, FDB Superset

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supply, FDB Superset

- blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supplies and DME - Blood Glucose Tests
- blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supply, FDB Superset
- blood sugar diagnostic [OneTouch Verio] - Medical Supplies and DME - Blood Glucose Tests
- blood sugar diagnostic [OneTouch Verio] - Medical Supply, FDB Superset
- camphor-menthol [Anti-Itch (menthol/camphor)] - Dermatological - Antipruritics Combinations
- carbamide peroxide [Ear Wax Removal Kit] - Otic (Ear) - Wax Removers-Softeners
- cholecalciferol (vitamin D3) - Vitamins - D Derivatives
- cyanocobalamin (vitamin B-12) - Vitamins - B-12, Cyanocobalamin and derivatives
- docusate sodium - Laxative - Surfactant
- epinephrine - Cardiovascular Sympathomimetic - Anaphylaxis Therapy Single Agents
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydroxyzine HCl - Antianxiety Agent - Antihistamine Type
- insulin asp prt-insulin aspart [Novolog Mix 70-30FlexPen U-100] - Insulin Analogs - Fixed Combinations
- levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- melatonin - Alternative Therapy - Pineal Hormone Agents
- melatonin - Hypnotics - Melatonin - Single Agents
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol succinate - Beta Blockers Cardiac Selective
- nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- pen needle, diabetic [Pen Needle] - Medical Supplies and DME - Insulin Needles-Syringes and Admin Supplies
- pen needle, diabetic [Pen Needle] - Medical Supply, FDB Superset
- sennosides [senna] - Laxative - Stimulant
- sucralfate - Peptic Ulcer - Gastric Lumen Adherent Cytoprotectives
- triamcinolone acetonide - Dermatological - Glucocorticoid
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

*Time gap of **4 hours, 39 minutes** since last event*

Hospital Admission #17

Admission Time: February 04, 2150 at 08:12 PM

This is the patient's **17th** hospital admission. The patient was admitted from **PHYSICIAN REFERRAL** as an **OBSERVATION ADMIT** admission. The admitting provider was **P85EE4**. Insurance coverage: **Medicaid**. Chief complaint: **L sided weakness and numbness in face, arm, leg**. The primary service provided was **MEDICINE**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 756

Description: ACUTE ANXIETY AND DELIRIUM STATES

Severity: 3.0

Mortality Risk: 2.0

HCFA DRG Code:

Code: 880

Description: ACUTE ADJUSTMENT REACTION & PSYCHOSOCIAL DYSFUNCTION

Patient Past History:

Past Medical History: PAST ONCOLOGIC HISTORY: CLL (17p-) and Stage IIIA Mixed germ cell tumor of the testis - Lymphocytosis incidentally found during a psychiatric hospitalization. - CT scan showed a slightly enlarged spleen at 14.5 cm and no adenopathy. - He met with Dr. in at . WBC was 15.0 with 49.6% lymphocytes, Hgb 11.9, and platelets 260,000. Flow cytometry was consistent with CLL, and B-cell gene rearrangement confirmed clonality. CLL FISH panel showed a p53 mutation. He was asymptomatic at the time of diagnosis and followed with Dr. . - WBC gradually uptrended to 22.7 in , 37.3 in , 51.3 in , and 50.4 on . Hgb has decreased slightly to 10.9 and Hct 34.4 with platelets 234,000 on the labs. - Hematology care transitioned to Dr. after Dr. . He also started having nightly sweats. - CT Chest without lymphadenopathy or other notable findings. - Initial Hematology evaluation for second opinion. WBC 50.7, Hgb 10.5, Hct 33.2, Plt 226. Peripheral blood flow cytometry and cytogenetics confirmed CLL with TP53 deletion. - CT Abdomen/Pelvis without lymphadenopathy or other notable findings. - Started ibrutinib 420 mg daily. - Ibrutinib held for vitreous bleed - Ibrutinib restarted - Per OSH records, underwent scrotal U/S showing heterogeneous left testicle, prominent rete testis on right. - Presented to his outpatient hematologist, Dr. a painful swollen left testicle (swelling over ~8 months, worsening pain). This had been evaluated on with an ultrasound that did not demonstrate torsion but

did show heterogeneous morphology of the left testicle. HCG was positive. Referred to Dr. . - Underwent left radical orchiectomy. Pathology revealed 3.9 cm malignant mixed germ cell tumor of the testis, 95% embryonal carcinoma, 2% teratoma, 2% yolk sac tumor, 1% choriocarcinoma, invading hilar statin vaginalis, with lymphatic vascular invasion and metastatic tumor nodules in the spermatic cord. pT2NxS1 (although no post-orch levels, beta hCG 64 on , up from 21 on AFP 3, LDH normal). - CT torso showing new 8 mm nodule in the left lower lobe, and comparison with CT . Left para-aortic lymphadenopathy up to 2.8 cm and a 3.5 cm fluid collection in the left inguinal region/scrotum, felt to be likely postsurgical. - C1D1 EP - C2D1 EP (delayed 1 week after nasal infection - Admitted for weakness, fall - Admitted for parainfluenza pneumonia, symptomatic anemia, palpitations, developed nausea/vomiting in hospital - C3D1 EP (delayed 1 week, added palonosetron) - C4D1 EP - CT torso with significant decrease in size of the previously seen left para-aortic lymph node which now measures 6 mm, previously 28 mm. Otherwise no LAD. - Restarted ibrutinib for recurrent CLL (night sweats, lymphocytosis), Sick sinus syndrome s/p PPM Revo DDD, MRI-compatible, , CAD s/p DES to mid-LAD (), Stroke (with recovering motor function, though still with some left thigh sensory decrease), Type II DM (on insulin), Hypertension, Hyperlipidemia, Morbid Obesity status post gastric bypass surgery , OSA (not on CPAP), Pancreatitis secondary to alcohol (), Cholecystectomy, Hypothyroidism, Osteoarthritis, Bilateral shoulder surgery, chronic pain right shoulder, Major depression with psychotic features, Anxiety, Conversion Disorder, Benign Paroxysmal Positional Vertigo, Glaucoma

Family History: No known history of malignancies.

Social History: N/A

History of Present Illness:

Mr. is a man with CLL on Venclexta, hx testicular cancer, diabetes, hypertension, hyperlipidemia, obesity, right subcortical stroke in with residual left leg weakness (ambulates with a cane), remote BPV, sick sinus syndrome status post pacemaker, depression with psychotic features, presenting with vertigo, near falls, vision changes. He describes near-constant vertigo, worse with position changes, and several near syncopal events, starting morning . Symptoms initially improved that evening, but when he woke up on felt significantly worse. He had no associated nausea or vomiting, but was taking reduced p.o. (water only minimal food) due to concern that he would become nauseous and be at risk for falling while going to the bathroom. On , he called the on-call physician for his insurance, and was advised to go to the ED to be evaluated; however, he did not, because he had just put in a freestyle monitor and was worried that they would take it out if he needed a scan (he paid for this out of pocket). He did however call his wife, from whom he is separated, and went to stay with her. Due to continuing symptoms on , he went to urgent care. His vitals were unremarkable, and his exam was notable for almost falling off of his chair with extraocular movement check. His finger-nose-finger was notable for past pointing bilaterally, and he had binocular double vision. He was sent to the ED by ambulance for further work-up. He reports that While getting into the ambulance from , he developed left arm and leg weakness and numbness. On arrival to the emergency room a rapid response was called due to concern for stroke. He had hypoglycemia to 50. A an amp of dextrose, after his blood sugar improved to 126 and left arm weakness and numbness improved, however, his leg still is "paralyzed". CT head was negative for an acute bleed; CTA head and neck had no thrombus. Upon arrival to the floor, the patient confirms the above history. He additionally describes some dyspnea on exertion that has been long-standing and which he attributes to his wife's smoke. A complete REVIEW OF SYSTEMS was negative except for as noted in the HPI. Specifically, he denies lightheadedness, headache, chest pain, palpitations, abdominal pain, constipation, dysuria, rash, joint pain. Of note, in and he had an external work-up for left arm weakness concerning for possible TIAs, unrevealing for an embolic disorders.

Admission Vital Signs:

General Appearance	Obese man
Blood Pressure	136/65 mmHg
Heart Rate	69 bpm
Respiratory Rate	20 breaths/min
Temperature	98.2°F
Oxygen Saturation	99% on room air

Admission Laboratory Results:

• WBC: 8.9

• Glucose: 50

• Lactate: 1.6

Admission Medications:

Total of **28** medications on admission:

• EPINEPHrine (EpiPEN) 0.3 mg IM ONCE MR1

• Acetaminophen 500 mg PO Q8H:PRN Pain - Mild/Fever

• Losartan Potassium 50 mg PO DAILY

• Magnesium Oxide 400 mg PO BID

• Gabapentin 600 mg PO BID

• Colchicine 0.6 mg PO DAILY

• Venetoclax 400 mg PO DAILY

• Lidocaine 5% Patch 3 PTCH TD QAM

• HydrOXYzine 10 mg PO Q6H:PRN anxiety

• ZIPRASidone Hydrochloride 40 mg PO BID

• Metoprolol Succinate XL 150 mg PO DAILY

• Docusate Sodium 100 mg PO BID

• Senna 8.6 mg PO BID:PRN Constipation - First Line

• Triamcinolone Acetonide 0.1% Cream 1 Appl TP DAILY

• Rivaroxaban 20 mg PO DAILY

- Carbamide Peroxide 6.5% DROP BOTH EARS DAILY
- Fenofibrate 54 mg PO DAILY
- Atorvastatin 40 mg PO QPM
- Furosemide 20 mg PO DAILY
- Acyclovir 400 mg PO Q8H
- melatonin 6 mg oral qhs
- Nystatin-Triamcinolone Cream 1 Appl TP BID
- Sucralfate 1 gm PO BID
- Pantoprazole 40 mg PO Q24H
- Aspirin 325 mg PO DAILY
- Levothyroxine Sodium 75 mcg PO DAILY
- 100 Units Breakfast 100 Units Lunch 100 Units Dinner
- Topiramate (Topamax) 50 mg PO DAILY

Unit Admission - Medicine

Admission Time: February 04, 2150 at 08:13 PM

The patient was admitted to **Medicine** ward. Service provided: **MED**. The patient stayed in this unit until **2150-02-04 21:24:55**, for a total duration of **0 days 1 hours 11 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Unit Admission - Hematology/Oncology Intermediate

Admission Time: February 04, 2150 at 09:24 PM

The patient was admitted to **Hematology/Oncology Intermediate** ward. The patient stayed in this unit until **2150-02-08 14:14:21**, for a total duration of **3 days 16 hours 49 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: February 05, 2150 at 12:00 AM

17 medication(s) prescribed:

- Fenofibrate 48 mg PO 1.0x/day
- Lidocaine 5% Patch 3 PTCH TD 1.0x/day
- Acyclovir 400 mg PO/NG 3.0x/day
- Vitamin D 1500 UNIT PO/NG 1.0x/day

- Acetaminophen 325-650 mg PO/NG
- Triamcinolone Acetonide 0.1% Cream 1 Appl TP 1.0x/day
- Pantoprazole 40 mg PO 1.0x/day
- Gabapentin 300 mg PO/NG 2.0x/day
- Senna 8.6 mg PO/NG
- Cyanocobalamin 1000 mcg PO/NG 1.0x/day
- Levothyroxine Sodium 75 mcg PO/NG 1.0x/day
- Sucralfate 1 gm PO/NG 2.0x/day
- Atorvastatin 40 mg PO/NG 1.0x/day
- Metoprolol Tartrate 37.5 mg PO/NG 4.0x/day
- Sodium Chloride 0.9% Flush 3-10 mL IV 3.0x/day
- Rivaroxaban 20 mg PO/NG 1.0x/day
- Losartan Potassium 50 mg PO/NG 1.0x/day

Prescriptions Ordered: February 05, 2150 at 01:00 AM

9 medication(s) prescribed:

- Glucose Gel 15 g PO
- Glucagon 1 mg IM
- HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day
- Ramelteon 8 mg PO/NG
- HYDROmorphone (Dilaudid) 2 mg PO/NG
- Insulin 50 UNIT SC 3.0x/day
- Dextrose 50% 12.5 gm IV
- Heparin Flush (100 units/ml) 5 mL IV
- ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day

Prescriptions Ordered: February 05, 2150 at 02:00 AM

2 medication(s) prescribed:

- Furosemide 20 mg PO/NG 1.0x/day
- Sarna Lotion 1 Appl TP

Prescriptions Ordered: February 05, 2150 at 08:00 AM

3 medication(s) prescribed:

• Heparin Flush (10 units/ml) 5 mL IV 1.0x/day

• Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

• Gabapentin 600 mg PO/NG 2.0x/day

Prescriptions Ordered: February 05, 2150 at 10:00 AM

1 medication(s) prescribed:

• Acetaminophen 1000 mg PO/NG 1.0x/day

Prescriptions Ordered: February 05, 2150 at 02:00 PM

1 medication(s) prescribed:

• Topiramate (Topamax) 50 mg PO/NG 1.0x/day

Prescriptions Ordered: February 05, 2150 at 05:00 PM

2 medication(s) prescribed:

• Insulin 50 UNIT SC 3.0x/day

• Capsaicin 0.025% 1 Appl TP

Prescriptions Ordered: February 05, 2150 at 06:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: February 05, 2150 at 10:00 PM

2 medication(s) prescribed:

• Insulin 2 UNIT SC 1.0x/day

• Acetaminophen 1000 mg PO/NG

Prescriptions Ordered: February 06, 2150 at 08:00 AM

4 medication(s) prescribed:

• Levothyroxine Sodium 88 mcg PO/NG 1.0x/day

• LORazepam 1 mg IV

• Levothyroxine Sodium 100 mcg PO/NG 1.0x/day

• Polyethylene Glycol 17 g PO/NG 1.0x/day

Prescriptions Ordered: February 06, 2150 at 10:00 AM

2 medication(s) prescribed:

• Insulin 0 UNIT SC

• Insulin 5 UNIT SC 1.0x/day

Prescriptions Ordered: February 06, 2150 at 02:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: February 06, 2150 at 07:00 PM

1 medication(s) prescribed:

• venetoclax 400 mg ORAL 1.0x/day

Prescriptions Ordered: February 06, 2150 at 08:00 PM

1 medication(s) prescribed:

• Ramelteon 8 mg PO/NG 1.0x/day

Prescriptions Ordered: February 07, 2150 at 12:00 AM

2 medication(s) prescribed:

• LORazepam 0.5 mg PO/NG 1.0x/day

• LORazepam 1 mg IV 1.0x/day

Prescriptions Ordered: February 07, 2150 at 08:00 AM

1 medication(s) prescribed:

• Insulin 70 UNIT SC 1.0x/day

Prescriptions Ordered: February 07, 2150 at 09:00 AM

1 medication(s) prescribed:

• Furosemide 20 mg PO/NG 1.0x/day

Prescriptions Ordered: February 07, 2150 at 11:00 AM

1 medication(s) prescribed:

• TraZODone 25 mg PO/NG

Prescriptions Ordered: February 07, 2150 at 03:00 PM

1 medication(s) prescribed:

• Furosemide 40 mg IV 1.0x/day

Prescriptions Ordered: February 07, 2150 at 05:00 PM

1 medication(s) prescribed:

• Insulin 60 UNIT SC 1.0x/day

Prescriptions Ordered: February 07, 2150 at 07:00 PM

1 medication(s) prescribed:

• LORazepam 1 mg IV 1.0x/day

Prescriptions Ordered: February 08, 2150 at 09:00 AM

1 medication(s) prescribed:

• Furosemide 60 mg IV 1.0x/day

Prescriptions Ordered: February 08, 2150 at 11:00 AM

2 medication(s) prescribed:

• Meclizine 12.5 mg PO 1.0x/day

• Allopurinol 300 mg PO/NG 1.0x/day

Prescriptions Ordered: February 08, 2150 at 12:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Discharge Summary

Discharge Time: February 08, 2150 at 02:14 PM

The patient was discharged from **Hematology/Oncology Intermediate** with disposition to **Home With Service**.

Known Allergies: Penicillins, NSAIDS (Non-Steroidal Anti-Inflammatory Drug), erythromycin base, cheeses soft, , cottage, cream cheese

Detailed Allergy List:

- **Penicillins**
- **NSAIDS (Non-Steroidal Anti-Inflammatory Drug)**
- **erythromycin base**

- **cheeses soft**
- **cottage**
- **cream cheese**

Discharge Diagnoses:

Primary Diagnoses:

- Neuropathy
- Weakness/numbness

Secondary Diagnoses:

- Hypoglycemia in the setting of Insulin-dependent type 2 diabetes
- Insomnia
- Depression
- Chronic lymphocytic leukemia
- Benign paroxysmal positional vertigo
- Hypertension
- Hypothyroidism

Complete Diagnosis List:

- Conversion disorder with mixed symptom presentation
- Chronic lymphocytic leukemia of B-cell type not having achieved remission
- Sick sinus syndrome
- Type 2 diabetes mellitus with hypoglycemia without coma
- Type 2 diabetes mellitus with diabetic polyneuropathy
- Homonymous bilateral field defects, left side
- Essential (primary) hypertension
- Hyperlipidemia, unspecified
- Obesity, unspecified
- Atherosclerotic heart disease of native coronary artery without angina pectoris
- Monoplegia of lower limb following cerebral infarction affecting left non-dominant side
- Encounter for adjustment and management of other part of cardiac pacemaker
- Obstructive sleep apnea (adult) (pediatric)
- Hypothyroidism, unspecified
- Unspecified glaucoma

- Benign paroxysmal vertigo, unspecified ear
- Anxiety disorder, unspecified
- Insomnia, unspecified
- Localized swelling, mass and lump, unspecified lower limb
- Other chronic pain
- Anemia, unspecified
- Nonspecific elevation of levels of transaminase and lactic acid dehydrogenase [LDH]
- Major depressive disorder, single episode, in full remission
- Unspecified mental disorder due to known physiological condition
- Pruritus, unspecified
- Body mass index [BMI] 37.0-37.9, adult
- Personal history of malignant neoplasm of testis
- Presence of coronary angioplasty implant and graft
- Long term (current) use of insulin
- Bariatric surgery status

Hospital Course:

Mr. is a man with high risk CLL on venetoclax, insulin-dependent type 2 diabetes, history of left sided cerebrovascular accident, depression with psychotic features, reported history of conversion disorder, hypothyroidism, hypertension, who was admitted with left-sided weakness and diminished sensation in the setting of hypoglycemia and 3 days of vertigo. CT head negative, CTA head and neck with no thrombus on admission. MRI Brain performed without acute findings. His symptoms gradually resolved over the course of his stay and he was discharged with outpatient . ACUTE ISSUES #L sided weakness, numbness #L homonymous hemianopsia #H/o prior CVA Presented with left-sided weakness and diminished sensation. No acute stroke was seen on CT/CTA imaging, despite what would be a large territory infarct given profound ipsilateral facial and upper and lower extremity symptoms. Neurology was consulted and had low suspicion for new event. Hypoglycemia was considered, as this can cause recrudescence of stroke symptoms; however, his symptoms persisted even with correction of blood sugar. B12 and TSH/T4 were also obtained; he was noted to be somewhat hypothyroid, even with medications, and we increased his dosage from 75mcg to 100mcg. He was placed on telemetry; no events were noted. With approval from our EP team and his outpatient cardiologist, an MRI brain was performed, with read notable for no evidence of infarction, hemorrhage, mass, or edema. He continued to work with our team. His symptoms gradually resolved throughout his stay, with full upper extremity strength at discharge and waxing/waning ability to walk on his LLE. There was low concern for an acute stroke or TIA; the primary team, neurology, and psychiatry found that his presentation is most consistent with functional neurologic disorder, with possible recrudescence of stroke symptoms given hypoglycemia and low thyroid. He should follow up as an outpatient for further management of symptoms. #Hypoglycemia in setting of Insulin-dependent Type 2 Diabetes Mellitus His A1c in was 8.7%. His home insulin regimen is 70/30, 100 units 3 times daily. He was reportedly taking in much less p.o. in the setting of his persistent vertigo, which may explain his hypoglycemia. No symptoms of other common causes of hypoglycemia, eg infection or adrenal

insufficiency, were found. No insulin was given on admission, and he was started on 50% of his dose the next morning. was consulted and his insulin regimen was adjusted per their recommendations. His home metformin was held but restarted on discharge. His discharge regimen was home at meals with ISS per . #Anxiety Psychiatry was consulted regarding his increasing anxiety, and were also made aware of his ongoing symptoms, potentially contributing to his anxiety. He was given lorazepam prn for acute anxiety events. #Diabetic neuropathy He noted exacerbation of L sided neuropathy from fingers to mid forearm. He was given capsaicin cream prn to good effect, and did not note further symptoms throughout the rest of his stay. He also continued on his home gabapentin. #BPPV He noted worsening vertigo the day prior to discharge, similar but reduced in intensity as compared to previous events. He noted that he had been given meclizine prior to good effect. He stated that he felt okay to move around, with the main symptom being that he saw double if something was held close to his face. He was given meclizine. He was able to ambulate without issues at time of discharge. CHRONIC ISSUES #Depression He was continued on home ziprasidone. #CLL He brought in his venetoclax from home, and was continued on his regimen. He was given allopurinol on discharge given a slight increase in uric acid levels. #HTN Continued on home losartan and metoprolol. He was also continued on home furosemide with furosemide prn for edema and increase weight. He should follow up as an outpatient for weight check and possible uptitration of Lasix.

Discharge Status:

Activity Status	Ambulatory - requires assistance or aid (walker or cane).
Level of Consciousness	Alert and interactive.
Mental Status	Clear and coherent.
Code Status	N/A

Discharge Instructions:

Dear Mr. , It was a privilege to care for you at . WHY WAS I IN THE HOSPITAL? You noted that your left arm, leg, and face were paralyzed. You also noted that you weren't able to appreciate sensation on the left side of your face and your left arm and leg. WHAT HAPPENED TO ME IN THE HOSPITAL? - You received CT scans and an MRI of your brain; in other words, we took pictures of your head. These pictures did not show an acute reason for your weakness and loss of sensation, which was reassuring. Your symptoms resolved over the course of your stay, and you worked with our physical therapists to help with the symptoms. - We gave you a cream to treat the neuropathy you endorsed in your left forearm. - We gave you more Lasix medication to help with the swelling in your lower legs. WHAT SHOULD I DO AFTER I LEAVE THE HOSPITAL? Continue to take all your medicines and keep your appointments. - Continue taking your insulin as you were prior to the hospitalization, you should check your blood sugar at least 4 times a day - Your levothyroxine (synthroid) dose was increased, you will need repeat labs in weeks to monitor levels We wish you the . Sincerely, Your Team

New Medications Started:

• Levothyroxine dose increase from 75mcg to 100mcg

• Given 1 dose of allopurinol at discharge

*Time gap of **60 days, 5 hours, 35 minutes** since last event*

Emergency Department Visit #20

Admission Time: April 09, 2150 at 07:50 PM

This is the patient's **20th** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2150-04-10 03:46:00**, staying for a duration of **0 days 7 hours 56 minutes**.

Initial Assessment:

Chief Complaint: Epigastric pain

Blood Pressure	180.0/74.0 mmHg
Heart Rate	75.0 bpm
Respiratory Rate	18.0 breaths/min
Oxygen Saturation	98.0%
Temperature	99.5°F
Pain Score	9
Acuity Level	3.0

Previous Medications on Record: April 09, 2150 at 09:57 PM

45 medication(s) documented:

• acetaminophen - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• alcohol swabs - Antiseptic - Alcohols

• amitriptyline - Antidepressant-Tricyclics and Related (Non-Select Reuptake Inhibitors)

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supply, FDB Superset

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supply, FDB Superset

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supply, FDB Superset

• blood sugar diagnostic [OneTouch Verio] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [OneTouch Verio] - Medical Supply, FDB Superset

• camphor-menthol [Anti-Itch (menthol/camphor)] - Dermatological - Antipruritics Combinations

• capsaicin - Dermatological Irritants-Counter-Irritant Single Agents

• carbamide peroxide [Ear Wax Removal Kit] - Otic (Ear) - Wax Removers-Softeners

• docusate sodium - Laxative - Surfactant

• epinephrine - Cardiovascular Sympathomimetic - Anaphylaxis Therapy Single Agents

• escitalopram oxalate - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• levothyroxine - Thyroid Hormones - Synthetic T4 (Thyroxine)

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Alternative Therapy - Pineal Hormone Agents

• melatonin - Hypnotics - Melatonin - Single Agents

• metformin - Insulin Response Enhancers - Biguanides

• metoprolol succinate - Beta Blockers Cardiac Selective

• nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations

• oxycodone - Analgesic Opioid Agonists

• pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)

• pen needle, diabetic [Pen Needle] - Medical Supplies and DME - Insulin Needles-Syringes and Admin Supplies

• pen needle, diabetic [Pen Needle] - Medical Supply, FDB Superset

• risperidone - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisoxazole Deriv

• risperidone - Bipolar Therapy Agents - Atypical Antipsychotics

• sennosides [senna] - Laxative - Stimulant

• sucralfate - Peptic Ulcer - Gastric Lumen Adherent Cytoprotectives

• triamcinolone acetonide - Dermatological - Glucocorticoid

• ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones

• ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

• insulin asp prt-insulin aspart - Insulin Analogs - Fixed Combinations

Laboratory Tests Performed: April 09, 2150 at 10:23 PM

Total of **52** tests performed, with **19** abnormal result(s).

Chemistry

Test	Value	Reference Range
Alanine Aminotransferase (ALT)	**57.0IU/L**	0.0-40.0

Hospital Admission #18

Admission Time: April 10, 2150 at 02:40 AM

This is the patient's **18th** hospital admission. The patient was admitted from **WALK-IN/SELF REFERRAL** as an **EW EMER.** admission. The admitting provider was **P52OEE**. Insurance coverage: **Medicaid**. Chief complaint: **Epigastric Pain**. The primary service provided was **MEDICINE**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 241

Description: PEPTIC ULCER AND GASTRITIS

Severity: 3.0

Mortality Risk: 3.0

HCFA DRG Code:

Code: 381

Description: COMPLICATED PEPTIC ULCER W CC

Patient Past History:

Past Medical History: : found to have CLL incidentally on labs performed during psych admission., Followed for several years until when he noted night sweats and progressive fatigue., Ibrutinib . Complicated by multiple bleeding events Including retinal bleed. Ibrutinib was held, lymph node. Ibrutinib was restarted, c/b GI and pericardial bleeding, Ventoclax initiated, Non-seminoma testicular GCT sp 4 cycles EP, Chronic lymphocytic leukemia as above., Sick sinus syndrome s/p PPM Revo DDD, MRI-compatible, ., CAD s/p DES to mid-LAD in, Cerebrovascular accident () with residual left weakness., Diabetes mellitus type II on insulin, pAF on xarelto, Hypertension., Hyperlipidemia., Morbid obesity., Obstructive sleep apnea - not on CPAP., Pancreatitis., Hypothyroidism., Peripheral neuropathy., Chronic pain., Osteoarthritis., Major depression with psychotic features (vs schizoaffective disorder per patient)., Anxiety., Conversion disorder., Benign paroxysmal positional vertigo., Glaucoma., s/p Cholecystectomy., s/p Bilateral shoulder surgery., s/p Gastric bypass surgery .

Family History: Father and mother with cardiovascular disease; mother died of unknown malignancy.

Social History: N/A

History of Present Illness:

Mr. is a man with CLL on venetoclax, hx testicular cancer, IDDM, hypertension, hyperlipidemia, obesity, right subcortical stroke in with residual left leg weakness (ambulates with a cane), sick sinus syndrome status post pacemaker, depression with psychotic features, presenting with sudden onset of epigastric abdominal pain. Patient states he ate dinner at 4:30PM yesterday evening, and an hour later at 5:30pm, he began experiencing epigastric pain. Described pain as sharp and stabbing, 9.5/10. Reported associated nausea, but no emesis. States pain radiated "straight to my back". Denies any alleviating or exacerbating factors. Did not try to take any medications, and instead called an ambulance to bring him to the hospital. Stated he had never felt this pain before. Reportedly had a history of GERD and takes a PPI daily. When asked if this pain resembled his reflux symptoms, he states it's hard to say as he very rarely has reflux symptoms on this regimen. Denies any diarrhea, constipation, obstipation, dysuria, foul smelling urine, hematochezia, melena. Reports last BM the day prior to admission which was normal. No history of gallstones.

Admission Vital Signs:

General Appearance	Sitting in chair comfortably
Blood Pressure	137/75 mmHg
Heart Rate	71 bpm
Respiratory Rate	18 breaths/min
Temperature	97.6°F
Oxygen Saturation	97% RA

Admission Laboratory Results:

- WBC: 10.6
- Glucose: 391

Admission Medications:

Total of **34** medications on admission:

- Acyclovir 400 mg PO Q8H
- Atorvastatin 40 mg PO QPM
- Fenofibrate 54 mg PO DAILY
- Furosemide 20 mg PO DAILY
- Gabapentin 300 mg PO BID
- Levothyroxine Sodium 100 mcg PO DAILY
- Lidocaine 5% Patch 3 PTCH TD QAM
- Losartan Potassium 50 mg PO DAILY
- Pantoprazole 40 mg PO Q24H
- Rivaroxaban 20 mg PO DAILY
- Senna 8.6 mg PO BID:PRN Constipation - First Line
- Sucralfate 1 gm PO BID
- Topiramate (Topamax) 50 mg PO DAILY
- Triamcinolone Acetonide 0.1% Cream 1 Appl TP DAILY
- Carbamide Peroxide 6.5% DROP BOTH EARS DAILY
- EPINEPHrine (EpiPEN) 0.3 mg IM ONCE MR1
- HydrOXYzine 10 mg PO Q6H:PRN anxiety
- Magnesium Oxide 400 mg PO BID
- melatonin 6 mg oral qhs
- Metoprolol Succinate XL 150 mg PO DAILY
- Nystatin-Triamcinolone Cream 1 Appl TP BID
- Venetoclax 400 mg PO DAILY
- Docusate Sodium 100 mg PO BID
- Acetaminophen 500 mg PO Q8H:PRN Pain - Mild/Fever
- Aspirin 81 mg PO DAILY
- Colchicine 0.6 mg PO DAILY

• Amitriptyline 10 mg PO QHS

• Escitalopram Oxalate 20 mg PO DAILY

• MetFORMIN XR (Glucophage XR) 1000 mg PO DAILY

• Insulin 100 Units Breakfast

• Insulin 100 Units Lunch

• Insulin 100 Units Bedtime

• RisperiDONE 3 mg PO DAILY

• OxyCODONE (Immediate Release) 5 mg PO Q4H:PRN Pain - Moderate

Unit Admission - Hematology/Oncology Intermediate

Admission Time: April 10, 2150 at 03:46 AM

The patient was admitted to **Hematology/Oncology Intermediate** ward. The patient stayed in this unit until **2150-04-15 18:09:10**, for a total duration of **5 days 14 hours 23 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: April 10, 2150 at 06:00 AM

4 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

• Heparin Flush (100 units/ml) 5 mL IV

• Sodium Chloride 0.9% 1000 mL IV 1.0x/day

• Heparin Flush (10 units/ml) 5 mL IV 1.0x/day

Prescriptions Ordered: April 10, 2150 at 07:00 AM

30 medication(s) prescribed:

• Docusate Sodium 100 mg PO/NG

• Lidocaine 5% Patch 3 PTCH TD 1.0x/day

• Nystatin-Triamcinolone Cream 1 Appl TP 2.0x/day

• Rivaroxaban 20 mg PO/NG 1.0x/day

• Sucralfate 1 gm PO/NG 2.0x/day

• HydrOXYzine 10 mg PO/NG

• Gabapentin 300 mg PO/NG 2.0x/day

• Glucagon 1 mg IM

- Topiramate (Topamax) 50 mg PO/NG 1.0x/day
- Dextrose 50% 12.5 gm IV
- Sodium Chloride 0.9% 1000 mL IV
- Senna 8.6 mg PO/NG
- Triamcinolone Acetonide 0.1% Cream 1 Appl TP 1.0x/day
- Acetaminophen 500 mg PO/NG
- Aspirin 81 mg PO/NG 1.0x/day
- Magnesium Oxide 400 mg PO/NG 2.0x/day
- Atorvastatin 40 mg PO/NG 1.0x/day
- Furosemide 20 mg PO/NG 1.0x/day
- Insulin 100 UNIT SC 1.0x/day
- Escitalopram Oxalate 10 mg PO/NG 1.0x/day
- Glucose Gel 15 g PO
- Insulin 100 UNIT SC 1.0x/day
- Acyclovir 400 mg PO/NG 3.0x/day
- Colchicine 0.6 mg PO/NG 1.0x/day
- Metoprolol Succinate XL 150 mg PO 1.0x/day
- RisperiDONE 3 mg PO 1.0x/day
- Amitriptyline 10 mg PO/NG 1.0x/day
- Pantoprazole 40 mg PO 1.0x/day
- Losartan Potassium 50 mg PO/NG 1.0x/day
- Levothyroxine Sodium 75 mcg PO/NG 1.0x/day

Prescriptions Ordered: April 10, 2150 at 08:00 AM

1 medication(s) prescribed:

- Fenofibrate 48 mg PO 1.0x/day

Prescriptions Ordered: April 10, 2150 at 09:00 AM

2 medication(s) prescribed:

- ZIPRASidone Hydrochloride 40 mg PO/NG 2.0x/day
- RisperiDONE 3 mg PO 1.0x/day

Prescriptions Ordered: April 10, 2150 at 10:00 AM

4 medication(s) prescribed:

• Lidocaine 1% 5 mL SC

• OxyCODONE (Immediate Release) 2.5-5 mg PO/NG

• Sodium Chloride 0.9% Flush 20 mL IV

• Heparin Flush (10 units/ml) 2 mL IV 1.0x/day

Prescriptions Ordered: April 10, 2150 at 11:00 AM

3 medication(s) prescribed:

• Morphine Sulfate 4 mg IV 1.0x/day

• Lactated Ringers 1000 mL IV

• Levothyroxine Sodium 25 mcg PO/NG 1.0x/day

Prescriptions Ordered: April 10, 2150 at 01:00 PM

1 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

Prescriptions Ordered: April 10, 2150 at 02:00 PM

2 medication(s) prescribed:

• Insulin 80 UNIT SC 1.0x/day

• Sodium Chloride 0.9% Flush 10-20 mL IV 1.0x/day

Prescriptions Ordered: April 10, 2150 at 04:00 PM

1 medication(s) prescribed:

• Insulin 100 UNIT SC 1.0x/day

Prescriptions Ordered: April 10, 2150 at 05:00 PM

1 medication(s) prescribed:

• Insulin 20 UNIT SC 1.0x/day

Prescriptions Ordered: April 10, 2150 at 06:00 PM

3 medication(s) prescribed:

• Insulin 20 UNIT SC 1.0x/day

• Insulin 50 UNIT SC 1.0x/day

• Insulin 0 UNIT SC 1.0x/day

Prescriptions Ordered: April 10, 2150 at 08:00 PM

3 medication(s) prescribed:

• Nystatin-Triamcinolone Cream 1 Appl TP 1.0x/day

• Triamcinolone Acetonide 0.1% Cream 1 Appl TP 1.0x/day

• Lidocaine 5% Patch 3 PTCH TD 1.0x/day

Procedure(s) Performed: April 11, 2150 at 12:00 AM

1 procedure(s) performed (Source: ICD):

• Extraction of Stomach, Via Natural or Artificial Opening Endoscopic, Diagnostic

Prescriptions Ordered: April 11, 2150 at 08:00 AM

3 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

• Levothyroxine Sodium 100 mcg PO/NG 1.0x/day

• Levothyroxine Sodium 175 mcg PO/NG 1.0x/day

Prescriptions Ordered: April 11, 2150 at 10:00 AM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 2.5 mg PO/NG

Prescriptions Ordered: April 11, 2150 at 01:00 PM

2 medication(s) prescribed:

• Pantoprazole 40 mg PO 2.0x/day

• Insulin 50 UNIT SC 1.0x/day

Prescriptions Ordered: April 11, 2150 at 03:00 PM

1 medication(s) prescribed:

• Insulin 60 UNIT SC 1.0x/day

Prescriptions Ordered: April 11, 2150 at 05:00 PM

3 medication(s) prescribed:

• Insulin 35 UNIT SC 1.0x/day

• Rivaroxaban 20 mg PO/NG 1.0x/day

• venetoclax 400 mg PO 1.0x/day

Prescriptions Ordered: April 11, 2150 at 10:00 PM

1 medication(s) prescribed:

• Insulin 15 UNIT SC 1.0x/day

Prescriptions Ordered: April 12, 2150 at 08:00 AM

3 medication(s) prescribed:

• Furosemide 20 mg PO/NG 1.0x/day

• Thiamine 100 mg PO/NG 1.0x/day

• Insulin 60 UNIT SC 1.0x/day

Prescriptions Ordered: April 12, 2150 at 01:00 PM

1 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

Prescriptions Ordered: April 12, 2150 at 08:00 PM

1 medication(s) prescribed:

• Gabapentin 100 mg PO/NG 3.0x/day

Prescriptions Ordered: April 13, 2150 at 08:00 AM

4 medication(s) prescribed:

• Insulin 70 UNIT SC 1.0x/day

• Levothyroxine Sodium 125 mcg PO/NG 1.0x/day

• Escitalopram Oxalate 20 mg PO/NG 1.0x/day

• Allopurinol 100 mg PO/NG 1.0x/day

Microbiology Tests Performed: April 13, 2150 at 12:30 PM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Prescriptions Ordered: April 13, 2150 at 03:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: April 13, 2150 at 10:00 PM

1 medication(s) prescribed:

• RisperiDONE 3 mg PO 1.0x/day

Prescriptions Ordered: April 13, 2150 at 11:00 PM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 2.5 mg PO/NG 1.0x/day

Prescriptions Ordered: April 14, 2150 at 04:00 PM

1 medication(s) prescribed:

• Phosphorus 500 mg PO/NG 1.0x/day

Prescriptions Ordered: April 14, 2150 at 05:00 PM

1 medication(s) prescribed:

• Lorazepam 2 mg PO/NG 3.0x/day

Prescriptions Ordered: April 15, 2150 at 09:00 AM

2 medication(s) prescribed:

• 0.9% Sodium Chloride 1 BAG IV 1.0x/day

• Bag 1 BAG IV 1.0x/day

Prescriptions Ordered: April 15, 2150 at 05:00 PM

2 medication(s) prescribed:

• Insulin 30 UNIT SC 1.0x/day

• Insulin 35 UNIT SC 1.0x/day

Discharge Summary

Discharge Time: April 15, 2150 at 06:09 PM

The patient was discharged from **Hematology/Oncology Intermediate** with disposition to **Home With Service**.

Major Procedure(s) During Admission: Endoscopy ()

Known Allergies: Penicillins, NSAIDS (Non-Steroidal Anti-Inflammatory Drug), erythromycin base, cheeses soft, , cottage, cream cheese

Detailed Allergy List:

- **Penicillins**
- **NSAIDS (Non-Steroidal Anti-Inflammatory Drug)**
- **erythromycin base**
- **cheeses soft**
- **cottage**
- **cream cheese**

Discharge Diagnoses:

Primary Diagnoses:

- Jejunal Ulcer

Secondary Diagnoses:

- fistula
- Lethargy
- Hypothyroidism
- Insulin dependent diabetes mellitus
- Delirium
- Contrast induced nephropathy
- Depression with psychotic features
- in remission
- Hyperuricemia
- Elevated LFTs

Complete Diagnosis List:

- Gastrojejunal ulcer, unspecified as acute or chronic, without hemorrhage or perforation
- Other complications of other bariatric procedure
- Fistula of stomach and duodenum
- Acute kidney failure, unspecified
- Chronic diastolic (congestive) heart failure
- Delirium due to known physiological condition
- Chronic lymphocytic leukemia of B-cell type not having achieved remission

- Body mass index [BMI] 40.0-44.9, adult
- Major depressive disorder, recurrent, in remission, unspecified
- Nephropathy induced by other drugs, medicaments and biological substances
- Hypertensive chronic kidney disease with stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease
- Chronic kidney disease, stage 3 (moderate)
- Type 2 diabetes mellitus with diabetic chronic kidney disease
- Type 2 diabetes mellitus with diabetic polyneuropathy
- Type 2 diabetes mellitus with hyperglycemia
- Paroxysmal atrial fibrillation
- Hypothyroidism, unspecified
- Adverse effect of diagnostic agents, initial encounter
- Other place in hospital as the place of occurrence of the external cause
- Gastro-esophageal reflux disease without esophagitis
- Diaphragmatic hernia without obstruction or gangrene
- Pure hyperglyceridemia
- Morbid (severe) obesity due to excess calories
- Anemia, unspecified
- Other fatigue
- Monoplegia of lower limb following cerebral infarction affecting left non-dominant side
- Gout, unspecified
- Bilateral primary osteoarthritis of hip
- Primary osteoarthritis, left shoulder
- Primary osteoarthritis, right shoulder
- Obstructive sleep apnea (adult) (pediatric)
- Other specified abnormal findings of blood chemistry
- Xerosis cutis
- Anxiety disorder, unspecified
- Old myocardial infarction
- Long term (current) use of anticoagulants
- Long term (current) use of insulin
- Personal history of malignant neoplasm of testis
- Presence of cardiac pacemaker

Hospital Course:

Mr. is a gentleman w/ history of CLL (on venetoclax), depression with psychotic features, GERD, single remote episode of pancreatitis, IDDM, CAD s/p PCI, roux-en-y gastric bypass & cholecystectomy, & hypothyroidism who presented with acute onset, severe epigastric pain. CTA A/P, lab work & cardiac workup were all unrevealing. Mr. was evaluated by GI and underwent EGD, which revealed a healing jejunal ulcer as well as a fistula. His home PPI was made BID and Mr. was provided with low dose oxycodone prn for pain management. Course was complicated by periods of lethargy and delirium. His levothyroxine was titrated up as his recent TSH was elevated and concern this was contributing to his lethargy. Mr. was also seen by psychiatry, who assisted in medication adjustments. Over the course of his hospitalization, Mr. mental status waxed and waned, likely due to his underlying medical issues and medication titration, however at discharge his mental status was back to baseline and clear. Course was further complicated by , that was deemed contrast induced nephropathy. Mr. was seen by renal, and upon discharge his Cr was 1.1. Mr. was followed by throughout his hospitalization for assistance in managing his IDDM. ACTIVE PROBLEMS: # Contrast Induced Nephropathy: Mr. with , seen by renal and deemed likely contrast induced nephropathy. We held his colchicine, losartan, and furosemide. We renally dosed his medications. However these were resumed on discharge as his renal function recovered. Cr on discharge of 1.1. #Epigastric Abd Pain #Jejunal Ulcer: Suspect abd pain healing jejunal ulcer seen on EGD . CTA A/P with no concerning findings at this time for infectious, ischemic, or pancreatic etiologies. ECG & trop unremarkable for ACS. Initiated on BID PPI for ontinued home mag ox & sucralfate. Provided low dose oxycodone intermittently for pain relief. He should follow up with GI as an outpatient. #Lethargy #AMA Request: Unclear etiology but possibly polypharmacy vs. other TME vs. hypothyroidism vs. delirium. Waxing & waning disorientation most c/f superimposed delirium. TSH persistently elevated therefore possible that poorly managed hypothyroidism contributing. Seen by psychiatry, who recommended stopping ziprasidone & amitriptyline & decreasing his gabapentin. Agreed to discharge with home . # Insulin-dependent type 2 diabetes: Complicated by peripheral neuropathy. A1c 8.7% in Home insulin regimen is 70/30, 100 units 3 times daily. Followed by & held metformin while inpatient. Will be discharged on regimen of 70/30 insulin, 70 units at breakfast, 60 units at lunch, and 55 units at dinner. Resume metformin at home. #Hx Roux-en-y fistula: Fistula seen by EGD . Bariatric surgery favor no surgical intervention at current time. GI also favors deferring EGD clipping as unlikely contributing to current presentation. Vitamin studies wnl. Added thiamine supplementation. TI: follow up with Dr. after discharge # Elevated LFTs: Mild elevations. Has had intermittently elevated LFTs in past. Likely drug induced liver injury, but unclear precipitant. These resolved upon discharge. # Normocytic Anemia: # Thrombocytopenia:: Appears stable. Recent Fe studies indicate . Possibly r/t hx gastric bypass vs. colon cancer. Last c-scope w/ tubular adenoma & serrated adenoma. GI at that time rec f/up screen w/ stool based testing d/t difficulty w/ GI prep. TI: colon cancer screening #Hx Depression w/ psychotic features: Seen by psychiatry. D/c ziprasidone & amitriptyline per above. Continued escitalopram, risperidone, and topirimate. Decreased dose of gabapentin. #Hypothyroidism: Recent TSH elevated at 17 & fT4 low at 0.7. Unclear dose of levothyroxine at home, but increased to 125mcg per day, per recs. TI: repeat TSH 6weeks () #Hyperuricemia #Hx of Gout: Held home colchicine in s/o renal injury. Initiated allopurinol daily. Home meds were resumed at time of discharge. CHRONIC ISSUES: # swelling: Per pt at baseline. Held furosemide in s/o renal injury. #CLL: Stable. Patient continued on home venetoclax & acyclovir ppx. #Chronic Back Pain: Stable. Continued lidocaine patches. #Skin Care: Hx xerosis. Possibly hypothyroid. Nystatin & triamcinolone creams. #CAD s/p PCI #CVA w/ residual left sided weakness #HTN: ECG & trops w/o e/o ACS. Continued ASA, atorvastatin, metop succ. Held home losartan renal injury. Resumed upon discharge. #HLD #Hypertriglyceridemia: cholesterol 334, 1475, HDL 24, LDL 151. Continued home atorvastatin & fenofibrate. #pAF: Rate controlled (metop suc) & on OAC (rivaroxaban) #Hx Gout: Nothing acute. Held home colchicine renal injury. Started renally dosed allopurinol.

Discharge Status:

Activity Status	Ambulatory - requires assistance or aid (walker or cane).
Level of Consciousness	Alert and interactive.
Mental Status	Clear and coherent.
Code Status	Full presumed

Discharge Instructions:

Dear, It was a pleasure taking part in your care here at ! Why was I admitted to the hospital? - You were admitted for abdominal pain What was done for me while I was in the hospital? - We took pictures of your abdomen to determine what was causing your abdominal pain - We used a camera to look into your stomach (endoscopy) and saw a healing ulcer in your small intestine - We gave you pain medications & anti-acid medications to treat the ulcer - We had diabetes doctors help manage your blood sugars - We had psychiatrists see you to help manage your medications - We had the kidney doctors because your kidney levels were high What should I do when I leave the hospital? - please note that your acid reducing medication (Pantoprazole) should be taken twice a day for the next 8 weeks. - please check your blood sugars before meals and at bedtime everyday, and bring a log of your readings to your next doctors . - Take all of your medications as prescribed - Follow-up with all of your physicians as directed Sincerely, Your Care Team

New Medications Started:

• Initiated allopurinol daily

• Added thiamine supplementation

Medications Stopped:

• ziprasidone

• amitriptyline

*Time gap of **14 days, 20 hours, 16 minutes** since last event*

Emergency Department Visit #21

Admission Time: April 30, 2150 at 02:26 PM

This is the patient's **21st** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2150-04-30 21:54:00**, staying for a duration of **0 days 7 hours 28 minutes**.

Initial Assessment:

Chief Complaint: L Leg pain, Weakness, abdominal

Blood Pressure	125.0/62.0 mmHg
Heart Rate	72.0 bpm
Respiratory Rate	18.0 breaths/min
Oxygen Saturation	100.0%
Temperature	98.6°F
Pain Score	0
Acuity Level	3.0

Previous Medications on Record: April 30, 2150 at 04:51 PM

45 medication(s) documented:

• acetaminophen - Analgesic or Antipyretic Non-Opioid

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• alcohol swabs - Antiseptic - Alcohols

• allopurinol - Hyperuricemia Therapy - Xanthine Oxidase Inhibitors

• amitriptyline - Antidepressant-Tricyclics and Related (Non-Select Reuptake Inhibitors)

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supply, FDB Superset

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supply, FDB Superset

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supply, FDB Superset

• blood sugar diagnostic [OneTouch Verio] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [OneTouch Verio] - Medical Supply, FDB Superset

• camphor-menthol [Anti-Itch (menthol/camphor)] - Dermatological - Antipruritics Combinations

• capsaicin - Dermatological Irritants-Counter-Irritant Single Agents

• docusate sodium - Laxative - Surfactant

• epinephrine - Cardiovascular Sympathomimetic - Anaphylaxis Therapy Single Agents

• escitalopram oxalate - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)

• fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives

• furosemide - Diuretic - Loop

• gabapentin - Anticonvulsant - GABA Analogs

• insulin asp prt-insulin aspart [Novolog Mix 70-30FlexPen U-100] - Insulin Analogs - Fixed Combinations

• levothyroxine [Euthyrox] - Thyroid Hormones - Synthetic T4 (Thyroxine)

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• losartan - Angiotensin II Receptor Blockers (ARBs)

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Alternative Therapy - Pineal Hormone Agents

• melatonin - Hypnotics - Melatonin - Single Agents

• metformin - Insulin Response Enhancers - Biguanides

• metoprolol succinate - Beta Blockers Cardiac Selective

• nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations

• oxycodone - Analgesic Opioid Agonists

• pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)

• pen needle, diabetic [Pen Needle] - Medical Supplies and DME - Insulin Needles-Syringes and Admin Supplies

• pen needle, diabetic [Pen Needle] - Medical Supply, FDB Superset

• risperidone - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisoxazole Deriv

• risperidone - Bipolar Therapy Agents - Atypical Antipsychotics

• sennosides [senna] - Laxative - Stimulant

• sucralfate - Peptic Ulcer - Gastric Lumen Adherent Cytoprotectives

• triamcinolone acetonide - Dermatological - Glucocorticoid

• ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones

• ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics

Medications Administered: April 30, 2150 at 05:40 PM

Total of **7** medication(s) administered:

• HYDROmorphone (Dilaudid)

• HYDROmorphone (Dilaudid)

• Sodium Chloride 0.9% (Mini Bag Plus)

• CefTRIAXone

• CefTRIAXone

• HYDROmorphone (Dilaudid)

• HYDROmorphone (Dilaudid)

---

*Time gap of **2 hours, 39 minutes** since last event*

Hospital Admission #19

Admission Time: April 30, 2150 at 08:19 PM

This is the patient's **19th** hospital admission. The patient was admitted from **TRANSFER FROM HOSPITAL** as an **OBSERVATION ADMIT** admission. The admitting provider was **P84UKK**. Insurance coverage: **Medicaid**. Chief complaint: **abdominal** . The primary service provided was **MEDICINE**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 469

Description: ACUTE KIDNEY INJURY

Severity: 3.0

Mortality Risk: 3.0

HCFA DRG Code:

Code: 683

Description: RENAL FAILURE W CC

Patient Past History:

Past Medical History: PAST ONCOLOGIC HISTORY:, -: found to have CLL incidentally on labs performed during psych admission., - Followed for several years until when he noted night sweats and progressive fatigue., - Ibrutinib . Complicated by multiple bleeding events Including retinal bleed. Ibrutinib was held, lymph node. Ibrutinib was restarted, c/b GI and pericardial bleeding, - Ventoclax initiated , PAST MEDICAL HISTORY:, -Non-seminoma testicular GCT sp 4 cycles EP , -Chronic lymphocytic leukemia as above., -Sick sinus syndrome s/p PPM Revo DDD, MRI-compatible, ., -CAD s/p DES to mid-LAD in , -Cerebrovascular accident () with residual left weakness., -Diabetes mellitus type II on insulin, -pAF on xarelto, -Hypertension., -Hyperlipidemia., -Morbid obesity., -Obstructive sleep apnea - not on CPAP., -Pancreatitis., -Hypothyroidism., -Peripheral neuropathy., -Chronic pain., -Osteoarthritis., -Major depression with psychotic features (vs schizoaffective disorder per patient)., -Anxiety., -Conversion disorder., -Benign paroxysmal positional vertigo., -Glaucoma., -s/p Cholecystectomy., -s/p Bilateral shoulder surgery., -s/p Gastric bypass surgery .

Family History: Father and mother with cardiovascular disease; mother died of unknown malignancy.

Social History: N/A

History of Present Illness:

PMH CLL (on venetoclax), Depression with psychotic features, T2DM, CVA, presented from OSH with malaise, abdominal pain, left leg pain, found to have , UTI, Hypotension, admitted to oncology ward for further care. On arrival to medical ward patient was lethargic but arousable to voice and clearly oriented. However, he had difficulty staying awake during the interview, as he had received 1mg of IV Dilaudid in ED several hours prior. He noted that he did not feel lethargic prior to receiving IV Dilaudid. As a result of his sedation, a full history and PAML could not be obtained. He was able to state that he initially presented to OSH with malaise, lower abdominal pain, which he felt radiated to his left leg, that was a/w difficulty urinating. He denied fever, chills, cough, sore throat, nausea, vomiting, diarrhea/constipation. Noted that he had decreased appetite/intake at home. Noted that since foley was placed his abdominal and leg pain is resolved. Reported that he was tired but asymptomatic on admission to oncology ward. Per review of outside hospital records, patient had elevated Cr of 2.2, and BP to mid during stay. He was given IVF and blood pressure rebounded and stayed normal thereafter. Bladder scan revealed >500cc so foley was placed and UA was not consistent with infection. Lower extremity duplex performed on both legs and was negative for DVT. CTH performed for questions of altered mental status and was without acute intracranial pathology. Given that he gets his care at , wife requested transfer. In our ED, initial vitals: 98.6 72 125/62 18 100% RA. WBC 14.4, Hgb 9.1, plt 146, BNP 311, ALT 67, AST 57, Ca/Mg/Phos wnl, HCO3 18, BUN/Cr , lactate 2.8, UA with 182 WBC/RBC, mod bact, lg leuk, mod bld. Urine Na was 35, Osm 377

Admission Vital Signs:

General Appearance	laying in bed
Blood Pressure	124/66 mmHg
Heart Rate	70 bpm

Respiratory Rate	20 breaths/min
Temperature	97.2 PO°F
Oxygen Saturation	98% RA

Admission Laboratory Results:

• WBC: 14.4

• Creatinine: 1.7

• Glucose: 132

• Lactate: 2.8

Admission Medications:

Total of **32** medications on admission:

• Acetaminophen 500 mg PO Q8H:PRN Pain - Mild/Fever

• Acyclovir 400 mg PO Q8H

• Aspirin 81 mg PO DAILY

• Atorvastatin 40 mg PO QPM

Unit Admission - Hematology/Oncology Intermediate

Admission Time: April 30, 2150 at 09:54 PM

The patient was admitted to **Hematology/Oncology Intermediate** ward. The patient stayed in this unit until **2150-05-02 18:06:10**, for a total duration of **1 days 20 hours 12 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: April 30, 2150 at 11:00 PM

5 medication(s) prescribed:

• Dextrose 50% 12.5 gm IV

• Glucose Gel 15 g PO

• Acyclovir 400 mg PO/NG 3.0x/day

• HYDROmorphone (Dilaudid) 0.5 mg IV

• Glucagon 1 mg IM

Prescriptions Ordered: May 01, 2150 at 12:00 AM

6 medication(s) prescribed:

• Heparin Flush (100 units/ml) 5 mL IV

• Heparin Flush (10 units/ml) 5 mL IV 1.0x/day

• Lidocaine Jelly 2% (Glydo) 1 Appl TP

- Acetaminophen 500 mg PO/NG
- Lactated Ringers 1000 mL IV
- Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

Prescriptions Ordered: May 01, 2150 at 01:00 AM

10 medication(s) prescribed:

- Nystatin-Triamcinolone Cream 1 Appl TP 2.0x/day
- Escitalopram Oxalate 20 mg PO/NG 1.0x/day
- Senna 8.6 mg PO/NG
- Glucagon 1 mg IM
- Glucose Gel 15 g PO
- Carbamide Peroxide 6.5% 5-10 DROP BOTH EARS 1.0x/day
- Docusate Sodium 100 mg PO/NG 2.0x/day
- Pantoprazole 40 mg PO 2.0x/day
- Dextrose 50% 12.5 gm IV
- Acyclovir 400 mg PO/NG 3.0x/day

Prescriptions Ordered: May 01, 2150 at 06:00 AM

1 medication(s) prescribed:

- Levothyroxine Sodium 125 mcg PO/NG 1.0x/day

Prescriptions Ordered: May 01, 2150 at 08:00 AM

7 medication(s) prescribed:

- Allopurinol 100 mg PO/NG 1.0x/day
- RisperiDONE 3 mg PO 1.0x/day
- Escitalopram Oxalate 20 mg PO/NG 1.0x/day
- Losartan Potassium 50 mg PO/NG 1.0x/day
- Levothyroxine Sodium 125 mcg PO/NG 1.0x/day
- Metoprolol Succinate XL 150 mg PO 1.0x/day
- Aspirin 81 mg PO/NG 1.0x/day

Prescriptions Ordered: May 01, 2150 at 09:00 AM

2 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5-10 mg PO/NG

• Sodium Chloride 0.9% 1000 mL IV 1.0x/day

Prescriptions Ordered: May 01, 2150 at 10:00 AM

1 medication(s) prescribed:

• Sucralfate 1 gm PO/NG 2.0x/day

Prescriptions Ordered: May 01, 2150 at 12:00 PM

1 medication(s) prescribed:

• Insulin 50 UNIT SC 1.0x/day

Prescriptions Ordered: May 01, 2150 at 01:00 PM

1 medication(s) prescribed:

• TraMADol 50 mg PO

Prescriptions Ordered: May 01, 2150 at 02:00 PM

4 medication(s) prescribed:

• RisperiDONE 3 mg PO 1.0x/day

• Topiramate (Topamax) 50 mg PO/NG 1.0x/day

• Gabapentin 100 mg PO/NG 3.0x/day

• HydrOXYzine 10 mg PO/NG 4.0x/day

Prescriptions Ordered: May 01, 2150 at 05:00 PM

2 medication(s) prescribed:

• Rivaroxaban 20 mg PO/NG 1.0x/day

• Insulin 80 UNIT SC 1.0x/day

Prescriptions Ordered: May 01, 2150 at 07:00 PM

1 medication(s) prescribed:

• Vial 1 VIAL IV 1.0x/day

Prescriptions Ordered: May 01, 2150 at 08:00 PM

2 medication(s) prescribed:

• Atorvastatin 80 mg PO/NG 1.0x/day

• Lidocaine 5% Patch 3 PTCH TD 1.0x/day

Prescriptions Ordered: May 01, 2150 at 10:00 PM

2 medication(s) prescribed:

• Amitriptyline 10 mg PO/NG 1.0x/day

• Ondansetron 4 mg IV 1.0x/day

Prescriptions Ordered: May 01, 2150 at 11:00 PM

1 medication(s) prescribed:

• Ondansetron 4 mg IV 1.0x/day

Prescriptions Ordered: May 02, 2150 at 06:00 AM

1 medication(s) prescribed:

• Prochlorperazine 5 mg PO 1.0x/day

Prescriptions Ordered: May 02, 2150 at 02:00 PM

1 medication(s) prescribed:

• Ondansetron 8 mg IV

Prescriptions Ordered: May 02, 2150 at 05:00 PM

1 medication(s) prescribed:

• Venetoclax 400 mg PO 1.0x/day

Unit Admission - Hematology/Oncology Intermediate

Admission Time: May 02, 2150 at 06:06 PM

The patient was admitted to **Hematology/Oncology Intermediate** ward. The patient stayed in this unit until **2150-05-07 14:21:03**, for a total duration of **4 days 20 hours 14 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: May 02, 2150 at 08:00 PM

1 medication(s) prescribed:

• LORazepam 0.5-1 mg PO/NG

Prescriptions Ordered: May 02, 2150 at 09:00 PM

1 medication(s) prescribed:

• LORazepam 0.5 mg IV 1.0x/day

Prescriptions Ordered: May 03, 2150 at 01:00 PM

1 medication(s) prescribed:

• Iohexol 240 50 mL PO/NG

Prescriptions Ordered: May 04, 2150 at 08:00 AM

2 medication(s) prescribed:

• Senna 8.6 mg PO/NG 2.0x/day

• Polyethylene Glycol 17 g PO/NG 1.0x/day

Prescriptions Ordered: May 04, 2150 at 02:00 PM

1 medication(s) prescribed:

• Acyclovir 400 mg PO/NG 3.0x/day

Prescriptions Ordered: May 04, 2150 at 07:00 PM

1 medication(s) prescribed:

• Bisacodyl 10 mg PO

Prescriptions Ordered: May 05, 2150 at 05:00 PM

1 medication(s) prescribed:

• Lactulose 30 mL PO/NG 2.0x/day

Prescriptions Ordered: May 05, 2150 at 08:00 PM

1 medication(s) prescribed:

• Polyethylene Glycol 17 g PO/NG 2.0x/day

Prescriptions Ordered: May 06, 2150 at 10:00 AM

1 medication(s) prescribed:

• Magnesium Citrate 300 mL PO 1.0x/day

Prescriptions Ordered: May 06, 2150 at 05:00 PM

1 medication(s) prescribed:

• Metoprolol Succinate XL 150 mg PO 1.0x/day

Prescriptions Ordered: May 06, 2150 at 06:00 PM

1 medication(s) prescribed:

• Polyethylene Glycol 17 g PO/NG

Discharge Summary

Discharge Time: May 07, 2150 at 02:21 PM

The patient was discharged from **Hematology/Oncology Intermediate** with disposition to **Home With Service**.

Major Procedure(s) During Admission: none

Known Allergies: Penicillins, NSAIDS (Non-Steroidal Anti-Inflammatory Drug), erythromycin base, cheeses soft, , cottage, cream cheese

Detailed Allergy List:

• Penicillins
• NSAIDS (Non-Steroidal Anti-Inflammatory Drug)
• erythromycin base
• cheeses soft
• cottage
• cream cheese

Discharge Diagnoses:

Primary Diagnoses:

• UTI

• CLL

• Constipation

• Acute Abdominal Pain

Secondary Diagnoses:

• Jejunal Ulcer

• Gastro-gastric Fistula

• Lethargy

• Hypothyroidism

• Delirium

• Insulin dependent diabetes mellitus

- Depression with psychotic features
- in remission

Complete Diagnosis List:

- Acute kidney failure, unspecified
- Urinary tract infection, site not specified
- Chronic lymphocytic leukemia of B-cell type not having achieved remission
- Hemiplegia and hemiparesis following cerebral infarction affecting left non-dominant side
- Presence of cardiac pacemaker
- Atherosclerotic heart disease of native coronary artery without angina pectoris
- Presence of coronary angioplasty implant and graft
- Type 2 diabetes mellitus with diabetic polyneuropathy
- Long term (current) use of insulin
- Paroxysmal atrial fibrillation
- Long term (current) use of anticoagulants
- Hyperlipidemia, unspecified
- Morbid (severe) obesity due to excess calories
- Obstructive sleep apnea (adult) (pediatric)
- Hypothyroidism, unspecified
- Anxiety disorder, unspecified
- Bariatric surgery status
- Essential (primary) hypertension
- Other chronic pain
- Thrombocytopenia, unspecified
- Iron deficiency anemia, unspecified
- Major depressive disorder, single episode, unspecified
- Sick sinus syndrome
- Gout, unspecified
- Gastrojejunal ulcer, unspecified as acute or chronic, without hemorrhage or perforation
- Retention of urine, unspecified
- Hypotension, unspecified
- Personal history of malignant neoplasm of testis
- Hematuria, unspecified

• Nonspecific elevation of levels of transaminase and lactic acid dehydrogenase [LDH]

• Other fatigue

• Adverse effect of other opioids, initial encounter

• Constipation, unspecified

• Hypovolemia

Hospital Course:

year old male with CLL (on venetoclax) with PMH significant for depression with psychotic features, T2DM, CVA who presented from OSH with malaise, abdominal pain, left leg pain, found to have , presumed UTI and hypotension. ACUTE CONDITIONS ========== #Acute Abdominal Pain (Improved): #Presumed Complicated UTI: #Urinary Retention (resolved) (resolved) #Hematuria: Patient with suprapubic tenderness at OSH, occurred in setting of acute urinary retention which corresponds to location of lower abdominal pain. Significant improvement after foley placement. However, noted worsening of abdominal pain on which prompted further imaging with CT A/P. Alternate cause could be due to recent jejunal ulcer vs. known gastric fistula causing intra-abdominal complication that was diagnosed via CT scan and EGD last admission on (less likely as abdomen is benign currently). Urinalysis grossly positive from therefore, initiated ceftriaxone. However, culture negative. Given UA results on admission, presenting symptoms and high risk for infection in s/o CLL and treatment, decision was made to continue a course of ceftriaxone but extended to a s would be a complicated UTI. CT A/P does not show an acute intra-abdominal process but noted gastrogastric fistula or bypass reversal (not new and unlikely to cause his pain). Also, consider role of constipation as possible cause of abdominal discomfort and retention. -Lactate unremarkable at 0.9. -Renal U/S negative -Completed ceftriaxone x7D (D1: -constipation relief after BM -GI prophylaxis: protonix and carafate -will schedule outpatient urology appointment to further work up hematuria and cause of urinary retention #LLE Pain: Most likely neuropathy or referred pain acute urinary retention. U/S at OSH did not show DVT. No tenderness or deformity to warrant x-ray or cross sectional imaging. Restarted home gabapentin 100mg TID on with improvement. following. Plan to resume services at discharge #Constipation: currently resolved, rec continuing bowel regimen on discharge CHRONIC/RESOLVED/STABLE CONDITIONS ========== #Lethargy: Resolved. Likely over-medication with dilaudid in ED on admission . CTH at OSH negative for acute ICH. Over-sedation psych medications also possible but less likely as presented with normal alertness while on home meds versus UTI. FSG wnl on admission. Resumed home psychiatry medications that was originally held due to sedation including topomax, hydroxyzine, and risperidone . Monitor for reoccurrence #Hypotension: Resolved. Likely hypovolemia as appears dry on exam. Anti-HTN meds + diuretics likely contributing factors -IVF prn -Hold losartan and lasix (as above) -Trend BPs, restart metoprolol if becomes hypertensive : Likely hypovolemia-related as improved Cr with fluids. -Renally dose medications, holding Lasix & losartan -Foley discontinued and no issues voiding since -U/S negative for hydronephrosis #CLL: Patient had recurrence of night sweats and noted to have an increase in his white blood cell count with prominent lymphocytosis, consistent with relapsing disease. Given these changes, he was started on ibrutinib. However, given multiple significant bleeding events (GI bleeding and pericardial bleed), further ibrutinib therapy was deferred and venetoclax was initiated. In the setting of active infection concern, venetoclax was held but now restarted on per primary oncologist. -Continue venetoclax 400mg daily -Continue acyclovir for infectious prophylaxis #Transaminitis & HLD: Stable. Uptrending as of ALT 75 (previously 64 on and AST 84 (previously 69 on . Present on prior admits, thought to be drug-induced liver injury of low level, though unclear causative agent as is on so many agents which could potentially lead to transaminitis. Hep serologies in were negative. Given strong indication for current medications, will continue

except for fenofibrate/statin -Trend LFTs daily #T2DM: Continues on with SS per recommendations from last admission. Held metformin on admission. -When not eating, give sliding scale only -Trend FSG, consider re-consulting if trend worsens #Anemia: Noted on last hospitalization to be due to iron deficiency and likely contribution from CLL/Venetoclax -Continue CBC daily -Maintain type and screen -Transfuse Hgb<7 #Thrombocytopenia: Stable. Likely treatment vs. disease. -Trend daily -Transfuse for plt <10 -Maintain type and screen #History of depression with psychotic features: On last hospitalization, had fluctuating mental state, was followed by psychiatry who adjusted his medications by stopping ziprasidone & amitriptyline, decreasing gabapentin, and continuing escitalopram, risperidone, and topirimate -Continue psychiatric medications, resumed sedating medications as above (ex Risperdal, melatonin, hydroxyzine, Topamax) -Trend mental status closely, re-consult psych as needed #SSS status post PPM: Atrial paced per EKG in ED -Continue rivaroxaban 20mg daily -Hold Metoprolol in s/o hypotension as above, restart PRN #History of Gout: Holding colchicine in s/o renal injury. -Continues on allopurinol daily #Hypothyroidism: Dose was adjusted on most recent admission. He continues on synthroid daily, next re-check #History of Jejunal Ulcer: Continues sucralfate/pantoprazole #History of CVA: Had right-sided subcortical lacunar infarcts in with residual mild left-sided weakness, but does not have an effect on mobility. Continues on ASA. CORE MEASURES ========== #FEN: IVF, replete electrolytes, regular diet #Prophylaxis: -DVT: rivaroxaban as above #Access: PORT #HCP: Relationship: son; Phone number: #Code: Full presumed #Disposition: home with services

Microbiology Findings:

Urinalysis grossly positive from therefore, initiated ceftriaxone. However, culture negative.

Antibiotic Plan:

Completed ceftriaxone x7D

Discharge Status:

Activity Status	Ambulatory - Independent.
Level of Consciousness	Alert and interactive.
Mental Status	Clear and coherent.
Code Status	Full presumed

Discharge Instructions:

Dear Mr. , It was a pleasure taking part in your care here at ! Why was I admitted to the hospital? - You were admitted for abdominal pain, urinary retention, and acute kidney injury. What was done for me while I was in the hospital? - We gave you antibiotics for your urinary tract infection - We gave you pain medications as needed What should I do when I leave the hospital? - please check your blood sugars before meals and at bedtime everyday, and bring a log of your readings to your next doctors . - Take all of your medications as prescribed - Follow-up with all of your physicians as directed Sincerely, Your Care Team

New Medications Started:

• Polyethylene Glycol 17 g PO DAILY:PRN Constipation - First Line

Medications Stopped:

• Colchicine 0.6 mg PO DAILY

• Furosemide 20 mg PO DAILY

• Losartan Potassium 50 mg PO DAILY

• Metformin

• Fenofibrate/statin

Previous Medications on Record: May 09, 2150 at 06:21 AM

30 medication(s) documented:

- polyethylene glycol 3350 - Laxative - Saline and Osmotic
- Novolin 70-30 FlexPen U-100 - Human Insulins - Fixed Combinations
- acetaminophen - Analgesic or Antipyretic Non-Opioid
- Senna Laxative - Laxative - Stimulant
- acyclovir - Herpes Antiviral Agent - Purine Analogs
- allopurinol - Hyperuricemia Therapy - Xanthine Oxidase Inhibitors
- aspirin - Salicylate Analgesics
- aspirin - Platelet Aggregation Inhibitors - Salicylates
- atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)
- docusate sodium - Laxative - Surfactant
- epinephrine - Cardiovascular Sympathomimetic - Anaphylaxis Therapy Single Agents
- escitalopram oxalate - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- gabapentin - Anticonvulsant - GABA Analogs
- hydroxyzine HCl - Antianxiety Agent - Antihistamine Type

• Synthroid - Thyroid Hormones - Synthetic T4 (Thyroxine)

• lidocaine - Dermatological - Topical Local Anesthetic Amides

• magnesium oxide - Minerals and Electrolytes - Magnesium

• melatonin - Alternative Therapy - Pineal Hormone Agents

• melatonin - Hypnotics - Melatonin - Single Agents

• metformin - Insulin Response Enhancers - Biguanides

• metoprolol succinate - Beta Blockers Cardiac Selective

• oxycodone - Analgesic Opioid Agonists

• pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)

• risperidone - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisoxazole Deriv

• risperidone - Bipolar Therapy Agents - Atypical Antipsychotics

• rivaroxaban - Direct Factor Xa Inhibitors

• sucralfate - Peptic Ulcer - Gastric Lumen Adherent Cytoprotectives

• topiramate [Topamax] - Anticonvulsant - Monosaccharide Derivatives

• venetoclax - Antineoplastic - B-cell lymphoma-2 (BCL-2) inhibitors

Hospital Admission #20

Admission Time: May 09, 2150 at 04:09 PM

This is the patient's **20th** hospital admission. The patient was admitted from **PHYSICIAN REFERRAL** as an **EW EMER.** admission. The admitting provider was **P01OK3**. Insurance coverage: **Medicaid**. Chief complaint: **Lower abdominal pain and difficulty urinating.**. The primary service provided was **MEDICINE**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 251

Description: ABDOMINAL PAIN

Severity: 3.0

Mortality Risk: 2.0

HCFA DRG Code:

Code: 392

Description: ESOPHAGITIS, GASTROENT & MISC DIGEST DISORDERS W/O MCC

Patient Past History:

Past Medical History: CLL (on venetoclax), Depression with psychotic features, T2DM, Stroke, s/p gastric bypass, s/p cholecystectomy, Paroxysmal Afib, SSS status post PPM, History of Gout, Hypothyroidism, History of Jejunal Ulcer, History of CVA with residual mild left-sided weakness

Family History: N/A

Social History: N/A

History of Present Illness:

Patient with CLL (on venetoclax) with history of depression with psychotic features, T2DM, stroke, s/p gastric bypass and cholecystectomy who presented with lower abdominal pain and difficulty urinating. Patient was able to void normally with PVRs < 50 cc without intervention. Workup for cause of abdominal pain was unrevealing. Patient reported severe lower abdominal pain which he stated was similar to his most recent admission during which he was treated for a UTI. UA, however, revealed no evidence of infection. In addition, CT AP was performed which also did not reveal a cause for the patient's pain. Recent CTA revealed no evidence of mesenterich ischemia. Recent EGD revealed a healing duodenal ulcer for which the patient had been placed on BID PPI. He stated this pain was unlike his ulcer pain. He remained hemodynamically stable and pain was well-controlled with his home regimen of oxycodone, PPI, and Carafate prior to discharge. Regarding urinary retention, patient reported suprapubic tenderness and had a temperature of 100.2. He was initially treated empirically with cefepime. UA however, had no evidence of infection and antibiotics were stopped. In addition, the patient was able to void spontaneously and had PVRs < 50 mls.

Admission Vital Signs:

General Appearance	N/A
Blood Pressure	N/A mmHg
Heart Rate	N/A bpm
Respiratory Rate	N/A breaths/min
Temperature	100.2°F
Oxygen Saturation	N/A

Admission Laboratory Results:

- WBC: 10.0
- Glucose: 384

Admission Medications:

Total of **25** medications on admission:

• Acetaminophen 500 mg PO Q8H:PRN Pain - Mild/Fever

• Acyclovir 400 mg PO Q8H

• Allopurinol mg PO DAILY

• Aspirin 81 mg PO DAILY

• Docusate Sodium 100 mg PO BID

• Escitalopram Oxalate 20 mg PO DAILY

• Gabapentin 100 mg PO TID

• Levothyroxine Sodium 125 mcg PO DAILY

• Lidocaine 5% Patch 3 PTCH TD QPM

• OxyCODONE (Immediate Release) 2.5 mg PO Q6H:PRN Pain - Moderate

• Pantoprazole 40 mg PO Q12H

• Rivaroxaban 20 mg PO DINNER

• Senna 8.6 mg PO BID

• Sucralfate 1 gm PO BID

• Atorvastatin 40 mg PO QPM

• Fenofibrate 54 mg PO DAILY

• HydrOXYzine 10 mg PO Q6H:PRN anxiety

• Magnesium Oxide 400 mg PO BID

• melatonin 6 mg oral qhs

• MetFORMIN XR (Glucophage XR) 1000 mg PO DAILY

• RisperiDONE 3 mg PO QHS

• Topiramate (Topamax) 50 mg PO DAILY

• Venetoclax 400 mg PO DAILY

• Polyethylene Glycol 17 g PO DAILY:PRN Constipation - First Line

• Metoprolol Succinate XL 150 mg PO DAILY

Unit Admission - Hematology/Oncology Intermediate

Admission Time: May 09, 2150 at 07:09 PM

The patient was admitted to **Hematology/Oncology Intermediate** ward. The patient stayed in this unit until **2150-05-10 15:59:58**, for a total duration of **0 days 20 hours 50 minutes**. During this time, various procedures,

laboratory tests, and microbiology events were performed.

Prescriptions Ordered: May 09, 2150 at 08:00 PM

22 medication(s) prescribed:

- Ondansetron 4 mg IV
- Metoprolol Succinate XL 50 mg PO 1.0x/day
- Rivaroxaban 20 mg PO/NG 1.0x/day
- Acetaminophen 325-650 mg PO/NG
- Influenza Vaccine Quadrivalent 0.5 mL IM
- Lidocaine 5% Patch 3 PTCH TD 1.0x/day
- Levothyroxine Sodium 125 mcg PO/NG 1.0x/day
- Aspirin 81 mg PO/NG 1.0x/day
- Topiramate (Topamax) 50 mg PO/NG 1.0x/day
- Acyclovir 400 mg PO/NG 3.0x/day
- Gabapentin 100 mg PO/NG 3.0x/day
- HydrOXYzine 10 mg PO/NG
- Escitalopram Oxalate 20 mg PO/NG 1.0x/day
- HYDROmorphone (Dilaudid) 0.5-1 mg IV
- Sodium Chloride 0.9% Flush 3-10 mL IV 3.0x/day
- Sucralfate 1 gm PO/NG 2.0x/day
- OxyCODONE (Immediate Release) 2.5 mg PO/NG
- Allopurinol 100 mg PO/NG 1.0x/day
- Docusate Sodium 100 mg PO/NG 2.0x/day
- Pantoprazole 40 mg PO 2.0x/day
- Polyethylene Glycol 17 g PO/NG
- Magnesium Oxide 400 mg PO/NG 2.0x/day

Prescriptions Ordered: May 09, 2150 at 09:00 PM

7 medication(s) prescribed:

- Vial 1 VIAL IV 1.0x/day
- Glucose Gel 15 g PO
- Glucagon 1 mg IM
- Atorvastatin 40 mg PO/NG 1.0x/day

• Senna 8.6 mg PO/NG 2.0x/day

• Dextrose 50% 12.5 gm IV

• Heparin Flush (100 units/ml) 5 mL IV

Prescriptions Ordered: May 10, 2150 at 08:00 AM

3 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

• Fenofibrate 48 mg PO 1.0x/day

• Heparin Flush (10 units/ml) 5 mL IV 1.0x/day

Prescriptions Ordered: May 10, 2150 at 12:00 PM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5 mg PO/NG

Discharge Summary

Discharge Time: May 10, 2150 at 03:59 PM

The patient was discharged from **Hematology/Oncology Intermediate** with disposition to **Home With Service**.

Known Allergies: Penicillins, NSAIDS (Non-Steroidal Anti-Inflammatory Drug), erythromycin base, cheeses soft, , cottage, cream cheese

Detailed Allergy List:

• Penicillins
• NSAIDS (Non-Steroidal Anti-Inflammatory Drug)
• erythromycin base
• cheeses soft
• cottage
• cream cheese

Discharge Diagnoses:

Primary Diagnoses:

• Acute Abdominal Pain

Secondary Diagnoses:

• CLL

• Hypothyroidism

• Insulin dependent diabetes mellitus

• Depression with psychotic features

• in remission

Complete Diagnosis List:

• Lower abdominal pain, unspecified

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Hemiplegia and hemiparesis following cerebral infarction affecting left non-dominant side

• Major depressive disorder, single episode, severe with psychotic features

• Retention of urine, unspecified

• Sick sinus syndrome

• Thrombocytopenia, unspecified

• Hypothyroidism, unspecified

• Paroxysmal atrial fibrillation

• Long term (current) use of anticoagulants

• Presence of cardiac pacemaker

• Gout, unspecified

• Anemia in other chronic diseases classified elsewhere

• Type 2 diabetes mellitus with diabetic polyneuropathy

• Long term (current) use of insulin

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Hyperlipidemia, unspecified

• Obstructive sleep apnea (adult) (pediatric)

• Unspecified osteoarthritis, unspecified site

• Localized edema

• Obesity, unspecified

• Other chronic pain

• Dorsalgia, unspecified

• Fever, unspecified

• Body mass index [BMI] 37.0-37.9, adult

• Presence of coronary angioplasty implant and graft

• Personal history of malignant neoplasm of testis

• Bariatric surgery status

Hospital Course:

PATIENT SUMMARY: with CLL (on venetoclax) with history of depression with psychotic features, T2DM, stroke, s/p gastric bypass and cholecystectomy who presented with lower abdominal pain and difficulty urinating. Patient was able to void normally with PVRs < 50 cc without intervention. Workup for cause of abdominal pain was unrevealing. ACUTE ISSUES: #Acute Abdominal Pain Patient reported severe lower abdominal pain which he stated was similar to his most recent admission during which he was treated for a UTI. UA, however, revealed no evidence of infection. In addition, CT AP was performed which also did not reveal a cause for the patient's pain. Recent CTA revealed no evidence of mesenterich ischemia. Recent EGD revealed a healing duodenal ulcer for which the patient had been placed on BID PPI. He stated this pain was unlike his ulcer pain. He remained hemodynamically stable and pain was well-controlled with his home regimen of oxycodone, PPI, and Carafate prior to discharge. #Urinary retention Patient reported suprapubic tenderness and had a temperature of 100.2. He was initially treated empirically with cefepime. UA however, had no evidence of infection and antibiotics were stopped. In addition, the patient was able to void spontaneously and had PVRs < 50 mls. CHRONIC ISSUES: #CLL: Patient had recurrence of night sweats and noted to have an increase in his white blood cell count with prominent lymphocytosis, consistent with relapsing disease. Given these changes, he was started on ibrutinib. However, given multiple significant bleeding events (GI bleeding and pericardial bleed), further ibrutinib therapy was deferred and venetoclax was initiated. In the setting of active infection concern, venetoclax was held but now restarted on per primary oncologist. - Continued venetoclax 400mg daily - Continued acyclovir for infectious prophylaxis # Paroxysmal Afib - Continued home Metoprolol and rivaroxaban #T2DM: Continues on with SS per recommendations from previous admission. - Held metformin on admission. #History of depression with psychotic features: - Continued risperdal, melatonin, hydroxyzine, Topamax #SSS status post PPM: Atrial paced per EKG in ED - Continued rivaroxaban 20mg daily - Continued Metoprolol #History of Gout: -Continued allopurinol daily #Hypothyroidism: - Continued synthroid #History of Jejunal Ulcer: - Continued sucralfate and pantoprazole #History of CVA: Had right-sided subcortical lacunar infarcts in with residual mild left-sided weakness, but does not have an effect on mobility. - Continued ASA. This patient was prescribed, or continued on, an opioid pain medication at the time of discharge (please see the attached medication list for details). As part of our safe opioid prescribing process, all patients are provided with an opioid risks and treatment resource education sheet and encouraged to discuss this therapy with their outpatient providers to determine if opioid pain medication is still indicated.

Microbiology Findings:

URINE CULTURE (Final): NO GROWTH.

Antibiotic Plan:

Antibiotics were stopped as UA had no evidence of infection.

Discharge Status:

Activity Status	N/A
Level of Consciousness	Alert and interactive.

Mental Status	Clear and coherent.
Code Status	N/A

Discharge Instructions:

Dear Mr. , It was a privilege taking care of you at . WHY WAS I IN THE HOSPITAL? - You were having abdominal pain and trouble urinating WHAT HAPPENED TO ME IN THE HOSPITAL? - You had a CT scat of your abdomen which did not reveal any cause for your pain. - You were able to urinate normally. We performed an ultrasound of your bladder which showed that you were able to empty your bladder normally and there was only a small amount of urine left afterwards. - We performed a lab test on your urine and found that there was no infection there. WHAT SHOULD I DO AFTER I LEAVE THE HOSPITAL? - Please attend your upcoming appointment with Dr. on at 1:50 . He will continue to work with you to control your pain. - If you have another flare in your abdominal pain, please call Dr. - attend your urology appointment on at 1:15 . We wish you the best. Sincerely, Your Team

New Medications Started:

• Insulin SC Sliding Scale using HUM Insulin

• Venetoclax (restarted)

Medications Stopped:

• Metformin (held on admission)

• Cefepime

*Time gap of **52 days, 23 hours, 50 minutes** since last event*

Emergency Department Visit #23

Admission Time: July 02, 2150 at 03:50 PM

This is the patient's **23rd** Emergency Department visit. The patient arrived via **AMBULANCE**. The patient departed at **2150-07-02 23:19:00**, staying for a duration of **0 days 7 hours 29 minutes**.

ED Disposition: HOME - Patient was discharged directly from Emergency Department without hospital admission.

Initial Assessment:

Chief Complaint: R Leg pain, R Leg swelling

Blood Pressure	158.0/44.0 mmHg
Heart Rate	78.0 bpm
Respiratory Rate	19.0 breaths/min
Oxygen Saturation	98.0%
Temperature	97.7°F
Pain Score	5
Acuity Level	3.0

Emergency Department Discharge Summary

Treatment: The patient received evaluation and treatment in the Emergency Department. Medical staff determined the patient was stable for discharge to **HOME**.

Follow-up Instructions: Patient advised to follow up with primary care physician or return to ED if symptoms worsen.

Medications Administered: July 02, 2150 at 05:35 PM

Total of **7** medication(s) administered:

• HYDROmorphone (Dilaudid)

• Acetaminophen

• Atorvastatin

• Gabapentin

• Metoprolol Tartrate

• Heparin Flush 100 Unit / mL

• Heparin Flush 100 Unit / mL

Previous Medications on Record: July 02, 2150 at 06:48 PM

59 medication(s) documented:

• acyclovir - Herpes Antiviral Agent - Purine Analogs

• alcohol swabs - Antiseptic - Alcohols

• allopurinol - Hyperuricemia Therapy - Xanthine Oxidase Inhibitors

• amitriptyline - Antidepressant-Tricyclics and Related (Non-Select Reuptake Inhibitors)

• aspirin - Salicylate Analgesics

• aspirin - Platelet Aggregation Inhibitors - Salicylates

• atorvastatin - Antihyperlipidemic - HMG CoA Reductase Inhibitors (statins)

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [Blood Glucose Monitoring] - Medical Supply, FDB Superset

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supplies and DME - Glucose Monitoring Test Supplies

• blood-glucose meter [FreeStyle Freedom Lite] - Medical Supply, FDB Superset

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [FreeStyle Lite Strips] - Medical Supply, FDB Superset

• blood sugar diagnostic [OneTouch Verio] - Medical Supplies and DME - Blood Glucose Tests

• blood sugar diagnostic [OneTouch Verio] - Medical Supply, FDB Superset

• camphor-menthol [Anti-Itch (menthol/camphor)] - Dermatological - Antipruritics Combinations

• capsaicin - Dermatological Irritants-Counter-Irritant Single Agents

• cholecalciferol (vitamin D3) - Vitamins - D Derivatives

• divalproex [Depakote] - Anticonvulsant - Carboxylic Acid Derivatives

• divalproex [Depakote] - Bipolar Therapy Agents - Anticonvulsant Type

• docusate sodium - Laxative - Surfactant

• epinephrine - Cardiovascular Sympathomimetic - Anaphylaxis Therapy Single Agents

• ergocalciferol (vitamin D2) - Vitamins - D Derivatives

- escitalopram oxalate - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- fenofibrate - Antihyperlipidemic - Fibric Acid Derivatives
- fluoxetine - Antidepressant - Selective Serotonin Reuptake Inhibitors (SSRIs)
- furosemide - Diuretic - Loop
- gabapentin - Anticonvulsant - GABA Analogs
- hydroxyzine HCl - Antianxiety Agent - Antihistamine Type
- hydroxyzine HCl - Antianxiety Agent - Antihistamine Type
- insulin asp prt-insulin aspart [Novolog Mix 70-30FlexPen U-100] - Insulin Analogs - Fixed Combinations
- levothyroxine [Euthyrox] - Thyroid Hormones - Synthetic T4 (Thyroxine)
- lidocaine - Dermatological - Topical Local Anesthetic Amides
- losartan - Angiotensin II Receptor Blockers (ARBs)
- magnesium oxide - Minerals and Electrolytes - Magnesium
- melatonin - Alternative Therapy - Pineal Hormone Agents
- melatonin - Hypnotics - Melatonin - Single Agents
- metformin - Insulin Response Enhancers - Biguanides
- metoprolol succinate - Beta Blockers Cardiac Selective
- nystatin-triamcinolone - Dermatological - Antifungal-Glucocorticoid Combinations
- oxycodone - Analgesic Opioid Agonists
- pantoprazole - Gastric Acid Secretion Reducing Agents - Proton Pump Inhibitors (PPIs)
- pen needle, diabetic [Pen Needle] - Medical Supplies and DME - Insulin Needles-Syringes and Admin Supplies
- pen needle, diabetic [Pen Needle] - Medical Supply, FDB Superset
- polyethylene glycol 3350 [Miralax] - Laxative - Saline and Osmotic
- risperidone - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisoxazole Deriv
- risperidone - Bipolar Therapy Agents - Atypical Antipsychotics
- sennosides [senna] - Laxative - Stimulant
- simethicone [Gas Relief 80] - Gastrointestinal Antiflatulents
- sucralfate [Carafate] - Peptic Ulcer - Gastric Lumen Adherent Cytoprotectives
- topiramate - Anticonvulsant - Monosaccharide Derivatives
- triamcinolone acetonide - Dermatological - Glucocorticoid
- ziprasidone HCl - Antipsychotic - Atypical Dopamine-Serotonin Antag- Benzisothiazolones
- ziprasidone HCl - Bipolar Therapy Agents - Atypical Antipsychotics
- zolpidem - Sedative-Hypnotic - GABA-Receptor Modulators

• colchicine - Gout Acute Therapy - Antimitotics

• cyanocobalamin (vitamin B-12) - Vitamins - B-12, Cyanocobalamin and derivatives

• rivaroxaban - Direct Factor Xa Inhibitors

• venetoclax - Antineoplastic - B-cell lymphoma-2 (BCL-2) inhibitors

Unit Admission - Medicine

Admission Time: November 14, 2151 at 01:06 PM

The patient was admitted to **Medicine** ward. The patient stayed in this unit until **2151-11-20 12:10:27**, for a total duration of **5 days 23 hours 4 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: November 14, 2151 at 02:00 PM

1 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 3-10 mL IV 3.0x/day

Prescriptions Ordered: November 14, 2151 at 05:00 PM

3 medication(s) prescribed:

• Glucose Gel 15 g PO

• Glucagon 1 mg IM

• Dextrose 50% 12.5 gm IV

Prescriptions Ordered: November 14, 2151 at 06:00 PM

17 medication(s) prescribed:

• Pantoprazole 40 mg PO 2.0x/day

• Polyethylene Glycol 17 g PO/NG

• Levothyroxine Sodium 125 mcg PO/NG 1.0x/day

• Aspirin 81 mg PO/NG 1.0x/day

• Atorvastatin 80 mg PO/NG 1.0x/day

• Topiramate (Topamax) 100 mg PO/NG 2.0x/day

• Gabapentin 300 mg PO/NG 3.0x/day

• HydrOXYzine 10 mg PO/NG

• Allopurinol 100 mg PO/NG 1.0x/day

• Magnesium Oxide 400 mg PO/NG 2.0x/day

• Acyclovir 400 mg PO/NG 3.0x/day

• Fenofibrate 145 mg PO 1.0x/day

• Escitalopram Oxalate 20 mg PO/NG 1.0x/day

• Metoprolol Succinate XL 150 mg PO 1.0x/day

• Senna 8.6 mg PO/NG 2.0x/day

• Docusate Sodium 100 mg PO/NG 2.0x/day

• Heparin Flush (100 units/ml) 5 mL IV

Prescriptions Ordered: November 14, 2151 at 07:00 PM

2 medication(s) prescribed:

• Acetaminophen 1000 mg PO/NG

• Lidocaine Jelly 2% 1 Appl TP 1.0x/day

Prescriptions Ordered: November 14, 2151 at 10:00 PM

1 medication(s) prescribed:

• Insulin 20 UNIT SC 1.0x/day

Prescriptions Ordered: November 15, 2151 at 01:00 AM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5 mg PO/NG 1.0x/day

Prescriptions Ordered: November 15, 2151 at 02:00 AM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 2.5 mg PO/NG 1.0x/day

Prescriptions Ordered: November 15, 2151 at 08:00 AM

4 medication(s) prescribed:

• Heparin Flush (10 units/ml) 5 mL IV 1.0x/day

• Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

• RisperiDONE 4 mg PO 1.0x/day

• Fenofibrate 145 mg PO 1.0x/day

Prescriptions Ordered: November 15, 2151 at 03:00 PM

1 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

Prescriptions Ordered: November 15, 2151 at 05:00 PM

1 medication(s) prescribed:

• Rivaroxaban 20 mg PO/NG 1.0x/day

Prescriptions Ordered: November 15, 2151 at 10:00 PM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5 mg PO/NG

Prescriptions Ordered: November 16, 2151 at 12:00 PM

2 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

• Insulin 5 UNIT SC 1.0x/day

Prescriptions Ordered: November 16, 2151 at 07:00 PM

1 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

Prescriptions Ordered: November 16, 2151 at 08:00 PM

1 medication(s) prescribed:

• Vial 1 VIAL IV 2.0x/day

Prescriptions Ordered: November 17, 2151 at 10:00 AM

1 medication(s) prescribed:

• Vial 1 VIAL IV 2.0x/day

Prescriptions Ordered: November 17, 2151 at 12:00 PM

1 medication(s) prescribed:

• Insulin 7 UNIT SC 1.0x/day

Prescriptions Ordered: November 17, 2151 at 03:00 PM

3 medication(s) prescribed:

• Vial 1 VIAL IV 1.0x/day

• Lactated Ringers 1000 mL IV

• Lactated Ringers 1000 mL IV

Prescriptions Ordered: November 18, 2151 at 08:00 AM

2 medication(s) prescribed:

• Insulin 8 UNIT SC 1.0x/day

• Insulin 10 UNIT SC 1.0x/day

Prescriptions Ordered: November 18, 2151 at 05:00 PM

1 medication(s) prescribed:

• RisperiDONE 1 mg PO

Prescriptions Ordered: November 18, 2151 at 10:00 PM

1 medication(s) prescribed:

• RisperiDONE 2 mg PO 1.0x/day

Prescriptions Ordered: November 19, 2151 at 03:00 AM

1 medication(s) prescribed:

• Ramelteon 8 mg PO/NG

Prescriptions Ordered: November 19, 2151 at 08:00 AM

1 medication(s) prescribed:

• Insulin 50 UNIT SC 1.0x/day

Prescriptions Ordered: November 19, 2151 at 08:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: November 20, 2151 at 12:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Discharge Summary

Discharge Time: November 20, 2151 at 12:10 PM

The patient was discharged from **Medicine** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Urinary tract infection, site not specified

• Toxic encephalopathy

• Hemiplegia and hemiparesis following cerebral infarction affecting left non-dominant side

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Chronic diastolic (congestive) heart failure

- Acute kidney failure, unspecified
- Major depressive disorder, single episode, severe with psychotic features
- Immunodeficiency due to conditions classified elsewhere
- Hypo-osmolality and hyponatremia
- Other pancytopenia
- Somnolence
- Adverse effect of multiple unspecified drugs, medicaments and biological substances, initial encounter
- Adverse effect of other antipsychotics and neuroleptics, initial encounter
- Proteus (mirabilis) (morganii) as the cause of diseases classified elsewhere
- Pressure ulcer of sacral region, unspecified stage
- Other specified disorders of the male genital organs
- Hypovolemia
- Other symptoms and signs involving cognitive functions and awareness
- Other speech disturbances
- Other specified disorders of the skin and subcutaneous tissue
- Paroxysmal atrial fibrillation
- Type 2 diabetes mellitus with hyperglycemia
- Type 2 diabetes mellitus with diabetic polyneuropathy
- Pure hypercholesterolemia, unspecified
- Hypertensive heart disease with heart failure
- Sick sinus syndrome
- Atherosclerotic heart disease of native coronary artery without angina pectoris
- Morbid (severe) obesity due to excess calories
- Obstructive sleep apnea (adult) (pediatric)
- Hypothyroidism, unspecified
- Unspecified glaucoma
- Splenomegaly, not elsewhere classified
- Anxiety disorder, unspecified
- Contact with and (suspected) exposure to COVID-19
- Body mass index [BMI] 33.0-33.9, adult
- Long term (current) use of anticoagulants
- Personal history of malignant neoplasm of testis
- History of falling

- Long term (current) use of insulin

*Time gap of **421 days, 3 hours** since last event*

Emergency Department Visit #25

Admission Time: January 14, 2153 at 03:11 PM

This is the patient's **25th** Emergency Department visit. The patient arrived via **N/A**. The patient departed at **2153-01-15 09:10:00**, staying for a duration of **0 days 17 hours 59 minutes**.

Laboratory Tests Performed: January 14, 2153 at 03:40 PM

Total of **59** tests performed, with **17** abnormal result(s).

Chemistry

Test	Value	Reference Range
Light Green Top Hold	N/A Blood	N/A
Acetaminophen	N/A	10.0-30.0
Alanine Aminotransferase (ALT)	12.0IU/L	0.0-40.0
Albumin	**3.3g/dL**	3.5-5.2
Alkaline Phosphatase	75.0IU/L	40.0-130.0
Anion Gap	14.0mEq/L	10.0-18.0
Asparate Aminotransferase (AST)	28.0IU/L	0.0-40.0
Bicarbonate	**20.0mEq/L**	22.0-32.0
Bilirubin, Total	0.2mg/dL	0.0-1.5
Chloride	102.0mEq/L	96.0-108.0
Creatinine	**1.6mg/dL**	0.5-1.2
Ethanol	N/A	0.0-10.0
Glucose	87.0mg/dL	70.0-100.0
H	48.0 Blood	N/A
I	0.0 Blood	N/A
Lipase	12.0IU/L	0.0-60.0
NTproBNP	**1607.0pg/mL**	0.0-229.0

Potassium	5.0mEq/L	3.5-5.4
Salicylate	N/A	2.0-25.0
Sodium	136.0mEq/L	135.0-147.0
Urea Nitrogen	19.0mg/dL	6.0-20.0
L	14.0 Blood	N/A
STX1	N/A Blood	N/A
STX2	N/A Blood	N/A
STX3	N/A Blood	N/A
Estimated GFR (CKD- EPI Refit)	47.0mL/min/1.73m2 Blood	N/A
Blue Top Hold	N/A Blood	N/A

Blood Gas

Test	Value	Reference Range
Lactate	**2.7mmol/L**	0.5-2.0
Specimen Type	N/A Blood	N/A

Hematology

Test	Value	Reference Range
Absolute Lymphocyte Count	**4.95K/uL**	1.2-3.7
Anisocytosis	**N/A Blood**	N/A
Atypical Lymphocytes	**1.0%**	0.0-0.0
Basophils	0.0%	0.0-1.0
Elliptocytes	**N/A Blood**	N/A
Eosinophils	2.0%	1.0-7.0
Hematocrit	**28.3%**	40.0-51.0
Hemoglobin	**8.9g/dL**	13.7-17.5
Lymphocytes	**54.0%**	19.0-53.0
MCH	26.0pg	26.0-32.0
MCHC	**31.4g/dL**	32.0-37.0

MCV	83.0fL	82.0-98.0
Microcytes	**N/A Blood**	N/A
Monocytes	9.0%	5.0-13.0
Neutrophils	34.0%	34.0-71.0
Ovalocytes	**N/A Blood**	N/A
Platelet Count	**131.0K/uL**	150.0-400.0
Platelet Smear	**N/A Blood**	N/A
Poikilocytosis	**N/A Blood**	N/A
RDW	**18.3%**	10.5-15.5
Red Blood Cells	**3.42m/uL**	4.6-6.1
Teardrop Cells	**N/A Blood**	N/A
White Blood Cells	9.0K/uL	4.0-10.0
Absolute Basophil Count	**0.0K/uL**	0.01-0.08
Absolute Eosinophil Count	0.18K/uL	0.04-0.54
Absolute Monocyte Count	**0.81K/uL**	0.2-0.8
Absolute Neutrophil Count	3.06K/uL	1.6-6.1
Echinocytes	**N/A Blood**	N/A
RBC Morphology	**N/A Blood**	N/A
RDW-SD	**55.0fL**	35.1-46.3

Laboratory Tests Performed: January 14, 2153 at 06:54 PM

Total of **3** tests performed, with **3** abnormal result(s).

Hematology

Test	Value	Reference Range
INR(PT)	**1.5**	0.9-1.1
PT	**16.9sec**	9.4-12.5
PTT	**40.5sec**	25.0-36.5

Laboratory Tests Performed: January 14, 2153 at 07:46 PM

Total of **13** tests performed, with **6** abnormal result(s).

Chemistry

Test	Value	Reference Range
EDTA Hold	N/A Blood	N/A
Albumin, Ascites	1.0g/dL Ascites	N/A
Creatinine, Ascites	1.4mg/dL Ascites	N/A
Glucose, Ascites	89.0mg/dL Ascites	N/A
Lactate Dehydrogenase, Ascites	76.0IU/L Ascites	N/A
Total Protein, Ascites	1.5g/dL Ascites	N/A

Hematology

Test	Value	Reference Range
Lymphocytes	**28.0%**	0.0-0.0

Hospital Admission #22

Admission Time: January 15, 2153 at 06:43 AM

This is the patient's **22nd** hospital admission. The patient was admitted from **CLINIC REFERRAL** as an **OBSERVATION ADMIT** admission. The admitting provider was **P23ZZK**. Insurance coverage: **Medicaid**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 951

Description: MODERATELY EXTENSIVE O.R. PROCEDURE UNRELATED TO PRINCIPAL DIAGNOSIS

Severity: 4.0

Mortality Risk: 4.0

HCFA DRG Code:

Code: 987

Description: NON-EXTENSIVE O.R. PROCEDURES UNRELATED TO PRINCIPAL DIAGNOSIS WITH MCC

Unit Admission - Medicine

Admission Time: January 15, 2153 at 09:10 AM

The patient was admitted to **Medicine** ward. The patient stayed in this unit until **2153-02-16 15:17:10**, for a total duration of **32 days 6 hours 7 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: January 15, 2153 at 10:00 AM

1 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 3-10 mL IV 3.0x/day

Prescriptions Ordered: January 15, 2153 at 01:00 PM

20 medication(s) prescribed:

• Heparin Flush (100 units/ml) 5 mL IV

• Escitalopram Oxalate 20 mg PO/NG 1.0x/day

• 5% Dextrose 50 mL IV 1.0x/day

• Albuterol Inhaler 1-2 PUFF IH

• HYDROmorphone (Dilaudid) 0.5-1 mg IV 1.0x/day

• Rivaroxaban 20 mg PO/NG 1.0x/day

• Acetaminophen 650 mg PO/NG

• Methadone 5 mg PO/NG 3.0x/day

• Acyclovir 400 mg PO/NG 3.0x/day

• Lactulose 30 mL PO/NG 12.0x/day

• Sucralfate 1 gm PO/NG

• Pantoprazole 40 mg PO 1.0x/day

• Glucagon 1 mg IM

• Glucose Gel 1 TUBE PO

• rifAXIMin 550 mg PO/NG 2.0x/day

• Ferrous Sulfate 325 mg PO/NG 1.0x/day

• Fluticasone Propionate NASAL 1 SPRY NU

• Dextrose 10% in Water (D10W) 100 mL IV BOLUS

• Allopurinol 100 mg PO/NG 1.0x/day

• Levothyroxine Sodium 125 mcg PO/NG 1.0x/day

Prescriptions Ordered: January 15, 2153 at 02:00 PM

3 medication(s) prescribed:

• Metoprolol Tartrate 50 mg PO/NG 3.0x/day

• Lactulose 30 mL PO/NG 3.0x/day

• Methadone 5 mg PO/NG 3.0x/day

Prescriptions Ordered: January 15, 2153 at 03:00 PM

1 medication(s) prescribed:

• Lidocaine 1% 1 mL SC 1.0x/day

Prescriptions Ordered: January 15, 2153 at 05:00 PM

2 medication(s) prescribed:

• Albumin 25% 100 g IV 1.0x/day

• Methadone 5 mg PO/NG 3.0x/day

Prescriptions Ordered: January 15, 2153 at 07:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25-0.5 mg IV

Prescriptions Ordered: January 15, 2153 at 08:00 PM

2 medication(s) prescribed:

• Senna 8.6 mg PO/NG 2.0x/day

• Methadone 5 mg PO/NG 2.0x/day

Prescriptions Ordered: January 15, 2153 at 10:00 PM

2 medication(s) prescribed:

• Gabapentin 100 mg PO/NG 1.0x/day

• Insulin 20 UNIT SC 1.0x/day

Prescriptions Ordered: January 16, 2153 at 08:00 AM

3 medication(s) prescribed:

• Heparin Flush (10 units/ml) 5 mL IV 1.0x/day

• Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

• Methadone 2.5 mg PO/NG 2.0x/day

Prescriptions Ordered: January 16, 2153 at 10:00 AM

1 medication(s) prescribed:

• 5% Dextrose 50 mL IV 1.0x/day

Prescriptions Ordered: January 16, 2153 at 11:00 AM

3 medication(s) prescribed:

• Albumin 25% 100 g IV 1.0x/day

• Lidocaine Jelly 2% (Glydo) 1 Appl TP

• Lactulose 30 mL PO/NG 12.0x/day

Microbiology Tests Performed: January 16, 2153 at 11:40 AM

Total of **1** microbiology result(s):

REFLEX URINE CULTURE: URINE:

• GRAM POSITIVE BACTERIA

Prescriptions Ordered: January 16, 2153 at 01:00 PM

1 medication(s) prescribed:

• Senna 8.6 mg PO/NG

Prescriptions Ordered: January 16, 2153 at 02:00 PM

2 medication(s) prescribed:

• Vial 1 VIAL IV 1.0x/day

• Metoprolol Tartrate 50 mg PO/NG 3.0x/day

Prescriptions Ordered: January 16, 2153 at 03:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: January 16, 2153 at 04:00 PM

1 medication(s) prescribed:

• Methadone 2.5 mg PO/NG

Prescriptions Ordered: January 16, 2153 at 08:00 PM

1 medication(s) prescribed:

• Methadone 2.5 mg PO/NG 2.0x/day

Prescriptions Ordered: January 16, 2153 at 10:00 PM

1 medication(s) prescribed:

• Insulin 15 UNIT SC 1.0x/day

1 medication(s) prescribed:

• Cephalexin 500 mg PO/NG 4.0x/day

Microbiology Tests Performed: January 28, 2153 at 05:24 PM

Total of **1** microbiology result(s):

REFLEX URINE CULTURE: URINE:

• < 10,000 CFU/mL.

Prescriptions Ordered: January 29, 2153 at 08:00 PM

1 medication(s) prescribed:

• Apixaban 5 mg PO/NG 2.0x/day

Prescriptions Ordered: January 29, 2153 at 10:00 PM

1 medication(s) prescribed:

• OxyCODONE (Immediate Release) 5 mg PO/NG 1.0x/day

Prescriptions Ordered: January 31, 2153 at 10:00 AM

1 medication(s) prescribed:

• Albumin 25% 50 g IV 1.0x/day

Prescriptions Ordered: January 31, 2153 at 11:00 AM

2 medication(s) prescribed:

• Albumin 25% 25 g IV 1.0x/day

• Albumin 25% 25 g IV 1.0x/day

Microbiology Tests Performed: January 31, 2153 at 02:54 PM

Total of **1** microbiology result(s):

REFLEX URINE CULTURE: URINE:

• YEAST

Procedure(s) Performed: February 01, 2153 at 12:00 AM

2 procedure(s) performed (Source: ICD):

• Drainage of Peritoneal Cavity, Percutaneous Approach, Diagnostic

• Inspection of Upper Intestinal Tract, Via Natural or Artificial Opening Endoscopic

Microbiology Tests Performed: February 01, 2153 at 09:37 AM

Total of **3** microbiology result(s):

GRAM STAIN: PERITONEAL FLUID:

• 2+ (1-5 per 1000X FIELD): POLYMORPHONUCLEAR LEUKOCYTES. NO MICROORGANISMS SEEN. This is a concentrated smear made by cytospin method, please refer to hematology for a quantitative white blood cell count, if applicable.

FLUID CULTURE: PERITONEAL FLUID:

• NO GROWTH.

ANAEROBIC CULTURE: PERITONEAL FLUID:

• NO GROWTH.

Prescriptions Ordered: February 01, 2153 at 03:00 PM

1 medication(s) prescribed:

• Albumin 25% 100 g IV 1.0x/day

Prescriptions Ordered: February 02, 2153 at 11:00 AM

1 medication(s) prescribed:

• Albumin 25% 75 g IV 1.0x/day

Prescriptions Ordered: February 02, 2153 at 02:00 PM

1 medication(s) prescribed:

• Midodrine 5 mg PO/NG 3.0x/day

Procedure(s) Performed: February 03, 2153 at 12:00 AM

1 procedure(s) performed (Source: ICD):

• Drainage of Peritoneal Cavity, Percutaneous Approach

Microbiology Tests Performed: February 03, 2153 at 06:02 AM

Total of **1** microbiology result(s):

REFLEX URINE CULTURE: URINE:

• NO GROWTH.

Microbiology Tests Performed: February 03, 2153 at 06:45 AM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Microbiology Tests Performed: February 03, 2153 at 10:40 AM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Prescriptions Ordered: February 03, 2153 at 01:00 PM

1 medication(s) prescribed:

• Octreotide Acetate 100 mcg SC 3.0x/day

Prescriptions Ordered: February 03, 2153 at 02:00 PM

3 medication(s) prescribed:

• Midodrine 7.5 mg PO/NG 3.0x/day

• Acyclovir 400 mg PO/NG 2.0x/day

• Metoprolol Tartrate 25 mg PO/NG 3.0x/day

Microbiology Tests Performed: February 03, 2153 at 02:22 PM

• Influenza Virus Vaccine 0.5 mL IM

• Pneumococcal Vac Polyvalent 0.5 mL IM

Prescriptions Ordered: February 13, 2153 at 03:00 AM

7 medication(s) prescribed:

• Iso-Osmotic Dextrose 100 mL IV 1.0x/day

• Acetaminophen 650 mg PO/NG

• Bisacodyl 10 mg PR

• Dextrose 50% 12.5 gm IV

• Senna 1 TAB PO

• Glucagon 1 mg IM

• Insulin 0 UNIT SC

Prescriptions Ordered: February 13, 2153 at 04:00 AM

6 medication(s) prescribed:

• 5% Dextrose 1000 mL IV

• 5% Dextrose 250 mL IV 1.0x/day

• 5% Dextrose 500 mL IV 1.0x/day

• Sodium Chloride 0.9% Flush 3 mL IV

• 0.9% Sodium Chloride 1000 mL IV

• Iso-Osmotic Dextrose 50 mL IV 1.0x/day

Prescriptions Ordered: February 13, 2153 at 05:00 AM

5 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

• Oseltamivir 75 mg PO/NG 1.0x/day

• Insulin 0 UNIT SC

• Ipratropium Bromide Neb 1 NEB IH

• Albuterol 0.083% Neb Soln 1 NEB IH

Prescriptions Ordered: February 13, 2153 at 07:00 AM

1 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

Prescriptions Ordered: February 13, 2153 at 08:00 AM

5 medication(s) prescribed:

• Heparin 5000 UNIT SC 3.0x/day

• Metoprolol Tartrate 12.5 mg PO/NG 2.0x/day

• 5% Dextrose 500 mL IV 1.0x/day

• 5% Dextrose 250 mL IV 1.0x/day

• 0.9% Sodium Chloride 100 mL IV DRIP

Prescriptions Ordered: February 13, 2153 at 09:00 AM

3 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 3 mL IV

• Sodium Chloride 0.9% Flush 3 mL IV

• Sodium Chloride 0.9% Flush 3 mL IV

Prescriptions Ordered: February 13, 2153 at 10:00 AM

5 medication(s) prescribed:

• Aspirin 81 mg PO/NG 1.0x/day

• Simvastatin 20 mg PO/NG 1.0x/day

• Lactated Ringers 1000 mL IV

• 5% Dextrose 1000 mL IV

• Citalopram 20 mg PO/NG 1.0x/day

Prescriptions Ordered: February 13, 2153 at 11:00 AM

1 medication(s) prescribed:

• Iso-Osmotic Dextrose 50 mL IV 1.0x/day

Prescriptions Ordered: February 13, 2153 at 02:00 PM

3 medication(s) prescribed:

• 0.9% Sodium Chloride 1000 mL IV

• Lactated Ringers 1000 mL IV

• 0.9% Sodium Chloride 1000 mL IV

Prescriptions Ordered: February 13, 2153 at 06:00 PM

5 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

• Bag 50 mL IV 1.0x/day

• 0.9% Sodium Chloride 1000 mL IV

• 0.45% Sodium Chloride 1000 mL IV

• 0.9% Sodium Chloride 500 mL IV 1.0x/day

Prescriptions Ordered: February 13, 2153 at 07:00 PM

2 medication(s) prescribed:

• Iso-Osmotic Dextrose 50 mL IV 3.0x/day

• 0.45% Sodium Chloride 1000 mL IV

Prescriptions Ordered: February 13, 2153 at 08:00 PM

1 medication(s) prescribed:

• Ursodiol 300 mg PO/NG 2.0x/day

Prescriptions Ordered: February 13, 2153 at 10:00 PM

2 medication(s) prescribed:

• 0.45% Sodium Chloride 1000 mL IV

• Insulin 36 UNIT SC 1.0x/day

1 medication(s) prescribed:

• Phytonadione 5 mg PO/NG 1.0x/day

Prescriptions Ordered: February 15, 2153 at 01:00 PM

1 medication(s) prescribed:

• Insulin 0 UNIT SC

Prescriptions Ordered: February 15, 2153 at 03:00 PM

1 medication(s) prescribed:

• Albumin 25% 25 g IV 1.0x/day

Prescriptions Ordered: February 15, 2153 at 05:00 PM

2 medication(s) prescribed:

• Insulin 0 UNIT SC

• Azithromycin 250 mg PO/NG 1.0x/day

Prescriptions Ordered: February 15, 2153 at 10:00 PM

1 medication(s) prescribed:

• Insulin 5 UNIT SC 1.0x/day

Prescriptions Ordered: February 16, 2153 at 01:00 AM

1 medication(s) prescribed:

• Iso-Osmotic Dextrose 200 mL IV 1.0x/day

Prescriptions Ordered: February 16, 2153 at 12:00 PM

1 medication(s) prescribed:

• 0.9% Sodium Chloride 500 mL IV 1.0x/day

Discharge Summary

Discharge Time: February 16, 2153 at 03:17 PM

The patient was discharged from **Medicine** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Alcoholic cirrhosis of liver with ascites

• Other toxic encephalopathy

• Spontaneous bacterial peritonitis

• Hepatorenal syndrome

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Acute kidney failure, unspecified

• Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease

• Chronic diastolic (congestive) heart failure

• Hemiplegia and hemiparesis following cerebral infarction affecting left non-dominant side

• Opioid dependence, uncomplicated

• Acquired coagulation factor deficiency

- Portal hypertension
- Urinary tract infection, site not specified
- Hypo-osmolality and hyponatremia
- Acidosis
- Nonalcoholic steatohepatitis (NASH)
- Type 2 diabetes mellitus with diabetic chronic kidney disease
- Chronic kidney disease, stage 3 unspecified
- Sick sinus syndrome
- Type 2 diabetes mellitus with diabetic polyneuropathy
- Hypothyroidism, unspecified
- Hyperlipidemia, unspecified
- Atherosclerotic heart disease of native coronary artery without angina pectoris
- Paroxysmal atrial fibrillation
- Obstructive sleep apnea (adult) (pediatric)
- Hepatic failure, unspecified without coma
- Thrombocytopenia, unspecified
- Major depressive disorder, single episode, unspecified
- Other chronic pain
- Deficiency of other specified B group vitamins
- Other iron deficiency anemias
- Vitamin D deficiency, unspecified
- Insomnia, unspecified
- Pressure ulcer of sacral region, unstageable
- Gastrojejunal ulcer, unspecified as acute or chronic, without hemorrhage or perforation
- Other specified bacterial agents as the cause of diseases classified elsewhere
- Gout, unspecified
- Pruritus, unspecified
- Obesity, unspecified

*Time gap of **30 days, 2 hours, 58 minutes** since last event*

Emergency Department Visit #26

Admission Time: March 18, 2153 at 06:16 PM

This is the patient's **26th** Emergency Department visit. The patient arrived via **N/A**. The patient departed at **2153-03-19 06:33:52**, staying for a duration of **0 days 12 hours 17 minutes**.

Laboratory Tests Performed: March 18, 2153 at 10:40 PM

Total of **52** tests performed, with **23** abnormal result(s).

Chemistry

Test	Value	Reference Range
Alanine Aminotransferase (ALT)	7.0IU/L	0.0-40.0
Albumin	**3.4g/dL**	3.5-5.2
Alkaline Phosphatase	107.0IU/L	40.0-130.0
Anion Gap	13.0mEq/L	10.0-18.0
Asparate Aminotransferase (AST)	20.0IU/L	0.0-40.0
Bicarbonate	**17.0mEq/L**	22.0-32.0
Bilirubin, Total	0.2mg/dL	0.0-1.5
Chloride	**95.0mEq/L**	96.0-108.0
Creatinine	**1.3mg/dL**	0.5-1.2
Glucose	**106.0mg/dL**	70.0-100.0
H	17.0 Blood	N/A
I	0.0 Blood	N/A
Lipase	15.0IU/L	0.0-60.0
NTproBNP	**904.0pg/mL**	0.0-229.0
Potassium	**6.2mEq/L**	3.5-5.4
Sodium	**125.0mEq/L**	135.0-147.0
Troponin T	N/A	0.0-0.01

Urea Nitrogen	**30.0mg/dL**	6.0-20.0
L	33.0 Blood	N/A
Estimated GFR (CKD- EPI Refit)	61.0mL/min/1.73m2 Blood	N/A
Green Top Hold (plasma)	N/A Blood	N/A

Blood Gas

Test	Value	Reference Range
Potassium, Whole Blood	**5.6mEq/L**	3.5-5.4

Hematology

Test	Value	Reference Range
Absolute Lymphocyte Count	**19.24K/uL**	1.2-3.7
Acanthocytes	**N/A Blood**	N/A
Anisocytosis	**N/A Blood**	N/A
Basophils	0.0%	0.0-1.0
Eosinophils	1.0%	1.0-7.0
Hematocrit	**25.7%**	40.0-51.0
Hemoglobin	**8.1g/dL**	13.7-17.5
Hypochromia	**N/A Blood**	N/A
Lymphocytes	**84.0%**	19.0-53.0
MCH	27.8pg	26.0-32.0
MCHC	**31.5g/dL**	32.0-37.0
MCV	88.0fL	82.0-98.0
Monocytes	**2.0%**	5.0-13.0
Neutrophils	**13.0%**	34.0-71.0
Ovalocytes	**N/A Blood**	N/A
Platelet Count	**138.0K/uL**	150.0-400.0
Platelet Smear	**N/A Blood**	N/A

Poikilocytosis	**N/A Blood**	N/A
Polychromasia	**N/A Blood**	N/A
RDW	**17.2%**	10.5-15.5
Red Blood Cells	**2.91m/uL**	4.6-6.1
Teardrop Cells	**N/A Blood**	N/A
White Blood Cells	**22.9K/uL**	4.0-10.0
Absolute Basophil Count	**0.0K/uL**	0.01-0.08
Absolute Eosinophil Count	0.23K/uL	0.04-0.54
Absolute Monocyte Count	0.46K/uL	0.2-0.8
Absolute Neutrophil Count	2.98K/uL	1.6-6.1
Echinocytes	**N/A Blood**	N/A
RBC Morphology	**N/A Blood**	N/A
RDW-SD	**55.9fL**	35.1-46.3

Prescriptions Ordered: March 19, 2153 at 06:00 AM

1 medication(s) prescribed:

• Levothyroxine Sodium 150 mcg PO/NG 1.0x/day

---

Hospital Admission #23

Admission Time: March 19, 2153 at 06:32 AM

This is the patient's **23rd** hospital admission. The patient was admitted from **WALK-IN/SELF REFERRAL** as an **EW EMER.** admission. The admitting provider was **P997B8**. Insurance coverage: **Medicaid**. Chief complaint: **N/A**. The primary service provided was **N/A**.

Race: **WHITE**, Marital Status: **SINGLE**, Language: **English**

APR DRG Code:

Code: 280

Description: ALCOHOLIC LIVER DISEASE

Severity: 3.0

Mortality Risk: 4.0

HCFA DRG Code:

Code: 432

Description: CIRRHOSIS AND ALCOHOLIC HEPATITIS WITH MCC

Unit Admission - Surgery

Admission Time: March 19, 2153 at 06:33 AM

The patient was admitted to **Surgery** ward. Service provided: **MED**. The patient stayed in this unit until **2153-03-19 09:44:57**, for a total duration of **0 days 3 hours 11 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: March 19, 2153 at 08:00 AM

2 medication(s) prescribed:

• Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

• Heparin Flush (10 units/ml) 5 mL IV 1.0x/day

Unit Admission - Discharge Lounge

Admission Time: March 19, 2153 at 09:44 AM

The patient was admitted to **Discharge Lounge** ward. The patient stayed in this unit until **2153-03-19 12:34:36**, for a total duration of **0 days 2 hours 49 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Unit Admission - Neurology

Admission Time: March 19, 2153 at 12:34 PM

The patient was admitted to **Neurology** ward. The patient stayed in this unit until **2153-03-19 18:03:16**, for a total duration of **0 days 5 hours 28 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: March 19, 2153 at 04:00 PM

9 medication(s) prescribed:

• Docusate Sodium 100 mg PO/NG 2.0x/day

• Albuterol Inhaler 1-2 PUFF IH 6.0x/day

• Cyanocobalamin 1000 mcg PO/NG 1.0x/day

• Furosemide 20 mg IV 1.0x/day

• Acetaminophen 500 mg PO/NG

• Polyethylene Glycol 17 g PO/NG

• Multivitamins W/minerals 1 TAB PO/NG 1.0x/day

• HYDROmorphone (Dilaudid) 1 mg IV 1.0x/day

• Ciprofloxacin HCl 500 mg PO/NG 1.0x/day

Prescriptions Ordered: March 19, 2153 at 05:00 PM

11 medication(s) prescribed:

• Sucralfate 1 gm PO/NG

• Glucagon 1 mg IM

• Insulin 0 UNIT SC

• HydrOXYzine 25 mg PO/NG

• Ursodiol 300 mg PO/NG 2.0x/day

• Rivaroxaban 20 mg PO/NG 1.0x/day

• Lactulose 30 mL PO/NG 3.0x/day

• Dextrose 10% in Water (D10W) 100 mL IV BOLUS

• Fluticasone Propionate NASAL 1 SPRY NU

• Glucose Gel 1 TUBE PO

• rifAXIMin 550 mg PO/NG 2.0x/day

Prescriptions Ordered: March 19, 2153 at 06:00 PM

1 medication(s) prescribed:

• Heparin Flush (100 units/ml) 5 mL IV

Unit Admission - Neurology

Admission Time: March 19, 2153 at 06:03 PM

The patient was admitted to **Neurology** ward. The patient stayed in this unit until **2153-03-25 21:26:26**, for a total duration of **6 days 3 hours 23 minutes**. During this time, various procedures, laboratory tests, and

microbiology events were performed.

Prescriptions Ordered: March 19, 2153 at 07:00 PM

2 medication(s) prescribed:

• DiphenhydrAMINE 12.5 mg PO/NG 1.0x/day

• Syringe (0.9% Sodium Chloride) 5 mL IV

Prescriptions Ordered: March 19, 2153 at 08:00 PM

2 medication(s) prescribed:

• Methadone 2.5 mg PO/NG 3.0x/day

• Atorvastatin 80 mg PO/NG 1.0x/day

Microbiology Tests Performed: March 19, 2153 at 09:49 PM

Total of **1** microbiology result(s):

REFLEX URINE CULTURE: URINE:

• YEAST

Prescriptions Ordered: March 19, 2153 at 10:00 PM

1 medication(s) prescribed:

• Gabapentin 100 mg PO/NG 1.0x/day

Microbiology Tests Performed: March 20, 2153 at 01:17 AM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Prescriptions Ordered: March 20, 2153 at 08:00 AM

5 medication(s) prescribed:

• Allopurinol 100 mg PO/NG 1.0x/day

• Pantoprazole 40 mg PO 1.0x/day

• Ciprofloxacin HCl 500 mg PO/NG 2.0x/day

• Vial 1 VIAL IV 1.0x/day

• Escitalopram Oxalate 20 mg PO/NG 1.0x/day

Prescriptions Ordered: March 20, 2153 at 12:00 PM

2 medication(s) prescribed:

• Albumin 25% 50 g IV 1.0x/day

• Sarna Lotion 1 Appl TP

Prescriptions Ordered: March 20, 2153 at 02:00 PM

2 medication(s) prescribed:

• Insulin (Regular) for Hyperkalemia 10 UNIT IV 1.0x/day

• Dextrose 50% 25 gm IV 1.0x/day

Prescriptions Ordered: March 20, 2153 at 05:00 PM

1 medication(s) prescribed:

• Bag 50 mL IV 1.0x/day

Prescriptions Ordered: March 20, 2153 at 06:00 PM

1 medication(s) prescribed:

• Sodium Zirconium Cyclosilicate 10 g PO/NG 1.0x/day

Prescriptions Ordered: March 20, 2153 at 08:00 PM

1 medication(s) prescribed:

• Heparin 2300-4500 UNIT IV

Prescriptions Ordered: March 21, 2153 at 03:00 AM

1 medication(s) prescribed:

• Ketorolac 15 mg IV 1.0x/day

Prescriptions Ordered: March 21, 2153 at 08:00 AM

3 medication(s) prescribed:

• 5% Dextrose 50 mL IV 1.0x/day

• RisperiDONE 2 mg PO 1.0x/day

• Bag 1 BAG IV 1.0x/day

Prescriptions Ordered: March 21, 2153 at 10:00 AM

1 medication(s) prescribed:

• Albuterol Inhaler 1-2 PUFF IH

Prescriptions Ordered: March 21, 2153 at 12:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.5 mg IV 1.0x/day

Prescriptions Ordered: March 21, 2153 at 06:00 PM

2 medication(s) prescribed:

• Acetaminophen 500 mg PO/NG 4.0x/day

• 5% Dextrose 250 mL IV

Prescriptions Ordered: March 21, 2153 at 09:00 PM

1 medication(s) prescribed:

• Ketorolac 15 mg IV

Procedure(s) Performed: March 22, 2153 at 12:00 AM

2 procedure(s) performed (Source: ICD):

• Drainage of Peritoneal Cavity with Drainage Device, Percutaneous Approach

• Drainage of Peritoneal Cavity, Percutaneous Approach

Microbiology Tests Performed: March 22, 2153 at 02:47 PM

Total of **3** microbiology result(s):

GRAM STAIN: PERITONEAL FLUID:

• 1+ (<1 per 1000X FIELD): POLYMORPHONUCLEAR LEUKOCYTES. NO MICROORGANISMS SEEN. This is a concentrated smear made by cytospin method, please refer to hematology for a quantitative white blood cell count, if applicable.

FLUID CULTURE: PERITONEAL FLUID:

• NO GROWTH.

ANAEROBIC CULTURE: PERITONEAL FLUID:

• NO GROWTH.

Prescriptions Ordered: March 22, 2153 at 07:00 PM

1 medication(s) prescribed:

• Bag 50 mL IV 1.0x/day

Prescriptions Ordered: March 22, 2153 at 11:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25-0.5 mg IV 1.0x/day

Prescriptions Ordered: March 23, 2153 at 08:00 AM

1 medication(s) prescribed:

• Magnesium Oxide 400 mg PO/NG 3.0x/day

Prescriptions Ordered: March 23, 2153 at 09:00 AM

2 medication(s) prescribed:

• OxyCODONE (Immediate Release) 15 mg PO/NG 1.0x/day

• Ondansetron 2 mg IV 1.0x/day

Prescriptions Ordered: March 23, 2153 at 01:00 PM

1 medication(s) prescribed:

• Albumin 25% 50 g IV 1.0x/day

Prescriptions Ordered: March 23, 2153 at 09:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 24, 2153 at 03:00 AM

1 medication(s) prescribed:

• Bag 50 mL IV 1.0x/day

Prescriptions Ordered: March 24, 2153 at 08:00 AM

3 medication(s) prescribed:

• Sodium Zirconium Cyclosilicate 10 g PO/NG 1.0x/day

• Ciprofloxacin HCl 500 mg PO/NG 1.0x/day

• Insulin 2 UNIT SC 1.0x/day

Microbiology Tests Performed: March 24, 2153 at 11:52 AM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Microbiology Tests Performed: March 24, 2153 at 02:05 PM

Total of **1** microbiology result(s):

Blood Culture, Routine: BLOOD CULTURE:

• NO GROWTH.

Microbiology Tests Performed: March 24, 2153 at 02:08 PM

Total of **1** microbiology result(s):

REFLEX URINE CULTURE: URINE:

• MIXED BACTERIAL FLORA (>= 3 COLONY TYPES), CONSISTENT WITH FECAL CONTAMINATION.

Prescriptions Ordered: March 24, 2153 at 11:00 PM

1 medication(s) prescribed:

• Bag 50 mL IV

Procedure(s) Performed: March 25, 2153 at 12:00 AM

1 procedure(s) performed (Source: ICD):

• Drainage of Peritoneal Cavity, Percutaneous Approach

Prescriptions Ordered: March 25, 2153 at 08:00 AM

1 medication(s) prescribed:

• Insulin 4 UNIT SC 1.0x/day

Prescriptions Ordered: March 25, 2153 at 12:00 PM

2 medication(s) prescribed:

• 0.9% Sodium Chloride 100 mL IV 1.0x/day

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Microbiology Tests Performed: March 25, 2153 at 01:17 PM

Total of **3** microbiology result(s):

GRAM STAIN: PERITONEAL FLUID:

• NO POLYMORPHONUCLEAR LEUKOCYTES SEEN. NO MICROORGANISMS SEEN. This is a concentrated smear made by cytospin method, please refer to hematology for a quantitative white blood cell count, if applicable.

• NO GROWTH.

ANAEROBIC CULTURE: PERITONEAL FLUID:

• NO GROWTH.

Prescriptions Ordered: March 25, 2153 at 05:00 PM

2 medication(s) prescribed:

• Heparin 2300-4500 UNIT IV

• Albumin 25% 50 g IV 1.0x/day

Unit Admission - Transplant

Admission Time: March 25, 2153 at 09:26 PM

The patient was admitted to **Transplant** ward. The patient stayed in this unit until **2153-03-28 21:10:27**, for a total duration of **2 days 23 hours 44 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: March 26, 2153 at 02:00 AM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 26, 2153 at 08:00 AM

1 medication(s) prescribed:

• Insulin 4 UNIT SC 1.0x/day

Prescriptions Ordered: March 26, 2153 at 03:00 PM

1 medication(s) prescribed:

• Furosemide 20 mg IV 1.0x/day

Prescriptions Ordered: March 26, 2153 at 04:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 26, 2153 at 09:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 27, 2153 at 06:00 AM

2 medication(s) prescribed:

• Lidocaine 5% Patch 1 PTCH TD 1.0x/day

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 27, 2153 at 08:00 AM

1 medication(s) prescribed:

• Insulin 2 UNIT SC 1.0x/day

Prescriptions Ordered: March 27, 2153 at 02:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 27, 2153 at 10:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 28, 2153 at 12:00 AM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 28, 2153 at 03:00 AM

2 medication(s) prescribed:

- PNEUMOcoccal 23-valent polysaccharide vaccine 0.5 mL IM
- Influenza Vaccine Quadrivalent 0.5 mL IM

Prescriptions Ordered: March 28, 2153 at 04:00 AM

22 medication(s) prescribed:

- Ondansetron 4 mg IV
- NS 100 mL IV 3.0x/day
- Insulin 0 UNIT SC
- Sarna Lotion 1 Appl TP
- Glucose Gel 15 g PO
- Hydroxyurea 500 mg PO 1.0x/day
- Heparin 5000 UNIT SC 2.0x/day
- Levothyroxine Sodium 75 mcg PO/NG 1.0x/day
- Glucagon 1 mg IM
- Acetaminophen 650 mg PO/NG
- Ipratropium-Albuterol Neb 1 NEB NEB 4.0x/day
- HydrOXYzine 25 mg PO/NG
- Senna 8.6 mg PO/NG
- Aspirin 81 mg PO/NG 1.0x/day
- Sodium Chloride 0.9% Flush 3 mL IV 3.0x/day
- Albuterol 0.083% Neb Soln 1 NEB IH
- Allopurinol 100 mg PO/NG
- 5% Dextrose 200 mL IV 1.0x/day
- 0.9% Sodium Chloride 250 mL IV DRIP
- Sodium Chloride 0.9% 1000 mL IV
- Dextrose 50% 12.5 gm IV
- Docusate Sodium 100 mg PO/NG 2.0x/day

Prescriptions Ordered: March 28, 2153 at 06:00 AM

1 medication(s) prescribed:

- Bag 1 BAG IV 1.0x/day

Prescriptions Ordered: March 28, 2153 at 07:00 AM

1 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

Prescriptions Ordered: March 28, 2153 at 08:00 AM

4 medication(s) prescribed:

• 5% Dextrose 250 mL IV 3.0x/day

• Sodium Chloride 0.9% Flush 10 mL IV 1.0x/day

• Escitalopram Oxalate 5 mg PO/NG 1.0x/day

• Simvastatin 10 mg PO/NG

Prescriptions Ordered: March 28, 2153 at 10:00 AM

4 medication(s) prescribed:

• Bag 1 BAG IV

• 5% Dextrose 200 mL IV 1.0x/day

• 0.9% Sodium Chloride 2 BAG IV

• Sterile Water 100 mL IV

Prescriptions Ordered: March 28, 2153 at 11:00 AM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV

Prescriptions Ordered: March 28, 2153 at 02:00 PM

1 medication(s) prescribed:

• Brimonidine Tartrate 0.15% Ophth. 1 DROP RIGHT EYE 3.0x/day

Prescriptions Ordered: March 28, 2153 at 03:00 PM

1 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

Prescriptions Ordered: March 28, 2153 at 07:00 PM

1 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

Prescriptions Ordered: March 28, 2153 at 08:00 PM

1 medication(s) prescribed:

• PrednisoLONE Acetate 1% Ophth. Susp. 1 DROP BOTH EYES 3.0x/day

Prescriptions Ordered: March 28, 2153 at 09:00 PM

2 medication(s) prescribed:

• Lactated Ringers 1000 mL IV

• TraZODone 25 mg PO/NG

Unit Admission - Transplant

Admission Time: March 28, 2153 at 09:10 PM

The patient was admitted to **Transplant** ward. The patient stayed in this unit until **2153-03-30 17:55:11**, for a total duration of **1 days 20 hours 44 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: March 29, 2153 at 04:00 AM

1 medication(s) prescribed:

• 5% Dextrose 100 mL IV 1.0x/day

Prescriptions Ordered: March 29, 2153 at 08:00 AM

2 medication(s) prescribed:

• PrednisoLONE Acetate 1% Ophth. Susp. 1 DROP RIGHT EYE 3.0x/day

• OLANZapine 5 mg PO 1.0x/day

Prescriptions Ordered: March 29, 2153 at 02:00 PM

1 medication(s) prescribed:

• Ciprofloxacin HCl 500 mg PO/NG 2.0x/day

Prescriptions Ordered: March 29, 2153 at 06:00 PM

2 medication(s) prescribed:

• Heparin 2300-4500 UNIT IV

• Lidocaine 1% 4 mL SC 1.0x/day

Prescriptions Ordered: March 29, 2153 at 08:00 PM

1 medication(s) prescribed:

• Clobetasol Propionate 0.05% Ointment 1 Appl TP 2.0x/day

Prescriptions Ordered: March 29, 2153 at 09:00 PM

2 medication(s) prescribed:

• Sodium Chloride 0.9% 1000 mL IV

• Lorazepam 0.5 mg IV 1.0x/day

Prescriptions Ordered: March 29, 2153 at 10:00 PM

1 medication(s) prescribed:

• Insulin 8 UNIT SC 1.0x/day

Procedure(s) Performed: March 30, 2153 at 12:00 AM

1 procedure(s) performed (Source: ICD):

• Drainage of Peritoneal Cavity, Percutaneous Approach

Prescriptions Ordered: March 30, 2153 at 08:00 AM

2 medication(s) prescribed:

• Atenolol 50 mg PO/NG 1.0x/day

• Insulin 4 UNIT SC 1.0x/day

Prescriptions Ordered: March 30, 2153 at 10:00 AM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV

Prescriptions Ordered: March 30, 2153 at 11:00 AM

2 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

• HYDROmorphone (Dilaudid) 0.125 mg IV

Prescriptions Ordered: March 30, 2153 at 01:00 PM

1 medication(s) prescribed:

• Tiotropium Bromide 1 CAP IH 1.0x/day

Prescriptions Ordered: March 30, 2153 at 02:00 PM

2 medication(s) prescribed:

• Lactulose 30 mL PO/NG 4.0x/day

• Methadone 2.5 mg PO/NG 3.0x/day

Prescriptions Ordered: March 30, 2153 at 03:00 PM

1 medication(s) prescribed:

• 0.9% Sodium Chloride (Mini Bag Plus) 100 mL IV 1.0x/day

Prescriptions Ordered: March 30, 2153 at 04:00 PM

1 medication(s) prescribed:

• Albumin 25% 25 g IV 1.0x/day

Unit Admission - Transplant

Admission Time: March 30, 2153 at 05:55 PM

The patient was admitted to **Transplant** ward. The patient stayed in this unit until **2153-04-01 14:58:27**, for a total duration of **1 days 21 hours 3 minutes**. During this time, various procedures, laboratory tests, and microbiology events were performed.

Prescriptions Ordered: March 30, 2153 at 06:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV

Prescriptions Ordered: March 30, 2153 at 07:00 PM

1 medication(s) prescribed:

• Levalbuterol Neb 0.63 mg NEB

Prescriptions Ordered: March 30, 2153 at 08:00 PM

3 medication(s) prescribed:

• Furosemide 40 mg IV 1.0x/day

• Benzonatate 100 mg PO 3.0x/day

• Methadone 2.5 mg PO/NG 2.0x/day

Prescriptions Ordered: March 31, 2153 at 02:00 PM

1 medication(s) prescribed:

• Furosemide 40 mg IV 1.0x/day

Prescriptions Ordered: March 31, 2153 at 06:00 PM

3 medication(s) prescribed:

• Albuterol 0.083% Neb Soln 1 NEB IH

• Iso-Osmotic Dextrose 200 mL IV 1.0x/day

• Sodium Chloride 0.9% Flush 3 mL IV 3.0x/day

Prescriptions Ordered: March 31, 2153 at 07:00 PM

1 medication(s) prescribed:

• HYDROmorphone (Dilaudid) 0.25 mg IV 1.0x/day

Prescriptions Ordered: March 31, 2153 at 08:00 PM

2 medication(s) prescribed:

• Triamcinolone Acetonide 0.1% Ointment 1 Appl TP 2.0x/day

• Fluticasone-Salmeterol Diskus (100/50) 1 INH IH 2.0x/day

Prescriptions Ordered: April 01, 2153 at 01:00 PM

1 medication(s) prescribed:

• Furosemide 40 mg IV 1.0x/day

Discharge Summary

Discharge Time: April 01, 2153 at 02:58 PM

The patient was discharged from **Transplant** with disposition to **N/A**.

Known Allergies: None

Discharge Diagnoses:

Complete Diagnosis List:

• Alcoholic cirrhosis of liver with ascites

• Hepatorenal syndrome

• Chronic lymphocytic leukemia of B-cell type not having achieved remission

• Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease

• Encounter for palliative care

• Chronic diastolic (congestive) heart failure

• Hemiplegia and hemiparesis following cerebral infarction affecting left non-dominant side

• Hypo-osmolality and hyponatremia

• Major depressive disorder, single episode, severe with psychotic features

• Coagulation defect, unspecified

• Hyperkalemia

• Type 2 diabetes mellitus with diabetic chronic kidney disease

• Chronic kidney disease, stage 3 unspecified

• Hyperlipidemia, unspecified

• Obstructive sleep apnea (adult) (pediatric)

• Long term (current) use of anticoagulants

• Sick sinus syndrome

• Presence of cardiac pacemaker

• Atherosclerotic heart disease of native coronary artery without angina pectoris

• Presence of coronary angioplasty implant and graft

• Bariatric surgery status

• Other fluid overload

• Paroxysmal atrial fibrillation

• Personal history of malignant neoplasm of testis

• Long term (current) use of insulin

• Hypothyroidism, unspecified

• Nonalcoholic steatohepatitis (NASH)

• Other chronic pain

• Type 2 diabetes mellitus with diabetic polyneuropathy

• Vitamin D deficiency, unspecified

• Insomnia, unspecified

• Anemia in other chronic diseases classified elsewhere

• Morbid (severe) obesity due to excess calories

• Body mass index [BMI] 39.0-39.9, adult

• Thrombocytopenia, unspecified

- Gout, unspecified
